Management Knowledge A Critical View:

Management Knowledge Paul Griseri, 2017-04-17 This book fills the gap for a text which presents a theoretically based critique of management knowledge but in an accessible form which is relevant to MBA students and practitioners alike. Students have to learn and digest accepted management knowledge and practitioners look to gurus as a source of management knowledge without any appreciation of how secure these ideas may be. This book will therefore be relevant to both students and practitioners in questioning how far management research actually leads to genuine knowledge of organizations.

The Foundations of Management Knowledge Paul Jeffcutt, 2008-01-28 This volume brings together a group of leading academics from Europe, North America and Australasia to address the nature and management knowledge in relation to rapidly changing arenas of theory and practice.

The Politics of Management Knowledge in Times of Austerity Ewan Ferlie, Sue Dopson, Chris Bennett, Michael Fischer, Jean Ledger, Gerry McGivern, 2018 The book explores the various management knowledges and associated texts apparent in English health care organizations reflecting on the nature, production and consumption of management knowledge and the influence of political economy and changing institutional forms during the period of the politics of austerity.

Management Consulting Matthias Kipping,Lars Engwall,2002-06-20 This volume makes an important contribution to the growing literature on management consulting It brings together international contributors from a wide variety of backgrounds and draws on recent empirical research from a diverse range of countries consultancy firms and client companies The analysis focuses on three key areas The first part of the book looks at the emergence and development of the consulting industry in different countries and time periods The interplay between national systemic context and outside influences is stressed and the efforts of consultants to become recognized as legitimate knowledge carriers by their clients is highlighted in competition and sometimes cooperation with other suppliers of management knowledge notably academia The volume goes on to consider the generation management and validation of consulting knowledge by consultancy organizations and management gurus showing how these activities are influenced not only by the consultancies own characteristics in terms of size structure and national origin but also by the national and cultural context in which they are operating and by the role of gatekeepers such as book publishers or journalists The third part of the book focuses on the nature and dynamics of the consultancy client relationship focusing especially on the ways in which consultants convince managers of the need to hire outside advisors on the reaction of those concerned in the client organization towards the consultants recommendations and on the methods used by the consultants to overcome the possible reluctance and resistance from within the organization

From a more theoretical point of view the chapters in this volume also show that research on management consulting has to take into account different levels of analysis the consulting industry as a whole and its position relative to other knowledge providers such as academia the specific consultancy organization and its relationships with internal and external sources of knowledge and the particular consultancy project and notably the interplay between the consultants and the various stakeholders within and outside the client organization
