

THE MAN WHO OWNED NEW YORK

An illustration of a tall, dark skyscraper, likely the Empire State Building, rising from a green grassy hill. The base of the building is surrounded by a row of trees with orange and yellow foliage, suggesting autumn. The hill is decorated with small red flowers.

Man Who Owned New York:

An International Psychology of Men Chris Blazina, David S. Shen-Miller, 2011-01-19 This text is the first to provide a contextual understanding of the clinical issues that affect men and masculinity across a wide range of cultural and national settings. It demonstrates that gender can no longer be viewed as an isolated characteristic in an era of increased globalization. Mental health professionals need to take ethnic and cultural issues into account to provide adequate care for male patients. Numerous international perspectives are offered by the contributing authors, authorities from countries such as Australia, Argentina, Denmark, Canada, India, Ireland, and South Africa, on theoretical and clinical innovations for working with men. Their chapters also offer insight into the socio-cultural contexts for counseling men in and from their respective countries by exploring the ways in which being a man is socially defined, what unique challenges men face, and how these challenges can be negotiated within their specific cultural settings. Topics addressed will include boyhood, notions of manhood, relationship concerns, and power, fatherhood, and men's body image across the life span. This text will ultimately enable mental health practitioners to have a better understanding of how to work more effectively with male clients. **A**

Lab of One's Own Rita Colwell, Sharon Bertsch McGrayne, 2021-08-17 Colwell, the first female director of the National Science Foundation, discusses the entrenched sexism in science, the elaborate detours women have taken to bypass the problem, and how to fix the system. When she first applied for a graduate fellowship in bacteriology, she was told, "We don't waste fellowships on women." Over her six decades in science, as she encounters other women pushing back against the status quo, Colwell also witnessed the advances that could be made when men and women worked together. Here she offers an astute diagnosis of how to fix the problem of sexism in science and a celebration of the women pushing back. *Annual Report of the United States Life-Saving Service*, United States Life-Saving Service, 1905 *New York Magazine*, 1981-11-02

In this story, which is a sequel to *The Millennium Conspiracy*, Paul Cane is one of only a few survivors from a plane that is blown up by a terrorist bomb over the River Thames. Al Qaeda is suspected of being responsible, but intelligence reports received by the CIA and MI6 after the event indicate that a Russian terrorist group could be to blame. After recovering from his injuries, Paul Cane vows retribution for the death of his wife and the other aircraft passengers. The covert search by MI6 and the US Counter Terrorist Unit for those responsible uncovers a web of criminal and political conspiracy which leads to murder and further acts of terrorism. It also reveals an al Qaeda plan which eventually results in devastating attacks on US buildings that

with the federal evacuation of the fort and ended with the arrival of the New York Seventh Militia Regiment in Washington were critically important. The nation's capital never again came so close to being captured by the Confederates. Tony Silber's riveting account starts on April 14, 1861, with President Lincoln's call for seventy-five thousand militia troops. Washington, a Southern slaveholding city, was the focal point; both sides expected the first clash to occur there. The capital was barely defended by about two thousand local militia troops of dubious training and loyalty. In Charleston, less than two days away by train, the Confederates had an organized army that was much larger and ready to fight. Maryland's eastern sections were already reeling in violent insurrection, and within days Virginia would secede. For half of the twelve days after Fort Sumter, Washington was severed from the North: the telegraph lines cut and the rail lines impassable, sabotaged by secessionist police and militia members. There was no cavalry coming. The United States had a tiny standing army at the time, most of it scattered west of the Mississippi. The federal government's only defense would be state militias. But in state after state, the militia system was in tatters. Southern leaders urged an assault on Washington. A Confederate success in capturing Washington would have changed the course of the Civil War. It likely would have assured the secession of Maryland. It might have resulted in England's recognition of the Confederacy. It would have demoralized the North. Fortunately, none of this happened. Instead, Lincoln emerged as the master of his cabinet, a communications genius and a strategic giant who possessed a crystal-clear core objective and a powerful commitment to see it through. Told in real time, *Twelve Days* alternates between the four main scenes of action: Washington insurrectionist Maryland, the advance of Northern troops, and the Confederate planning and military movements. *Twelve Days* tells for the first time the entire harrowing story of the first days of the Civil War.
