Man Made The Land Essays In English Historical Geography

Robert A. Dodgshon, Robin A. Butlin

Man Made The Land Essays In English Historical Geography:

Man Made the Land Alan R. H. Baker, John Brian Harley, 1973 Man Made the Land Alan R. H. Baker, Gordon Manley, 1973 *A Century of British Geography* Ron Johnston, Michael Williams, British Academy, 2003-09-11 These essays trace the evolution of British geography as an academic discipline during the last hundred years and stress how the study of the world we live in is fundamental to an understanding of its problems and concerns Never before has such an ambitious and wide ranging review been attempted and never before has it been done with so much knowledge and passion The principal themes covered in this volume are those of environment place and space and the applied geography of map making and planning The volume also addresses specific issues such as disease urbanization regional viability and ethics and social problems This lively and accessible work offers many insights into the minds and practices of today's geographers **Life History Evolution** Steven C. Hertler, Aurelio José Figueredo, Mateo Peñaherrera-Aguirre, Heitor B. F. Fernandes, Michael A. Woodley of Menie, 2018-07-04 The social sciences share a mission to shed light on human nature and society However there is no widely accepted meta theory no foundation from which variables can be linked causally sequenced or ultimately explained This book advances life history evolution as the missing meta theory for the social sciences Originally a biological theory for the variation between species research on life history evolution now encompasses psychological and sociological variation within the human species that has long been the stock and trade of social scientific study The eighteen chapters of this book review six disciplines eighteen authors and eighty two volumes published between 1734 and 2015 re reading the texts in the light of life history evolution Essays on the Industrial Revolution in Britain Sidney Pollard, 2024-10-28 This volume has three main themes First there is the concept of the Industrial Revolution and its main characteristics and the author defends both the term and the notions behind it against attempts to play down their significance A particular interest is the comparison of what happened to Britain with similar processes in other European countries The second theme is the set of problems facing the early entrepreneurs and managers Their difficulties as pioneers in the economic as well as the social sphere are often underrated and are here explored in detail Last there is an emphasis on the characteristic feature of industrialisation as a regional phenomenon and on the significance of particular regions in the entire process All three themes have called forth extended debate in which these essays have played an important part **Place, Culture, and Identity** Alan R. H. Baker, 2001 Alan R H Baker of the Geography Department of the University of Cambridge has played a leading role in the development of historical geography This book which features twelve specially commissioned essays recognizes his highly influential and innovative contributions The contributors address the following topics methodology and ideology in historical geography historical geographies of state regulation and political discourse the social and cultural use of public and private space and the interpretation of images of place in relation to cultural and national identity **Lord and Peasant in Nineteenth Century Britain** Dennis R. Mills, 2016-06-17 First published in 1980 this book looks at the

social structure of 18th and 19th century rural Britain It is particularly concerned with the relationship of landlord and peasant in the rural village and examines the open closed model of English rural social structure in great depth In doing so it explores the ways in which the estate system influenced urban development and how the peasant system facilitated the industrialisation of many villages This book will be of particular interest to students of Victorian and social history

industrialisation and urbanisation **The Relations of History and Geography** Henry Clifford Darby, 2002 This set of twelve previously unpublished essays on historical geography written by Darby in the 1960s explains the basis of his ideas The essays are divided into three quartets of studies relating to England France and the United States *Enclosure* Gary Fields, 2017-09-05 *Enclosure* marshals bold new arguments about the nature of the conflict in Israel Palestine Gary Fields examines the dispossession of Palestinians from their land and Israel's rationale for seizing control of Palestinian land in the contexts of a broad historical analysis of power and space and of an enduring discourse about land improvement Focusing on the English enclosures which eradicated access to common land across the English countryside Amerindian dispossession in colonial America and Palestinian land loss Fields shows how exclusionary landscapes have emerged across time and geography Evidence that the same moral legal and cartographic arguments were used by enclosers of land in very different historical environments challenges Israel's current claim that it is uniquely beleaguered This comparative framework also helps readers in the United States and the United Kingdom understand the Israeli Palestinian conflict in the context of their own histories

The Carolina Backcountry Venture Kenneth E. Lewis, 2017-04-15 A study of the transformative economic and social processes that changed a backcountry Southern outpost into a vital crossroads The Carolina Backcountry Venture is a historical geographical and archaeological investigation of the development of Camden South Carolina and the Wateree River Valley during the second half of the eighteenth century The result of extensive field and archival work by author Kenneth E Lewis this publication examines the economic and social processes responsible for change and documents the importance of those individuals who played significant roles in determining the success of colonization and the form it took Established to serve the frontier settlements the store at Pine Tree Hill soon became an important crossroads in the economy of South Carolina's central backcountry and a focus of trade that linked colonists with one another and the region's native inhabitants Renamed Camden in 1768 the town grew as the backcountry became enmeshed in the larger commercial economy As pioneer merchants took advantage of improvements in agriculture and transportation and responded to larger global events such as the American Revolution Camden evolved with the introduction of short staple cotton which came to dominate its economy as slavery did its society Camden's development as a small inland city made it an icon for progress and entrepreneurship Camden was the focus of expansion in the Wateree Valley and its early residents were instrumental in creating the backcountry economy In the absence of effective larger economic and political institutions Joseph Kershaw and his associates created a regional economy by forging networks that linked the immigrant population and

incorporated the native Catawba people Their efforts formed the structure of a colonial society and economy in the interior and facilitated the backcountry s incorporation into the commercial Atlantic world This transition laid the groundwork for the antebellum plantation economy Lewis references an array of primary and secondary sources as well as archaeological evidence from four decades of research in Camden and surrounding locations The Carolina Backcountry Venture examines the broad processes involved in settling the area and explores the relationship between the region s historical development and the landscape it created

Historical Geography of England and Wales Robert A. Dodgshon, Robin A. Butlin, 2013-10-22 This text has been designed to cover all aspects and phases of the historical geography of England and Wales in a single volume In its substantially revised and enlarged form the treatment of standard themes has been completely re written to take account of recent work and shifts in viewpoint while its overall coverage has been extended to embrace newer themes like symbolic landscapes and the geography of the inter war period Its comprehensiveness and freshness of approach ensure its continuing value and success as a text Breadth of coverage from prehistory to 1939 Uses a range of data sources and approaches Well illustrated with particular emphasis on key themes Major revision of 1st edition with much wider range of topics

The New Nature of Maps J. B. Harley, 2002-10-03 In these essays the author draws on ideas in art history literature philosophy and the study of visual culture to subvert the traditional positivist model of cartography and replace it with one grounded in an iconological and semiotic theory of the nature of maps

Library of Congress Catalog Library of Congress, 1976 Beginning with 1953 entries for Motion pictures and filmstrips Music and phonorecords form separate parts of the Library of Congress catalogue Entries for Maps and atlases were issued separately 1953 1955

English Writing and India, 1600-1920 Pramod K. Nayar, 2008-03-25 This book explores the formations and configurations of British colonial discourse on India through a reading of prose narratives of the 1600 1920 period Arguing that colonial discourse often relied on aesthetic devices in order to describe and assert a degree of narrative control over Indian landscape Pramod Nayar demonstrates how aesthetics furnished a vocabulary and representational modes for the British to construct particular images of India Looking specifically at the aesthetic modes of the marvellous the monstrous the sublime the picturesque and the luxuriant Nayar marks the shift in the rhetoric from the exploration narratives from the age of mercantile exploration to that of the shikar memoirs of the late nineteenth and early twentieth century s extreme exotic English Writing and India provides an important new study of colonial aesthetics even as it extends current scholarship on the modes of early British representations of new lands and cultures

Geography, 1975 Includes section Reviews and other bibliographical material

Ceremonies of Possession in Europe's Conquest of the New World, 1492-1640 Patricia Seed, 1995-10-27 A 1996 comparative history exploring the significance of ceremonies performed by the western imperial powers to mark their territorial possession of the New World

Political Ecology Karl S. Zimmerer, Thomas J. Bassett, 2012-06-15 This volume offers a unique integrative perspective on the political and ecological

processes shaping landscapes and resource use across the global North and South Twelve carefully selected case studies demonstrate how contemporary geographical theories and methods can contribute to understanding key environment and development issues and working toward effective policies Topics addressed include water and biodiversity resources urban and national resource planning scientific concepts of resource management and ideas of nature and conservation in the context of globalization Giving particular attention to evolving conceptions of nature society interaction and geographical scale an introduction and conclusion by the editors provide a clear analytical focus for the volume and summarize important developments and debates in the field

The American Frontier Kenneth E. Lewis, 2014-05-19 The American Frontier An Archaeological Study of Settlement Pattern and Process focuses on general rules or laws for the evolution of all agrarian frontiers emphasizing those that are expanding A variety of frontiers is also discussed in addition to the agrarian type to pinpoint similarities and differences Organized into 11 chapters this book first elucidates the processes of frontier colonization and then describes the frontier model employed for the interpretation of documentary and material evidence for the examination of the development of South Carolina frontier Some chapters then focus on the examination of South Carolina s colonial past in terms of the model to determine its degree of conformity with the latter and to set the stage for the archaeological study the development of archaeological hypotheses and a consideration of the material record Other types of frontiers are characterized by separate developmental processes and several of these are discussed in Chapter 10 as avenues for further research This book will be valuable to scholars in several fields including history geography and anthropology Historical archaeologists will find it especially useful in designing research in former colonial areas and in modeling additional kinds of frontier change

An Environmental History of the World Johnson Donald Hughes, 2001 This original work follows a chronological path through the history of mankind in relationship to ecosystems around the world Each chapter concentrates on a general period in human history each also has three case studies which illustrate the significant patterns occurring at that time

The Great Transition B. M. S. Campbell, 2016-06-23 Major account of the fourteenth century crisis which saw a series of famines revolts and epidemics transform the medieval world
