Man The Promising Primate The Conditions Of Human Evolution:

Man, the Promising Primate Peter J. Wilson, 1983-01-01 Speculates on man's specific evolution into the promising primate a paradoxical combination of endless potential and a vulnerable need to exchange promises and thus establish social familial and cultural ties

The Faith Factor in Fatherhood Don E. Eberly, David Blankenhorn, 1999-10-13 Edited by founder and chairman of the National Fatherhood Initiative Don Eberly *The Faith Factor in Fatherhood* addresses the key role that religious institutions can play in reviving what Eberly calls the sacred vocation of fatherhood In response to the wider debate regarding the increased expectations that are being placed by policy makers on faith based institutions to serve important public purposes contributors to this volume guide denominations places of worship and religious social agencies to recover the role they once played in reaching and supporting young men with a message of responsible fatherhood Ecumenical in scope the book addresses what each faith community can do to recover its particular heritage of engaged involved fathering through methods including instruction rites of passage programs stories ceremonies mentoring and community outreach

Biology as Society, Society as Biology: Metaphors Sabine Maasen, E. Mendelsohn, P. Weingart, 2013-12-01 not lie in the conceptual distinctions but in the perceived functions of metaphors and whether in the concrete case they are judged positive or negative The ongoing debates reflect these concerns quite clearly namely that metaphors are judged on the basis of supposed dangers they pose and opportunities they offer These are the criteria of evaluation that are obviously dependent on the context in which the transfer of meaning occurs Our fundamental concern is indeed the transfer itself its prospects and its limits Looking at possible functions of metaphors is one approach to understanding and elucidating sentiments about them The papers in this volume illustrate by quite different examples three basic functions of metaphors illustrative heuristic and constitutive These functions represent different degrees of transfer of meaning Metaphors are illustrative when they are used primarily as a literary device to increase the power of conviction of an argument for example Although the difference between the illustrative and the heuristic function of metaphors is not great it does exist metaphors are used for heuristic purposes whenever differences of meaning are employed to open new perspectives and to gain new insights In the case of constitutive metaphors they function to actually replace previous meanings by new ones Sabine Maasen in her paper introduces the distinction between transfer and transformation

Lost Kingdom: Animal Death in the Anthropocene Wendy A. Wiseman, Burak Kesgin, 2024-03-12 The authors in *Lost Kingdom* grapple with both the catastrophe of mass animal extinction in which the panoply of earthly life is in the accelerating process of disappearing and with the mass death of industrial animal agriculture Both forms of anthropogenic violence against animals cast the Anthropocene as an era of criminality and loss driven by boundless human exceptionalism forcing a reckoning with and an urgent reimagining of human animal relations Without the sleights of hand that would lump humanity into a singular *Anthropos* of the Anthropocene the authors recognize the differential nature of human impacts on animal life and the biosphere as a whole while affirming the

complexity of animal worlds and their profound imbrications in human cultures societies and industries Confronting the reality of the Sixth Mass Extinction and mass animal death requires forms of narrativity that draw on traditional genres and disciplines while signaling a radical break with modern temporalities and norms Chapters in this volume reflect this challenge while embodying the interdisciplinary nature of inquiry into non human animality at the edge of the abyss historiography cultural anthropology post colonial studies literary criticism critical animal studies ethics religious studies Anthropocene studies and extinction studies entwine to illuminate what is arguably the greatest crisis for all creatures in the past 65 million years

A Millennium of Family Change Wally Seccombe, 1992 How do changes in family form relate to changes in society as a whole In a work which combines theoretical rigour with historical scope Wally Seccombe provides a powerful study of the changing structure of families from the Middle Ages to the beginning of the Industrial Revolution Responding to feminist critiques of sex blind historical materialism Seccombe argues that family forms must be seen to be at the heart of modes of production He takes issue with the mainstream consensus in family history which argues that capitalism did not fundamentally alter the structure of the nuclear family and makes a controversial intervention in the long standing debate over European marriage patterns and their relation to industrialization Drawing on an astonishing range of studies in family history historical demography and economic history A Millennium of Family Change provides an integrated overview of the long transition from feudalism to capitalism illuminating the far reaching changes in familial relations from peasant subsistence to the making of the modern working class

Beyond Natural Selection Robert G. Wesson, Robert Wesson, 1993 proposes an approach to evolution that is more in harmony with modern science than Darwinism or neo Darwinism

Engaging Anthropology Thomas Hylland Eriksen, 2020-05-26 Anthropology ought to have changed the world What went wrong Engaging Anthropology takes an unflinching look at why the discipline has not gained the popularity and respect it deserves in the twenty first century From identity to multicultural society new technologies to work globalization to marginalization anthropology has a vital contribution to make While showcasing the intellectual power of the discipline Eriksen takes the anthropological community to task for its unwillingness to engage more proactively with the media in a wide range of current debates If anthropology matters as a key tool with which to understand modern society beyond the ivory towers of academia why are so few anthropologists willing to come forward in times of national or global crisis Eriksen argues that anthropology needs to rediscover the art of narrative and abandon arid analysis and more provocatively anthropologists need to lose their fear of plunging into the vexed issues modern societies present Engaging Anthropology makes an impassioned plea for positioning anthropology as the universal intellectual discipline Eriksen has provided the wake up call we were all awaiting

Heidegger in the Twenty-First Century Tziovani Georgakis, Paul J. Ennis, 2015-03-02 The current volume is comparative and inter disciplinary and it provides a reflection on what thinking might become after Heidegger s philosophy Its aim is to critically expand the current field of research by presenting unfamiliar and uncharted

avenues that will guide and carry the Heidegger scholarship into the twenty first century By doing so it addresses fundamental questions in the Heideggerian scholarship including its problems restraints and future direction It also engages and broadens the increasingly disparate approaches to Heidegger s work whether those approaches are traditional in their employment of phenomenology and hermeneutics or whether they apply to Heidegger s thinking in new and surprising ways The first section of the volume emphasizes the importance of methodology for the future of Heidegger studies while the second section examines the historical ethical and vocal poetical in Heidegger s thought and draws conclusions relevant to the Heidegger scholar of today The final section demonstrates Heidegger s appeal to a variety of other discourses besides philosophy and the way his thinking could be creatively approached utilized and implemented in our century Contributions come from cutting edge scholars such as Babette E Babich Dermot Moran Fran ois Raffoul and Trish Glazebrook

Biblical and Theological Foundation of the Family Joseph C. Atkinson, 2014 This ground breaking work establishes a solid biblical and theological foundation on which a theology of the family can be constructed It thus fills a critical lack in the current literature on the family The wide range of sources including Jewish Catholic Orthodox and Protestant give this work a genuine ecumenical dimension Biblical and Theological Foundations of the Family will become indispensable for anyone wanting to engage in serious study of the structure and meaning of the family and its place in the salvific will of God

Does Christianity Teach Male Headship? David Blankenhorn, Don S. Browning, Mary Stewart Van Leeuwen, 2004 The question of male headship has remained a vexing and often divisive issue in contemporary Christian thought This insightful volume brings together both sides of the debate proponents of the concept of an equal regard marriage as well as dissenting voices who advocate male leadership within the family and often consequently within the church With contributions from Mary Stewart Van Leeuwen Carolyn Osiek W Robert Godfrey Don Browning and Mary Gallagher the essays provide thoughtful commentary and critique substantively engaging other opinions and contrasting views in a charitable manner

Current Catalog National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70 Jacques Lacan (Volume II) (RLE: Lacan) Michael Clark, 2014-01-23 This bibliography in two volumes originally published in 1988 lists and describes works by and about Jacques Lacan published in French English and seven other languages including Japanese and Russian It incorporates and corrects where necessary all information from earlier published bibliographies of Lacan s work Also included as background works are books and essays that discuss Lacan in the course of a more general study as well as all relevant items in various bibliographic sources from many fields The Case for Animal Experimentation Michael Allen Fox, 1986-01-01 Discusses animal rights and the morality of animal experiments suggests ethical guidelines for the use of animals as test subjects and identifies irrational attitudes towards animals

The Neurodynamic Soul Grant Gillett, Walter Glannon, 2023-12-19 This book is an analysis and discussion of the soul as a psychophysical process and its role in mental representation meaning understanding and agency Grant Gillett and Walter Glannon combine contemporary

neuroscience and philosophy to address fundamental issues about human existence and living and acting in the world Based in part on Aristotle s hylomorphism and model of the psyche their approach is informed by a neuroscientific model of the brain as a dynamic organ in which patterns of neural oscillation and synchronization are shaped by biological social and cultural factors inside and outside of it The authors provide a richer and more robust account of the soul or mind than other accounts by framing it in neuroscientific and philosophical terms that do not explain it away but explain it as something that is shaped by how it responds to the natural and social environment in enabling flexible and adaptive behavior *Radical Psychoanalysis* Barnaby B. Barratt, 2016-05-20 2020 American Board Academy of Psychoanalysis ABAPsa book award winner Only by the method of free association could Sigmund Freud have demonstrated how human consciousness is formed by the repression of thoughts and feelings that we consider dangerous Yet today most therapists ignore this truth about our psychic life This book offers a critique of the many brands of contemporary psychoanalysis and psychotherapy that have forgotten Freud s revolutionary discovery Barnaby B Barratt offers a fresh and compelling vision of the structure and function of the human psyche building on the pioneering work of theorists such as Andr Green and Jean Laplanche as well as contemporary deconstruction feminism and liberation philosophy He explores how drive or desire operates dynamically between our biological body and our mental representations of ourselves of others and of the world we inhabit This dynamic vision not only demonstrates how the only authentic freedom from our internal imprisonments comes through free associative praxis it also shows the extent to which other models of psychoanalysis such as ego psychology object relations self psychology and interpersonal relations tend to stray disastrously from Freud s original and revolutionary insights This is a vision that understands the central issues that imprison our psychic lives the way in which the reflections of consciousness are based on the repression of our innermost desires the way in which our erotic vitality is so often repudiated and the way in which our socialization oppressively stifles our human spirit *Radical Psychoanalysis* restores to the discipline of psychoanalysis the revolutionary impetus that has so often been lost It will be essential reading for psychoanalysts psychoanalytic psychotherapists mental health practitioners and students and academics with an interest in the history of psychoanalysis

Feminism and Families Hilde Lindemann Nelson, 2016-02-04 A ground breaking volume of all new essays covering the conjunction of two topics feminism and families that for all their centrality in our culture have not been adequately examined in light of one another While the family has suffered feminist neglect most women are in fact members of families living their lives within the social context of families even at a time when the concept of family has become bewilderingly unstable The intersection of families and feminism is thus one in need of philosophical reflection as a basis both for good public policy and for the ethical relationships of intimate life *Language in Cognitive Development* Katherine Nelson, 1998-03-13 This book discusses the role of language as a cognitive and communicative tool in a child s early development **Marriage** William May, 2009-10-16 Is marriage the foundation of family life Many people today would say No Others would say Yes but they

would define family and marriage in ways at odds with how the words have been used almost throughout human history In this revised and expanded edition of *Marriage The Rock on Which the Family is Built* internationally renowned theologian William E May makes the case for marriage s foundational role for family with marriage defined as the union of one man and one woman Drawing on Pope John Paul II s theology of the body he explains the person affirming love enabling life giving and sanctifying nature of marriage He shows how marriage is necessarily a complementary union of man and woman and how this rules out the idea of same sex marriage May argues drawing on Popes Paul VI John Paul II and Benedict XVI that marriage fully respects the equal dignity of husband and wife as persons while recognizing their unique exclusive enduring complementary contributions to their union Likewise he shows how marriage honors the truth that each new human life brought about by sexual union is a person equal in dignity to his mother and father What s more both reason and revelation are used to show that only the family founded on marriage as an enduring mutually exclusive union of one man and one woman provides the proper context for begetting and raising children Reproductive technologies are also critically examined and the author argues that human beings ought to be begotten in an act of spousal love not made through in vitro fertilization Furthermore the role of the family as the domestic church a community of holiness is explored This expanded edition includes new chapters *Man and Woman He Created Them* Pope John Paul II s Catechesis on Human Sexuality and Pope Benedict XVI and *Marriage* the latter summarizing Benedict s thought on marriage particularly as found in his first encyclical *Deus Caritas Est* Also included is Pope John Paul II s Letter to Families

Affective Neuroscience Jaak Panksepp, 2004-09-30 Some investigators have argued that emotions especially animal emotions are illusory concepts outside the realm of scientific inquiry However with advances in neurobiology and neuroscience researchers are demonstrating that this position is wrong as they move closer to a lasting understanding of the biology and psychology of emotion In *Affective Neuroscience* Jaak Panksepp provides the most up to date information about the brain operating systems that organize the fundamental emotional tendencies of all mammals Presenting complex material in a readable manner the book offers a comprehensive summary of the fundamental neural sources of human and animal feelings as well as a conceptual framework for studying emotional systems of the brain Panksepp approaches emotions from the perspective of basic emotion theory but does not fail to address the complex issues raised by constructionist approaches These issues include relations to human consciousness and the psychiatric implications of this knowledge The book includes chapters on sleep and arousal pleasure and fear systems the sources of rage and anger and the neural control of sexuality as well as the more subtle emotions related to maternal care social loss and playfulness Representing a synthetic integration of vast amounts of neurobehavioral knowledge including relevant neuroanatomy neurophysiology and neurochemistry this book will be one of the most important contributions to understanding the biology of emotions since Darwins *The Expression of the Emotions in Man and Animals*

What Is Psychoanalysis? Barnaby B Barratt, 2013-05-20 2020 American Board Academy of Psychoanalysis ABAPsa book

award winner In a radically powerful interpretation of the human condition this book redefines the discipline of psychoanalysis by examining its fundamental assumptions about the unconscious mind the nature of personal history our sexualities and the significance of the Oedipus Complex With striking originality Barratt explains the psychoanalytic way of exploring our inner realities and criticizes many of the schools of psychoanalytic psychotherapy that emerged and prospered during the 20th century In 1912 Sigmund Freud formed a Secret Committee charged with the task of protecting and advancing his discoveries In this book Barratt argues both that this was a major mistake making the discipline more like a religious organization than a science and that this continues to infuse psychoanalytic institutes today What is Psychoanalysis takes each of the four fundamental concepts that Freud himself said were the cornerstones of his science of healing and offers a fresh and detailed re examination of their contemporary importance Barratt s analysis demonstrates how the profound work as well as the playfulness of psychoanalysis provides us with a critique of the ideologies that support oppression and exploitation on the social level It will be of interest to advanced students of clinical psychology or philosophy as well as psychoanalysts and psychotherapists
