texts and by examining exceptional technologies such as imagined failed and impossible technologies that fall outside philosophy of technology's current focus this book offers a practical guide to thinking about and using continental philosophy and philosophy of technology It outlines and enacts three key characteristics of philosophy as practiced in the continental tradition close reading of the history of philosophy focus on critique and openness to other disciplinary fields Smith deploys the concept of exceptional technologies to provide a novel way of widening discussion in philosophy of technology navigating the relationship between philosophy of technology and Continental philosophy the history of both these fields the role of imagination in relation to technologies and the social function of technologies themselves **Early-Age and Long-Term**

**Long-Term Behaviour of Reinforced Self-Compacting Concrete Structures** Farhad Aslani, 2014-06-24 Volume is indexed by Thomson Reuters BCI WoS Self Compacting Concrete SCC refers to a highly flow able non segregating concrete that can be spread into place fill the formwork and encapsulate the reinforcement without the aid of any

mechanical consolidation SCC is regarded as one of the most promising developments in concrete technology due to significant advantages over Conventional Concrete CC. In this study, cracking caused by external loads in reinforced SCC and FRSCC slabs is examined experimentally and analytically. The mechanisms associated with the flexural cracking due to the combined effects of constant sustained service loads and shrinkage are observed. One of the primary objectives of this study is to develop analytical models that accurately predict the hardened mechanical properties of SCC and FRSCC. Subsequently, these models have been successfully applied to simulate time-dependent cracking of SCC and FRSCC one-way slabs. NDE in Relation to Structural Integrity for Nuclear and Pressurised Components Gyoujin Cho, 1999-03-12. The proceedings of a conference organised by the European Commission Joint Research Centre Institute of Advanced Materials. The conference was held in Amsterdam, the Netherlands, in October 1998 and covered all aspects of this highly important subject, including links between structural integrity requirements and NDE performance. The development of performance demonstration qualification for NDE systems and experience of their application in practice feature prominently. Development of improved NDE systems, new methods of NDE and methods for assessing NDE performance such as modelling are also included.
