Management Of Animal Waste Environmental Health Problems And Technological Solutions:

Management of Animal Waste Amer El-Ahraf, William V. Willis, 1996-03-14 Animal agriculture is a major industry in the United States and around the world Like all major industries animal operations generate a significant amount of waste by products by products which represent serious potential environmental pollutants This work is an attempt to help those concerned with animal waste management agricultural economists and policy makers environmental and public health officers farmers and so on deal with this critical issue by addressing the problems generated by animal waste within a comprehensive management approach As animal production worldwide has taken on the characteristics of an industrial operation the implications of large quantities of waste disposal and or refuse must be analyzed in environmental economic and public health terms This work provides such an analysis
