Intelligent Policing Simon

Guilfoyle,2013-03-28 Policing is at a crossroads At a time of unprecedented cuts and increasing levels of demand the British police service like many others faces enormous challenges Under the most radical reforms the service has ever experienced its leadership is looking for new approaches that can maintain levels of service delivery and secure efficiency accountability and public confidence Recent history shows that applying private sector business models to the public sector often generates hidden costs and unintended consequences that damage productivity and morale In spite of this evidence reform programmes and prevailing management practices still seek to enforce approaches that have demonstrably failed In *Intelligent Policing* Simon Guilfoyle proposes a simple and elegant solution that refocuses organisational activity on the service user Drawing on his own experience as a police officer he uses a range of evidence to explore the possibilities that systems thinking offers He clearly outlines how a systems based approach can bring greater efficiency improved service delivery enhanced morale and reduced cost He shows that the practices and models proposed in the book can be implemented immediately and insists that senior police leaders and policy makers have an ideal opportunity to make lasting improvements today that will resonate throughout policing and leave a positive legacy for the future *Intelligent Policing* is a rich resource for those in the UK and around the world who care about delivering an effective policing service in the 21st Century It will also interest systems theorists for its practical approach to policing and inform academic debate in the fields of management and human behaviour

Management Lives David Knights,Hugh Willmott,1999-08-30 The authors bring a spark of vitality and life to an area that could be cynically viewed as a series of conflicting fads and fashions I would recommend anyone in the process of reviewing or designing an entrepreneurship development course to consider the benefits that this book would bring to the teaching process Entrepreneurship and Innovation Using fiction in the classroom as an approach to stimulating the study of people in organizations is well established What this book contributes is a way of exploring some of the existential elements of life in organizations which are typically difficult to study It will be on my reading lists Hopefully this example and regrettably few others which exist will contribute in the long term to the reformulation of how the lived experience of organizational life may be explored in the classroom Leadership consumption and bureaucracy rational choice and meaning all through the medium of characters and situations in contemporary literature The clear theoretical framework supported by footnotes summaries and further reading guides makes this an introduction to management the student will find useful as well as enjoyable

Fashion and Utopia in Management Thinking René ten Bos,2000-09-15 Why is it that people in organizations seem to be so vulnerable to management fashion and guruism And why is it that both phenomena are loathed in traditional academic thinking about management and organization In this book Ren ten Bos argues for a more philosophical rather than scientific understanding of management fashion In doing so he questions the positivist and utopian orthodoxies that have pervaded management thinking Ten Bos contends that management fashion is a cultural phenomenon that deserves serious reflection not only because it is so immensely widespread but also because its seems to satisfy

particular philosophical needs among its consumers Building upon some rather unusual sources in postmodern theory the author argues that management fashion might encourage the practitioner to engage in philosophical self experimentation and to adopt alternative forms of understanding However it is also argued that management fashion often fails to keep up to this promise because it remains paradoxically incapable of laying off its rationalist cloak Ren ten Bos is a philosopher and management consultant He works for Schouten Nelissen and took his PhD at the Catholic University of Brabant
