Manage or Perish? José Guimón, Norman Sartorius, 2012-12-06 Adapt or perish now as ever is Nature's inexorable imperative H G Wells *Mind at the End of Its Tether* 1946 Doctors are trained to treat people suffering from various diseases This is the main form of their activity and usually the reason for which they selected medicine as their profession The notion that they should become managers and engage in activities such as programming calculating cost assessing cost benefit ratios and thinking about pricing in accordance with the social utility of their intervention is both foreign and abhorrent to them They are sometimes willing to say how much they need in order to have a well functioning service usually they prefer to state what specific apparatus and other things they require without specifying the price of their demand They can be persuaded to add a price tag to what they think is necessary for their work but that was about as far as they would go until recently The growing emphasis on human rights over the past few decades the greater emphasis on quality of life and the public's heightened expectations about their health led in many industrialized countries to a greater demand for health services This combined with improved possibilities of diagnosis and treatment at higher cost led to a significant increase in financial demands which made governments and health care systems uneasy and ready to accept any solution that would stop the spiral of seemingly endless cost augmentation

Casebook of the Brief Psychotherapies Richard A. Wells, Vincent J. Giannetti, 2013-11-11 Following the publication of the *Handbook of the Brief Psychotherapies* Wells Giannetti 1990 the editors began to conceptualize the idea of a collection of case studies encompassing a number of the commonly encountered clinical problems that have been treated with such approaches The *Casebook of the Brief Psychotherapies* is the result The Casebook details clinical interventions with client populations as diverse as substance abusers torture victims the physically handicapped and other exceptional groups and the economically disadvantaged with emotional and behavioral problems as

well as individuals experiencing sexual dysfunction or eating disorders. In addition, topics such as bereavement, depression, anger, and many crucial aspects of marital and family therapy are discussed by eminent clinical practitioners. Although the cases draw heavily upon cognitive behavioral and strategic structural formulations, psychodynamic, interpersonal, and experiential approaches are also included. The Casebook is clinically oriented with a minimum of theory. Ample case material and commentary allow the reader to experience directly the application of brief therapy to specific client problems. What emerges from this compendium of approaches and problems is a tapestry of action-oriented problem-solving skill building, rational approaches to therapy that balance the client's ability to change with the demands and limits of time.

Social Work with Children and Their Families Christopher G. Petr, 2004 An extensively revised version of the first edition, this text focuses on the practical, foundational knowledge required to practice social work effectively in the complex and fast-changing world of services to children and their families. The core organizing framework consists of eight pragmatic perspectives: combating adultcentrism, family-centered practice, the strengths perspective, respect for diversity and difference, the least restrictive alternative, ecological perspective, organization and financing, and achieving outcomes. Unlike most texts that focus either on direct practice or on policy, Petr's revised volume integrates current policy, including recent reform efforts, with best practices. The student thus gains a deep appreciation for how direct social work practice is linked to and even guided by contemporary policy initiatives and the values that underscore those initiatives. Two new chapters are devoted specifically to the fields of child welfare and children's mental health, providing an overview of the laws, policies, practices, and terminology pertaining to each setting. The next eight chapters focus on each pragmatic perspective and its relevance to child welfare and children's mental health. The in-depth case studies that comprise the concluding two chapters illustrate how typical client situations can be successfully addressed within the context of the pragmatic perspectives. Packed with case studies, specific practice instruction, chapter summaries, and suggested learning activities, this book prepares students and practitioners to think and act professionally in ways that are consistent with current laws, values, policies, and reform efforts in the field.
