Management Principles P. J. Smit, 2007 Book CD To improve on an award winning book poses a major challenge to its authors The authors of this book took the challenge head on by conducting a major research study to determine what exactly the outcomes are that managers at different levels must deliver in contemporary organisations in South Africa and the rest of Africa The findings of this study which dealt with current and near future management issues as well as classical and contemporary thinking about management were used as the blueprint for the updating of this book After placing management in context the authors deal with the knowledge skills and dispositions required of managers to perform the management functions of planning organising leading and controlling in a volatile business world Examples of how the functions are applied in practice are cited throughout the book These examples refer mainly to South African organisations and situations that managers in South Africa and Africa have to deal with to create and sustain a competitive advantage for their organisations The book endeavours to break down the silo effect of seeing the management functions as separate activities This is done by continuously placing the management function at hand in a bigger context This enables learners of management to assess the implications of management decisions on different people processes systems and so on that make up the organisation

Sustainable Value Management-New Concepts and Contemporary Trends Dariusz Zarzecki, Marek Jabłoński, 2020-12-29 Sustainable value management reveals a new space for studying business models The traditional approach is based on the assumption that the goal of any business is to make money All decisions regarding supply and production should be made to maximize profit The discrepancy in creating non economic value is sometimes the result of separating ownership from control over an enterprise Although shareholders are interested in maximizing profit

management that actually makes decisions can also pursue other goals. In addition to economic aspects, the management intentions of modern managers are also influenced by factors arising from the organizational culture built co-created within the organization and sometimes with the participation of external actors such as suppliers and customers. The sources of the creation of social values will be the management intentions of top management, often initiated by the adopted values and rules on the basis of which resources are bound within the structure of the business model. The value of sustainability is based on the identification of those creative sources that relate to economic and social value. Economic value is created through social value and vice versa. This allows the complementarity of the value created to be mutually supportive. The business model that integrates both of these values should be more resistant to crises than the one that is oriented only toward producing economic value. Concurrent implementation of economic and social goals increases resilience and affects the success of modern business models. This is due to the specificity of the business ecosystem that is built as part of the business model, which in essence is based on the use of social factors to merge the business model into a complex ecosystem capable of producing value.

Human Resource Management - A Contemporary Text Bhaskar Chatterjee, The paradigm of employee management has undergone rapid transformation in the last decade from comparative advantage to a state of continuous innovation, strategic intent, and a holistic knowledge framework. This implies that to be successful, organisations have to develop and/or seriously re-look at appropriate HRD strategies to tap the human potential within the organisation and align it with the overall corporate strategy. In an increasingly difficult global business scenario where major decisions have gone awry, plunging the world into an economic crisis, HRD professionals are compelled to grapple with progressively more complex issues. It is against this backdrop that an attempt has been made to present the entire contemporary conceptual framework of human resource development in a refreshingly new style so as to facilitate devising of appropriate strategies for the organisation. Fortunately, there is a rich and growing base of theory, research, and practical experience in HRD efforts. This book has been written to help students, HRD professionals, and managers at all levels to take advantage of this. If they do so, they will increase their effectiveness along with that of individuals with whom they work and the organisations of which they are a part. The book will serve primarily as a comprehensive text for undergraduate and graduate courses in business management, public administration, educational administration, and other related fields. This the FOURTH edition of the book is a thoroughly revised and enlarged version that has been updated to reflect the thinking on HRD theory and practice that has taken place over the last few years. Some of the new features and improvements include: New contemporary case studies; Discussion of recent thinking about the nature of managerial work; strategic management development; global management development; competency-based management education and development; and new practices in leadership and executive development. Ideas, references, and

events updated right upto March 2009 Humorous cartoons clearer more explanatory diagrams At the same time care has been taken to maintain the elements that have made the previous editions a useful and meaningful resource to students and practitioners including uncluttered writing a comprehensive approach to HRD a strong research base and a balance between theory research and practice
