*The Reinvention of Britain 1960-2016* Scott Newton, 2017-08-25 The Reinvention of Britain 1960 2016 explores the transformation of contemporary Britain tracing its evolution from the welfare state of the post 1945 era to social democracy in the 1960s and 1970s and the liberal market society of 1979 onwards Focusing primarily on political and economic change it aims to identify which elements of State policy led to the crucial strategy changes that shaped British history over the past six decades This book argues that since 1960 there have been two reinventions of the political economy of the United Kingdom a social democratic shift initiated by the Conservative government of Harold Macmillan and developed by Labour under Harold Wilson and a subsequent change of direction towards a free market model attempted by the Conservatives under Margaret Thatcher Structured around these two key policy reinventions of the late twentieth century chapters are organized chronologically from the development of social democracy in the early 1960s to the coalition government of the early 2010s the Conservative election win that followed and the Brexit referendum of 2016 Providing a comprehensive yet accessible introduction to the political and economic history of this period The Reinvention of Britain 1960 2016 is essential reading for all students of contemporary British history *Consistency and Viability of Capitalist Economic Systems* J. **The Economic Government of the World** Martin Daunton, 2023-11-14 Foreign Affairs Best Books of the Year 2023 An epic history of the people and institutions that have built the global economy since the Great Depression In this vivid landmark history the distinguished economic historian Martin Daunton pulls back the curtain on the institutions and individuals who have created and managed the global economy over the last ninety years revealing how and why one economic order breaks down and another is built During the Great Depression trade and currency warfare led to the rise of economic nationalism a retreat from globalization that culminated in war From World War II came a new liberal economic order Squarely reflecting the interests of the West in the

Cold War liberalism faced collapse in the 1970s and was succeeded by neoliberalism financialization and hyper globalization Now as leading nations are tackling the fallout from Covid 19 and threats of inflation food insecurity and climate change Daunton calls for a return to a more just and equitable form of globalization Western imperial powers have overwhelmingly determined the structures of world economic government often advancing their own self interests and leading to ruinous resource extraction debt poverty and political and social instability in the Global South He argues that while our current economic system is built upon the politics of and between the world s biggest economies a future of global recovery and the reduction of economic inequality requires the development of multilateral institutions Dramatic and revelatory The Economic Government of the World offers a powerful analysis of the origins of our current global crises and a path toward a fairer international order

**Power and Political Economy from Thatcher to Blair** Robert Ledger,2021-03-04 This book investigates the policies of the Thatcher Major and Blair governments and their approaches towards concentration of economic and political power The 1979 2007 British governments have variously been described as liberal or to use a political insult and a favourite academic label neoliberal One of the stated objectives of the Thatcher Major and Blair governments albeit with differing focal points was to disperse power and to empower the individual This was also a consistent theme of the first generation of neoliberals who saw monopolies vested interests and concentration more generally as the great enemy of democracy Under Thatcher and Major Conservatives sought to liberalize the economy and spread ownership through policies like Right to Buy and privatisation New Labour dispersed political power with its devolution agenda granted operational independence to the Bank of England and put in place a seemingly robust antitrust framework All governments during the 1979 2007 period pursued choice in public services Yet our modern discourse characterises Britain as beset by endemic power concentration in markets and politics What went wrong How did so called neoliberal governments which invoked liberty and empowerment fail to disperse power and allow concentration to continue recur or arise The book will be of interest to students and scholars of
