Long Term Unemployment An International Perspective:

Long-term Unemployment Kenneth Walsh, 1987-06-18 *Combating Long-Term Unemployment* Kenneth

Dyson, 2023-10-20 First published in 1989 *Combating Long Term Unemployment* follows on from and is a companion to *Local Authorities and New Technologies* The book seeks to inform debate by analysing policy responses to the problem of long term unemployment and by focusing on the role of local initiatives in a European context Long term unemployment in Europe is a complicated and multifaceted problem the policy responses to which need to be studied against various contexts It is designed to appeal to all those interested in policies to combat long term unemployment local and central government officials private sector organizations whose work is relevant to locally based initiatives and interested academics

International Perspectives on the Youth Labor Market: Emerging Research and Opportunities Amine,

Samir, 2020-06-26 Persistent unemployment and rising wage differences at the expense of low skilled workers has characterized the labor market in most developed countries Since the last economic crisis unemployment rates and pay inequalities have increased among workers under 25 years of age thus creating an ever widening financial gap for an entire generation Those who do not have a qualification or post secondary diploma often find themselves in precarious jobs at minimum wage Countries are now working to adopt reforms to improve the situation of young people in the labor market *International Perspectives on the Youth Labor Market Emerging Research and Opportunities* provides emerging research exploring the theoretical and practical aspects of financial inequality and applications within global economics Unlike literature that focuses only on developed countries this book also addresses emerging economies whose labor market is often characterized by a dualism that makes the situation of young workers worse Featuring coverage on a broad range of topics such as unemployment rate labor reform and job insecurity this book is ideally designed for economists government officials policymakers executives managers business professionals researchers academicians and students *International*

Perspectives and Strategies for Managing an Aging Workforce Ince, Fatma, 2022-03-11 Older employees are often seen as an obstacle and not as an opportunity for companies especially regarding the transfer of knowledge and experience Effective development and utilization of older professional and managerial employees is an important issue as most organizations are not prepared to tailor their training methods to the needs and preferences of these employees due to negative stereotypes Managing a rapidly aging workforce and sustaining economic dynamism calls for systematic research to prevent age discrimination due to an incomplete knowledge of older workers and politically challenging policy choices that require strong political commitments robust management leadership and social consensus *International Perspectives and Strategies for Managing an Aging Workforce* examines the differences in stereotypes of older employees compared to younger employees in companies analyzes the impact of the aging workforce on retention productivity and well being and investigates organizational systems processes and practices for managing older workers Covering a range of topics such as retention and

retirement this reference work is ideal for researchers academicians practitioners business owners managers human resource workers instructors and students

International Perspectives in the Early Years Linda Miller, Claire Cameron, 2013-12-05 This informative and wide ranging book argues persuasively for the value of multiple perspectives both international and disciplinary in the study and practice of early childhood education because they feed our imaginations and provoke us to think And while illustrating the many differences that exist between countries it highlights the shared issues confronting us wherever we live Emeritus Professor Peter Moss Institute of Education University of London Stemming from original research in the field a range of expert contributors explore the key themes and debates surrounding international perspectives on Early Childhood Education and Care ECEC Drawing on studies carried out in Norway Mexico France Hungary and many more countries the book covers a wide range of topics including the relationship between early childhood and primary education gender and play in ECEC curriculum inclusion early interventions working with families place based learning With case studies detailed suggestions for further reading at different levels and discussion points this is a key text for students of Early Years at all levels from Foundation Degree to Masters as well as current early years practitioners Linda Miller is Professor Emeritus of Early Years The Open University Claire Cameron is Senior Reader in Education at the Thomas Coram Research Unit Institute of Education University of London

At Home and Abroad Francine D. Blau, Lawrence M. Kahn, 2002-04-11 Throughout the latter part of the 20th century the U S labor market performed differently than the labor markets of the world's other advanced industrialized societies In the early 1970s the United States had higher unemployment rates than its Western European counterparts But after two oil crises rapid technological change and globalization rocked the world's economies unemployment fell in the United States while increasing dramatically in other nations At the same time wage inequality widened more in the United States than in Europe In At Home and Abroad Cornell University economists Francine D Blau and Lawrence M Kahn examine the reasons for these striking dissimilarities between the United States and its economic allies Comparing countries the authors find that governments and unions play a far greater role in the labor market in Europe than they do in the United States It is much more difficult to lay off workers in Europe than in the United States unemployment insurance is more generous in Europe and many fewer Americans than Europeans are covered by collective bargaining agreements Interventionist labor market institutions in Europe compress wages thus contributing to the lower levels of wage inequality in the European Union than in the United States Using a unique blend of microeconomic and microeconomic analyses the authors assess how these differences affect wage and unemployment levels In a lucid narrative they present ample evidence that as upheavals shook the global economy the flexible U S market let wages adjust so that jobs could be maintained while more rigid European economies maintained wages at the cost of losing jobs By helping readers understand the relationship between different economic responses and outcomes At Home and Abroad makes an invaluable contribution to the continuing debate about the role institutions can and should play in creating jobs and

maintaining living standards **Interwar Unemployment in International Perspective** Barry J. Eichengreen, T.J. Hatton, 2012-12-06 High unemployment has been one of the most disturbing features of the economy of the 1980s. For a precedent, one must look to the interwar period and in particular to the Great Depression of the 1930s. It follows that recent years have been marked by a resurgence of interest amongst academics in interwar unemployment. The debate has been contentious. There is nothing like the analysis of a period which recorded rates of unemployment approaching 25 per cent to highlight the differences between competing schools of thought on the operation of labour markets. Along with historians, economists whose objective is to better understand the causes, character and consequences of contemporary unemployment, and sociologists seeking to understand contemporary society's perceptions and responses to joblessness, have devoted increasing attention to this historical episode. Like many issues in economic history, this one can be approached in a variety of ways using different theoretical approaches, tools of analysis and levels of disaggregation. Much of the recent literature on the functioning of labour markets in the Depression has been macroeconomic in nature and has been limited to individual countries. Debates from the period itself have been revived and new questions stimulated by modern research have been opened. Many such studies have been narrowly focused and have failed to take into account the array of historical evidence collected and analysed by contemporaries or reconstructed and reinterpreted by historians. International Perspectives on Mental Health Hamid Ghodse, 2011-06 Is a unique collection of authoritative briefings from over 90 countries around the world. Each chapter covers a particular country's demographics, mental health resources, undergraduate education, postgraduate training in psychiatry, research activities, mental health legislation and policy, and development strategies. **AI and Diversity in a Datafied World of Work** Joana Vassilopoulou, Olivia Kyriakidou, 2025-04-24 Artificial intelligence (AI) is rapidly transforming the world of work, but how does it impact diversity, equity, and inclusion (DEI)? **AI and Diversity in a Datafied World of Work** addresses the critical question of whether AI will create more inclusive workplaces or exacerbate existing inequalities. **The Great Depression of the 1930s** Nicholas Crafts, Peter Fearon, 2013-02-28 This book brings together contributions written by internationally distinguished economic historians. The editors explore the current fascination with the 1930s great depression and link it with the great recession which began in 2007 and still poses a threat to economic stability. **European Populations** Van der Kaa, 2012-12-06 The changing demographic landscape which Europe is facing today and in the next decades reflects the past. These changes constitute important challenges to European populations and societies. Shifts in fertility and family formation, in health, morbidity and mortality, in internal and international migration, as well as changes in age structures, in households, in labour forces and in population growth and decline, will influence the living conditions and well-being of Europe's population directly or indirectly. The demographic challenge also concerns the environment, local, regional and national developments, education, production and consumption patterns, economic competitiveness, social security, housing, employment and transport, and health and social care provisions.

These issues their mechanisms determinants and consequences also challenge the scientific study of population As a major forum and market place for scientific demographic debate the 1999 European Population Conference EPC99 was organized to take up this challenge On the threshold of the third millennium European populations are united in diversity and face major demographic issues War and Progress Peter Dewey,2014-09-11 This is an account of how the daily lives of ordinary peoples were changed profoundly and permanently by these three momentous decades 1914 1945 Often depicted in negative terms Peter Dewey finds a much more positive pattern in the wealth of evidence he lays before us His is a story of economic achievement and the emergence of a new sense of social community in the nation rather than a saga of disenchantment and decline *Livable Cities from a Global Perspective* Roger Caves,Fritz Wagner,2018-05-11 Livable Cities from a Global Perspective offers case studies from around the world on how cities approach livability They address the fundamental question what is considered livable The journey each city has taken or is currently taking is unique and context specific There is no such thing as a one size fits all approach to livability Some cities have had a long history of developing livability policies and programs that focus on equity economic and environmental concerns while other cities are relatively new to the game In some areas government has taken the lead while in other areas grassroots activism has been the impetus for livability policies and programs The challenge facing our cities is not simply developing a livability program We must continually monitor and readjust policies and programs to meet the livability needs of all people The case studies investigate livability issues in such cities as Austin Texas Helsinki Finland London United Kingdom Warsaw Poland Tehran Iran Salt Lake City United States Rio de Janeiro Brazil Sydney Australia and Cape Town South Africa The chapters are organized into such themes as livability in capital city regions livability and growth and development livability and equity concerns livability and metrics and creating livability Each chapter provides unique insights into how a specific area has responded to calls for livable cities In doing so the book adds to the existing literature in the field of livable cities and provides policy makers and other organizations with information and alternative strategies that have been developed and implemented in an effort to become a livable city Labour Market and Social Protection Reforms in International Perspective Giuliano Bonoli,2017-07-05 Social protection systems and labour markets have undergone major changes in the past two decades Welfare states are being reformed scaled back and modernised labour markets at the same time are more precarious more feminised more unequal and throughout the OECD area older The interaction between labour markets and social protection has become increasingly crucial to the social and economic policy mix concerning unemployment the transformation of work the new poverty and even demographics Against this background an interdisciplinary team of leading labour market and social protection experts from various OECD countries examine the multifaceted aspects of the changing relationship between social protection systems and labour markets They identify and analyse key emerging issues such as the link between employment and social protection financing the adaptation of social protection systems to women s career patterns

and the development of new forms of social protection that aim at promoting employment With practical policy guides and recommendations using case studies and comparative chapters this will be engaging reading for policy makers social actors and academics alike

Perspectives on Modern Economy Aizhan Khoich,Ahmet Arif Eren,Ali Eren Alper,2020-09-10 This book aims to provide researchers from basic disciplines of the economics fields such as consumer behavior and public economy with a variety of distinctive perspectives in today s world where the behavior and preferences of economic actors have changed completely and the economic policies of countries have been redrafted

The European Social Model and Transitional Labour Markets Ralf Rogowski,2016-02-11 Bringing together theoretical empirical and comparative perspectives on the European Social Model ESM and transitional labour market policy this volume contains theoretical accounts of the ESM and a discussion of policy implications for European social and employment policies that derive from research on transitional labour markets It provides an economic as well as legal assessment of the European Employment Strategy and contains evaluations of new forms of governance both in European and member state policies including discussions of the potential and limits of soft law instruments Country studies of labour market reforms in Denmark the Netherlands Belgium and France assess their contribution to an emerging ESM while comparative accounts of the ESM examine mobility and security patterns in Europe and beyond and evaluate recent flexicurity policies from a global perspective

Anti-Oppressive Social Work Practice Karen Morgaine,Moshoula Capous-Desyllas,2014-07-22 Provides an important step in the ongoing evolution of generalist practice in social work It continues a rich tradition that challenges the profession to become more and more explicit about the revolutionary aspect of practice Christian Itin Metropolitan State University of Denver
