COMETS! David J. Eicher, 2013-09-23 Practical guide to the history and science of comets including techniques and tips on how to observe and image them *Visually Observing Comets* David A. J. Seargent, 2017-03-15 In these days of computers and CCD cameras visual comet observers can still contribute scientifically useful data with the help of this handy reference for use in the field Comets are one of the principal areas for productive pro amateur collaboration in astronomy but finding comets requires a different approach than the observing of more predictable targets Principally directed toward amateur astronomers who prefer visual observing or who are interested in discovering a new comet or visually monitoring the behavior of known comets it includes all the advice needed to thrive as a comet observer After presenting a brief overview of the nature of comets and how we came to the modern understanding of comets this book details the various types of observations that can usefully be carried out at the eyepiece of a telescope Subjects range from how to search for new comets to visually estimating the brightness of comets and the length and orientation of tails in addition to what to look for in comet heads and tails Details are also given of 20 periodic comets predicted to return between the years 2017 and 2027 that are expected to become suitable targets for visual observing in addition to information on a famous comet potentially visible each year and subject to great outbursts of brightness **A Look at Comets** Ray Spangenburg, Kit Moser, Diane Moser, 2003 A comprehensive look at comets from man's earliest observations of hairy stars to recent sightings of Comet Shoemaker Levy 9 and Halle Bopp to future space missions to study comets in the outer solar system **Comets** Betsy Rathburn, 2019-08-01 What has a nucleus coma and two tails Why a comet of course The wonder and mystery of comets has excited humans for centuries and they continue to provide valuable information about the solar system and the creation of the galaxy This title will introduce striving readers to comets with thought provoking information fascinating facts and engaging images **Comets** Kristen Rajczak Nelson, 2012-08-01 Readers are introduced to how comets move and form Famous comets such as Halley's comet are highlighted throughout the text Fun fact boxes accompany science content detailed in age appropriate language Enhanced by full color photographs of these incredible light shows and helpful scientific diagrams this book brings these comets to Earth for readers to enjoy *Comets and Meteors* Stiefel, 2014-08-01 In *Comets and Meteors* Shooting through Space readers will learn how the celestial wonders known as comets and meteors travel through space and their effects on Earth Filled with fun facts young learners will love exploring the scientific information and drawing conclusions about life now and in the future The Inside Outer Space series takes readers on an intergalactic journey that unravels the mysteries of the universe Each 24 page book informs readers in grades K 3 on the Sun Earth planets and stars while also igniting imaginations about the unknown Stunning photographs and diagrams engage readers while text based questions aid in reading comprehension **The Cosmos** Jay M. Pasachoff, Alex Filippenko, 2013-08-12 An exciting introduction to astronomy the fourth edition of this book uses recent discoveries and stunning photography to inspire non

science majors about the Universe Written by two highly experienced and engaging instructors each chapter has been fully updated with more than 200 new images throughout including recent images from space missions and the world's best observatories The newly redesigned text is organized as a series of stories each presenting the history of the field the observations made and how they fit within the process of science our current understanding and what future observations are planned Math is provided in boxes and easily read around making the book suitable for courses taking either mathematical or qualitative approaches New discussion questions encourage students to think widely about astronomy and the role science plays in our everyday lives and podcasts for each chapter aid studying and comprehension

Physics Of Comets (2nd Edition) K S Krishna Swamy, 1997-05-03 The study of Comet Halley in 1986 was a tremendous success for cometary science In March of that year six spacecrafts passed through Comet Halley as close as 600 km from the nucleus and made the in situ measurements of various kinds These space missions to Comet Halley and that of the ICE spacecraft to Comet Giacobini Zinner combined with studies both ground based and above the atmosphere have increased our knowledge of cometary science in a dramatic way This new edition of Physics of Comets incorporates these new and exciting findings The emphasis of the book is on the physical processes operating in a cometary environment It discusses up to date

observations methods and results based on the study of various comets The subject is developed in a systematic manner covering various aspects of cometary phenomena This book may serve as a text book for students and as reference material for researchers

you *Catalog of Unconfirmed Comets - Volume 1* Gary W. Kronk, Maik Meyer, 2023-05-09 This catalog is the first in depth investigation of comets that were reported since the 17th century but not confirmed and subsequently lost Volume I of this two volume work covers objects observed between 1600 and 1899 a period that was dominated by visual observations and was experiencing a rapid evolution in science The book uniquely combines the history and culture of comet hunting and discovery with modern tools of orbital mechanics to present a wholesome catalog of unconfirmed and suspected comets Each case includes a presentation of the observations a discussion about the observer when possible consideration of the historic context and a conclusion as to the nature of the object In most cases the book presents material from original sources including some never before published that were acquired from observatories libraries and historical societies around the world Although some of these unconfirmed comets turned out to be misidentifications of planets or star clusters fabrications or poor observations of comets that were already being observed the Authors did identify many objects that were likely real comets In some cases the Authors were even able to derive orbits for the first time These observations may be valuable in the future as they could prove to be observations of periodic comets still to be discovered **Deep Sky Objects** David H. Levy, 2011-02-02 Veteran comet hunter and eloquent popular astronomy writer David H Levy takes amateur sky watchers on a fascinating journey into deep space in this enthusiastic and informative survey of the many far distant yet observable objects in the night sky Light years beyond our solar system deep sky objects include such intriguing phenomena as double and triple stars nebulae galaxies and quasars Designed to be accessible for even beginners Levy s clear elegant descriptions will guide astronomy buffs in any hemisphere and locale light polluted cities as well as dark countryside to the wonders of our enormous universe As the discoverer or codiscoverer of twenty one comets including the famous Shoemaker Levy 9 that crashed into Jupiter in 1994 Levy has devoted many decades of experience to observing the night sky Over the years he has located over 300 deep sky objects of which more than 100 best and brightest are featured in this book Levy offers a physical description and a discussion of each object s history and beauty as well as a star atlas to aid in finding the objects Proceeding from objects closest to our solar system to those farthest away Levy gives readers an awe inspiring glimpse into the structure of the cosmos Complete with both color and black and white photos plus many helpful illustrations Deep Sky Objects is the ideal guide to the wonders of the universe for both experienced and novice star gazers *Visions of the Cosmos* Carolyn Collins Petersen, John C. Brandt, 2003-11-20 This spectacularly illustrated book is a comprehensive exploration of astronomy through the eyes of the world s observatories and spacecraft missions Featuring the latest and most stunning images it provides a magnificent picture of the beauty of the cosmos The accompanying text is an accessible guide to the science behind the wonders and includes clear explanations of all the major themes in astronomy An essential guide to understanding and appreciating the Universe Visions of the Cosmos builds on the success of the authors previous book Hubble Vision which became an international best seller and won world wide acclaim Carolyn Collins Petersen is a science journalist and creator

of educational materials for astronomy She is the former Editor of Books Products at Sky Publishing Corporation and served as Editor of SkyWatch and Associate Editor of Sky Telescope magazines Petersen is the lead author of the book Hubble Vision first published in 1995 by Cambridge University Press and co written with Dr John C Brandt She is also co editor with J Kelly Beatty and Andrew Chaikin of The New Solar System fourth edition co published by Sky Publishing Corporation and Cambridge University Press John C Brandt has held positions as a research scientist teacher and administrator and is currently an adjunct professor of physics and astronomy at the University of New Mexico He served for 20 years as Chief of a major NASA scientific laboratory and was the Principal Investigator for the Goddard High Resolution Spectograph on the Hubble Space Telescope John received the NASA Medal for Exceptional Scientific Achievement in 1978 and 1992 and has had a minor planet formally named after him 3503 Brandt for his fundamental contributions to understanding of solar system astrophysics

Catalog of Unconfirmed Comets - Volume 2 Gary W. Kronk, Maik Meyer, 2024-05-30 This two volume catalog is the first in depth investigation of comets that were reported since the 17th century but not confirmed and subsequently lost Volume 2 covers objects observed between 1900 and the present a period that was dominated by photographic observations and the detection of much fainter objects This book provides a distinctive blend of the historical and cultural aspects of comet hunting and discovery along with the utilization of contemporary tools in orbital mechanics and data analysis This comprehensive compilation offers a thorough catalog of unconfirmed comets Each case encompasses a detailed presentation of observations a discussion on the observer when feasible an examination of the historical context and a conclusive analysis of the object's nature The book predominantly showcases original material and photographs sourced from observatories libraries and historical societies worldwide exposing a significant number of illustrations that have never been previously published While some of these unconfirmed comets were determined to be misidentifications of minor planets artifacts caused by emulsion or optical effects or inaccurate observations of comets that were already under observation the Authors did manage to identify numerous objects that were likely genuine comets These observations hold potential value for the future as they could be observations of periodic comets yet to be formally identified In a handful of instances the Authors were also able to find new observations which led to the calculation of orbits for the first time enabling a formal announcement or identifying suspected comets that were already known to be periodic comets

Dawn of Small Worlds Michael Moltenbrey, 2015-10-24 This book gives a detailed introduction to the thousands and thousands of smaller bodies in the solar system Written for interested laymen amateur astronomers and students it describes the nature and origin of asteroids dwarf planets and comets and gives detailed information about their role in the solar system The author nicely reviews the history of small world exploration and describes past current and future space craft missions studying small worlds and presents their results Readers will learn that small solar system worlds have a dramatically different nature and appearance than the planets Even though research activity on small worlds has increased in the recent past many of their

properties are still in the dark and need further research **Look at Comets** Ray Spangenburg, Kit Moser, 2004-03-01 A comprehensive look at comets from man's earliest observations of hairy stars to recent sightings of Comet Shoemaker Levy 9 and Halle Bopp to future space missions to study comets in the outer solar system *Comets in the 21st Century* Daniel C Boice, Thomas Hockey, 2019-04-25 Have you ever seen a comet It is a marvelous experience one that all humans can share that spawns a deep yearning to understand the spectacle Have you ever wondered what comets are and why astronomers spend so much time studying them Now a comet expert and an astronomical historian have come together to produce the unique book that you now hold in your hands Using their several decades of teaching experience the authors have concisely presented the information you need to comprehend these majestic apparitions that grace our night skies No mathematical proficiency is needed in fact this book doesn't contain a single equation Comets are cosmic Rosetta stones bridging our current knowledge by digging back to the earliest days of our Solar Systems How did life arise on Earth Did comets play a significant role in bringing water and the necessary organic matter to our early Earth How about the dinosaurs Were they driven to extinction by a cometary impact 66 million years ago Comets may be both the enablers and destroyers of life on Earth as we know it These are some of the tantalizing questions discussed here If you so desire steps are given to join the ranks of amateur comet hunters Astronomy is one of the last sciences where amateurs play a significant role Your reward for discovery A comet officially bearing your name in the history books The next Great Comet is on its way we just do not know when it will arrive Armed with this book you will be ready to enjoy this unforgettable event *The World's Chronicle* Eleanor Atkinson, Francis B.
