Management Consulting Emergence And Dynamics Of A Knowledge Industry:

Management Consulting Matthias Kipping, Lars Engwall, 2002-06-20 This volume makes an important contribution to the growing literature on management consulting. It brings together international contributors from a wide variety of backgrounds and draws on recent empirical research from a diverse range of countries, consultancy firms and client companies. The analysis focuses on three key areas. The first part of the book looks at the emergence and development of the consulting industry in different countries and time periods. The interplay between national systemic context and outside influences is stressed and the efforts of consultants to become recognized as legitimate knowledge carriers by their clients is highlighted in competition and sometimes cooperation with other suppliers of management knowledge, notably academia. The volume goes on to consider the generation, management and validation of consulting knowledge by consultancy organizations and management gurus, showing how these activities are influenced not only by the consultancies' own characteristics in terms of size, structure and national origin but also by the national and cultural context in which they are operating and by the role of gatekeepers such as book publishers or journalists. The third part of the book focuses on the nature and dynamics of the consultancy-client relationship, focusing especially on the ways in which consultants convince managers of the need to hire outside advisors, on the reaction of those concerned in the client organization towards the consultants' recommendations and on the methods used by the consultants to overcome the possible reluctance and resistance from within the organization. From a more theoretical point of view, the chapters in this volume also show that research on management consulting has to take into account different levels of analysis: the consulting industry as a whole and its position relative to other knowledge providers such as academia; the specific consultancy organization and its relationships with internal and external sources of knowledge; and the particular consultancy project and notably the interplay between the consultants and the various stakeholders within and outside the client organization.

The Oxford Handbook of Management Consulting Matthias Kipping, Timothy Clark, 2012-03-29 Management consultants of various kinds play an important role in the world of business and within other types of organization. The Oxford Handbook on Management Consulting is a comprehensive overview of thinking and research on management consultancy, with contributions from leading international scholars. The first section provides an account of the historical developments in management consulting research and how current thinking has evolved from prior work. The second section focuses on disciplinary and theoretical perspectives, their diversities, areas of synergy and parallel concerns. The following sections examine consulting as a knowledge business, consultants and management fashion, and the relationship between management consultants and their clients. The Handbook concludes with an assessment of areas of future research and debate. By bringing together a wide range of research and thinking on management consulting across different disciplines, sub-disciplines and conceptual approaches, the Handbook provides a comprehensive understanding of both current thinking and future directions for research.

Trade and Capital Flow among Asian

Economies Chris Rowley, 2013-10-18 Trade and capital are important in the Asia region Trade in the APEC region has been increasing but the large rise in China's exports has also been disturbing as it exhibits export substitution The first two papers conclude that every economy has gained in trade though some are more successful than others And that rise in export has a lot to do with a rise in foreign direct investments Macroeconomic stability is the pre condition to growth Empirical studies show that the lack of stability has encouraged capital to flee an economy Similarly a market oriented price driven and matured financial market provides an alternative source of funding The lesson in economic development is that success in economic growth requires both an externally friendly market environment as well as consistent and favourable internal policies

Management Consultancy Andrew Sturdy, 2009-03-26 Management consultants are typically seen as key mediators in the flow of management ideas And yet little is known about exactly what happens when they work together with clients behind closed doors in consulting projects Do they really innovate or simply legitimate existing knowledge This book presents research from a three year long fly on the wall study of consulting projects and challenges our taken for granted view of consultancy It draws on and integrates theories of knowledge and social boundaries to reveal a picture of complex and shifting insider outsider relationships Here the outsider or expert status of consultants in relation to their clients cannot be assumed in their day to day project interactions Different actors roles and types of knowledge are involved in an interactive and dynamic process where various boundaries are constructed reinforced negotiated and transformed The chapters selectively explore these dynamics revealing the importance of boundary complexity the role of humour and challenge in often tense relationships and the importance of shared knowledge domains such as sector knowledge This in depth analysis of inter organizational project teams also covers a wide range of consultancy contexts drawing on cases studies which include a US based strategy firm and a multinational client the public and private sectors a sole practitioner consultant IT implementation in financial services The book is important for all those with an interest in management consultancy project working and management knowledge as well as in innovation change inter organisational relations boundaries and professional services The authors include some of the leading research experts on management consultancy as well as a former management consultant and current expert in management learning
