When Germany invaded the Soviet Union in the summer of 1941 Stalin requested help from the Western Allies The result was the Arctic Convoys the opening of a sea route from Britain to Northern Russia used to supply the Soviets with vitally needed war materials This route passed close to German occupied Norway and so in January 1942 the newly completed battleship Tirpitz sister of the Bismarck was sent there to form the core of the naval force stationed in Northern Norway to intercept these convoys For more than two years Tirpitz remained a latent threat to the Allies and despite fuel shortages her occasional sorties posed a grave threat to Allied shipping So the sinking of the battleship became a major priority for the British The fjords where she lurked were strongly defended rendering naval attack virtually impossible So unless she could be caught at sea she had to be destroyed by other means In the spring of 1942 the Royal Air Force launched three heavy bombing raids on the battleship s anchorage but no hits were scored The following autumn she was damaged during a midget submarine attack and moved to a more secure anchorage A lack of bombers caused a hiatus in these air attacks but they were resumed in 1944 by which time the Fleet Air Arm had the resources to join in the air campaign The most sustained of these naval air operations was Operation Goodwood but like the others its results were disappointing It was now clear that only heavy bombers dropping especially heavy bombs could do the job So that autumn the RAF launched the first of three large scale attacks using Lancaster bombers armed with enormous Tallboy bombs In the first codenamed Operation Parvane the Tirpitz was badly damaged In the third air attack carried out in November 1944 the battleship was hit three times and she capsized and sank taking most of her crew down with her Her passing broke German naval power in Arctic waters which in turn allowed the Allies to divert their naval resources to the Pacific where the ocean wide campaign was reaching its climax The air campaign against the Tirpitz was one of vital strategic importance and while low key compared to air operations over mainland Europe it was one where a single bomb could dramatically influence the course of the war These British airmen faced tough opposition from the weather terrain ground defences the Luftwaffe and from the well armed battleship herself which while rendering it tough for them make this a dramatic story of air power s triumph against the odds Technically the 1944 air campaign was a test bed for a new generation of super bomb The Tallboy designed by Barnes Wallis of Dambuster fame was a five ton seismic bomb capable of destroying the battleship when other more conventional ordnance had failed These ground breaking bombs were the forerunners of the devastating bunker busting weaponry of the post war era *Tirpitz in Norway* Angus Konstam,2019-11-28 In September 1943 under the cover of darkness six British midget submarines crept into the heart of enemy territory penetrating a heavily guarded Norwegian fjord in an attempt to eliminate the threat of the powerful German battleship the Tirpitz Numerous previous attempts to attack the ship from both air and sea had failed and this

mission was carefully strategized and undertaken by skilled operatives who had undergone extensive training in an isolated sea loch. Though five of the six X-Craft submarines were either lost or captured, two crews had just enough time to lay their explosive charges which detonated after they were forced to the surface, putting the Tirpitz out of action for a crucial six-month period. Masterminded from a top-secret naval headquarters on the east coast of Scotland, Operation Source has been memorialised as one of the most daring naval raids of World War II. This new study tells the complete story of this epic operation in unparalleled detail, supported by full-colour illustrations and contemporary photography.

Arctic Convoys David Kenyon, 2023-01-01. An incisive account of the Arctic convoys and the essential role Bletchley Park and Special Intelligence played in Allied success. Between 1941 and 1945, more than eight hundred shiploads of supplies were delivered to the Soviet Union, protected by allied naval forces. Each journey was a battle against the elements: with turbulent seas, extreme cold, and the constant dread of torpedoes. These Arctic convoys have been mythologized as defenseless vessels at the mercy of deadly U-boats, but was this really the case? David Kenyon explores the story of the war in the Arctic, revealing that the contest was more evenly balanced than previously thought. Battles included major ship engagements, aircraft carriers, and combat between surface ships. Amid this wide range of forces, Bletchley Park's Naval Section played a decisive role in Arctic operations, with both sides relying heavily on Signals Intelligence to intercept and break each other's codes. Kenyon presents a vivid picture of the Arctic theater of war, unearthing the full-scale campaign for naval supremacy in northern waters.

From Yorkshire To Archangel: A Young Man's Journey To PQ.17 David Wherrett, 2017-05-16. David's father was a young man of seventeen when he joined the Merchant Navy in the early spring of 1939. He may well have been imagining a new life of excitement and long voyages overseas to faraway places. Within six months of him beginning work as a bellboy on the grand P and then, of course, there was that Arctic convoy PQ 17. He was very fortunate to serve on one of the few vessels to make it safely back home: the little rescue ship *Zamalek*. Accounts of *Zamalek*'s experiences on that Russian-bound convoy PQ 17, time spent stranded in Archangel, and the return passage QP 14 are a central feature of the story, and so they should be.

War at Sea Nathan Miller, 1997-01-30. From the sinking of the British passenger liner *Athenia* on September 3, 1939, by a German U-boat, against orders, to the Japanese surrender on board the *Missouri* on September 2, 1945, *War at Sea* covers every major naval battle of World War II. A first-rate work and the best history of its kind yet written. Vice Admiral William P. Mack, USN Ret. 30 photos.

Sacrifice for Stalin David Wragg, 2006-03-19. Operation BARBAROSSA, the German invasion of the Soviet Union in 1941, was a turning point, second only to Pearl Harbor. Russia became an ally overnight, but a most difficult, dangerous, and demanding one. Stalin desperately needed oil, equipment, and modern technology, but the only practical route was round the North Cape to the ports of Archangel and Murmansk. The dual enemies of the vulnerable merchantmen were the German naval and air forces and the weather. While no one questioned that the Russians needed assistance, the author finds evidence that the supplies that did get

through the gauntlet at great cost were all too often not put to good use Elsewhere the Allies were having to make do with old and insufficient equipment such as aircraft He finds that little mention is made of the impact of British and American weapons and material by Soviet reports Yet at the same time there is evidence that Allied supplies may have made it possible for the Soviets to occupy central and Eastern Europe and so dominate those countries for half a century of the Cold War

Royal Navy Handbook 1939-1945 David Wragg, 2005-08-25 Overstretched from the start of the Second World War in 1939 the Royal Navy acquired First World War surplus destroyers from the United States Navy and embarked on a massive programme of construction building and buying aircraft carriers escort carriers and frigates and corvettes building up a powerful submarine arm and almost from scratch re creating the naval air arm taken from it in 1918 The service had to learn fast It soon became clear that the Germans would not provide an opportunity for a major battleship to battleship fleet action along the lines of Jutland but that submarine warfare and surface raiders were to be just as effective at undermining the British war effort The Royal Navy was expected to be active in the North Atlantic and in British waters and then after the Soviet Union was invaded by Germany it had to protect the Arctic convoys Meanwhile it also had to keep control of the Mediterranean alone after the fall of France supporting ground forces in North Africa and then in Greece send convoys to Malta and disrupt the Axis supply lines both in the Mediterranean and off the coast of Norway and then it had to face the Japanese in the Far East By the war's end the Royal Navy had grown from its pre war strength of 129 000 to 863 000 men Its fleet had also grown from 12 to 61 battleships and cruisers seven to 59 aircraft carriers and 100 to 846 destroyers by 1945
