The Philosophy of Law Christopher Berry Grey, 2013-07-04 From articles centering on the detailed and doctrinal exposition of the law to those which reside almost wholly within the realm of philosophical ethics this volume affords comprehensive treatment to both sides of the philosophico legal equation Systematic and sustained coverage of the many dimensions of legal thought gives ample expression to the true breadth and depth of the philosophy of law with coverage of The modes of knowing and the kinds of normativity used in the law Studies in international constitutional criminal administrative persons and property contracts and tort law including their historical origins and worldwide ramifications Current legal cultures such as common law and civilian European and Aboriginal Influential jurisprudents and their biographies All influential schools and methods *Affective legal analysis* Frank Fleerackers, Josef Heinz Müller, Wilfried Burkhardt, 2019 Indeed if the legal field is to be understood as instrumental to democracy's cohabitation of individuals research on dispute resolution remains pre eminent as a means to understand how individual views differ and how different views can be overcome As a central part of conflict analysis such research would assist an interdisciplinary quest for a dynamic understanding of democracy and law It would focus on how different individuals with different conceptions of the good can live together in their community in their world Scientific research in the fields of communication economics psychology history political theory and philosophy to name but a few would side with legal theory in a shared ambition to analyze the way individuals are affected by their views as well as by their institutions in order to provide society with a dynamic means to solve conflicts and enhance citizenship or legal awareness Such research necessarily coincides with empathy oriented education directed towards an understanding of different conflict positions and the related comprehensive or non comprehensive views affecting them An affective education analyzing all affective mechanisms of societal or interpersonal disputes and their legal or alternative resolution A clinical education offering an interactive simulation with regard to these positions and their affective impact demonstrating how individual views continuously affect the positions taken how disputes are affected by the legal or other institutions that attempt to solve them and how the effectiveness of legal or other solutions to the conflict at hand depends on a practice of affective legal analysis Thus legal and civic education by way of affective narration and clinical simulation join affective legal analysis in its endeavor to provide society with a similarly affective and non rationalizing approach of legal awareness Facts and Values M.C. Doeser, J.N. Kraay, 2012-12-06 The answer to philosophical questions will often depend on the position one takes regarding the fact value problem It is therefore not surprising that in the tradition of western philosophy the past 200 years or so record an animated discussion of it In the present collection the debate is continued by representatives of various schools in contemporary western thought A number of philosophers from non western cultures too enter into it The contributions do not all reflect on the same theme nor do they use the same approach Essays written by philosophers sympathetic to the analytical tradition are followed by reflections on the part of those inspired by phenomenology A third group of contributions is by non western

thinkers who are more likely to approach the problem in terms of culture Their engagement with the issue clearly shows among other things that it is almost exclusively in the western tradition that the fact value distinction is often understood as an outright dichotomy The occasion for the publication of this collection is Dr Cornelis Anthonie van Peursen's retirement as Professor of Philosophy This year he leaves the Free University Amsterdam until 1982 he was professor at the University of Leyden as well In the Netherlands and beyond he has become known for his concern with constructive comparison of diverging philosophical trends and the cross cultural fertilization of thought Characteristic of his career are his efforts to render the results of academic philosophizing understandable to a broader audience **Ethical Dimensions of Legal Theory**, 2021-11-15 **What is Good, and What God Demands** Tzvi (Michael) Novick, 2010-09-24 The normative rhetoric of tannaitic literature the earliest extant corpus of rabbinic Judaism is predominantly deontological Prior scholarship on rabbinic supererogation and on points of contact with Greco Roman virtue discourse has identified non deontological aspects of tannaitic normativity However these two frameworks overlook precisely the productive intersection of deontological with non deontological the first because supererogation defines itself against obligation and the second because the Greco Roman comparative discourages serious treatment of law like elements This book addresses ways in which alternative normative forms entwine with the core deontological rhetoric of tannaitic literature This perspective exposes inter alia echoes of the post biblical wisdom tradition in tannaitic law the rich polyvalence of the category mitzvah and telling differences between the schools of Akiva and Ishmael **Indian Religion and Philosophy** Mr. Rohit Manglik, 2024-06-19 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels **Universal Laws of Nature and Cells** Goran Indjic, 2019-03-29 The structure and metabolism of prokaryotic and eukaryotic cells reveals their nature and evolution which can lead to new treatments for infectious and malignant diseases Goran Indjic a physician and clinical microbiologist shares a detailed analysis of the phenomena of prokaryotic and eukaryotic cells in the book Taking an innovative approach he updates contemporary literature in the field Relying on biology philosophy other scientific disciplines and even art Indjic offers fresh ideas and experiments for investigating the nature of prokaryotic and eukaryotic cells According to this new approach basic structures of prokaryotic and eukaryotic cells consist of polypeptides that build protein and nucleic acid spirals which in turn build strings that generate filaments of prokaryotic cells and complex cylinders of eukaryotic cells The author describes in detail the strings filaments and complex cylinders that are structures of the cells built and unified by metabolism Previously prokaryotic and eukaryotic structures were observed in dead cells without deeper thinking and imagination With deeper analysis imagination and thinking Universal Laws of Nature and Cells offers insights into the cellular phenomena and practical taxonomy of prokaryotic cells **Exploring the Boundaries of International Criminal Justice** Mark

Findlay,2016-04-15 This collection discusses appropriate methodologies for comparative research and applies this to the issue of trial transformation in the context of achieving justice in post conflict societies In developing arguments in relation to these problems the authors use international sentencing and the question of victims interests and expectations as a focus The conclusions reached are wide ranging and haighly significant in challenging existing conceptions for appreciating and giving effect to the justice demands of victims of war and social conflict The themes developed demonstrate clearly how comparative contextual analysis facilitates our understanding of the legal and social contexts of international punishment and how this understanding can provide the basis for expanding the role of restorative international criminal justice within the context of international criminal trials

Expert Systems in Law Antonio Anselmo Martino,1992 Informatics is a cross roads of disciplines but it is also a forge for implementations that are transforming our society because they are transforming all forms of production Law is without a doubt a very important social application domain of informatics In the volume presented here legal knowledge is considered mainly from the lawyer s point of view while taking into account the implementation of expert systems It is a review of the best known theories of the representation of legal orders and systems in the light of the possibility of using more advanced computer tools A solution to the problem of how to represent legal knowledge in such a way that it can be used by the inference engine of an expert system for making calculations and arriving at consequences is also proposed

The Routledge Handbook of Biopolitics Sergei Prozorov,Simona Rentea,2016-08-05 The problematic of biopolitics has become increasingly important in the social sciences Inaugurated by Michel Foucault s genealogical research on the governance of sexuality crime and mental illness in modern Europe the research on biopolitics has developed into a broader interdisciplinary orientation addressing the rationalities of power over living beings in diverse spatial and temporal contexts The development of the research on biopolitics in recent years has been characterized by two tendencies the increasingly sophisticated theoretical engagement with the idea of power over and the government of life that both elaborated and challenged the Foucauldian canon e g the work of Giorgio Agamben Antonio Negri Roberto Esposito and Paolo Virno and the detailed and empirically rich investigation of the concrete aspects of the government of life in contemporary societies Unfortunately the two tendencies have often developed in isolation from each other resulting in the presence of at least two debates on biopolitics the historico philosophical and the empirical one This Handbook brings these two debates together combining theoretical sophistication and empirical rigour The volume is divided into five sections While the first two deal with the history of the concept and contemporary theoretical debates on it the remaining three comprise the prime sites of contemporary interdisciplinary research on biopolitics economy security and technology Featuring previously unpublished articles by the leading scholars in the field this wide ranging and accessible companion will both serve as an introduction to the diverse research on biopolitics for undergraduate students and appeal to more advanced audiences interested in the current state of the art in biopolitics studies
