**Management of Orbital and Ocular Adnexal Tumors and Inflammations** Joseph A., Jr. Mauriello, Joseph C. Flanagan, 2013-06-29 This book is designed to provide the busy ophthalmologist with a practical guide to the management of lacrimal gland tumors and inflammation and of lid and ocular adnexal disease. The book encompasses lid tumors and inflammations, passes more than tumors simply because other inflammatory conditions may mimic tumors in their step by step approach to patients with lid and orbital presentation and vice versa. It is not meant to be an encyclopedic definitive work on a single subject organized around individual disease entities; instead, it approaches the patient much as a clinician does. It concentrates on the patient and considers various disease processes logically. Work up differential. We wish to thank all the referring doctors whose diagnosis and initial treatment are discussed have allowed us to treat their patients with orbital disease. When any patient presents with an orbital or an ocular adnexal disease and without whom a book of this type would have been impossible. We answered is whether the process is due to inflammation also would like to give special thanks to our teachers Dr Lorenz E Zimmerman and Dr Byron Smith.
