Rosenberg, Roberto C. Izaurralde, 2013-03-09 Soil carbon sequestration can play a strategic role in controlling the increase of CO₂ in the atmosphere and thereby help mitigate climatic change There are scientific opportunities to increase the capacity of soils to store carbon and remove it from circulation for longer periods of time The vast areas of degraded and desertified lands throughout the world offer great potential for the sequestration of very large quantities of carbon If credits are to be bought and sold for carbon storage quick and inexpensive instruments and methods will be needed to monitor and verify that carbon is actually being added and maintained in soils Large scale soil carbon sequestration projects pose economic and social problems that need to be explored This book focuses on scientific and implementation issues that need to be addressed in order to advance the discipline of carbon sequestration from theory to reality The main issues discussed in the book are broad and cover aspects of basic science monitoring and implementation The opportunity to restore productivity of degraded lands through carbon sequestration is examined in detail This book will be of special interest to professionals in agronomy soil science and climatology *Soil Basics, Management and Rhizosphere Engineering for Sustainable Agriculture* Channarayappa C., D P Biradar, 2018-10-16 Increase in global population drastic changes in the environment soil degradation and decrease in quality and quantity of agricultural productivity warranted us to adapt sustainable farming practices This book focuses on soil health management and creating biased rhizosphere that can effectively augment the needs of sustainable agriculture [Guideline for Salinity Assessment, Mitigation and Adaptation Using Nuclear and Related Techniques](#) Mohammad Zaman, Shabbir A. Booklist Starred Review: Where does the environment leave off and society begin? When expanding production and

consumption drives greenhouse gas emissions that warm the planet which in turn influence the conditions of economic expansion it is unclear where the climate ends and the economy begins This fact is not new to our era however our social and natural sciences have only recently come to grips with the incredible complexity of the world described by understanding the environment and society as being of a piece As a result in the last decade there has been an unprecedented explosion of new concepts theories facts and techniques that follow from such an understanding The Encyclopedia of Environment and Society brings together multiplying issues concepts theories examples problems and policies with the goal of clearly explicating an emerging way of thinking about people and nature With more than 1 200 entries written by experts from incredibly diverse fields this innovative resource is a first step toward diving into the deep pool of emerging knowledge The five volumes of this Encyclopedia represent more than a catalogue of terms Rather they capture the spirit of the moment a fascinating time when global warming and genetic engineering represent only two of the most obvious examples of socio environmental issues Key Features Examines many new ideas about how the world works what creates the daunting problems of our time and how such issues might be addressed whether by regulation markets or new ethics Demonstrates how theories of environmental management based on market efficiency may not be easily reconciled with those that focus on population and both may certainly diverge from those centering on ethics justice or labor Offers contributions from experts in their fields of specialty including geographers political scientists chemists anthropologists medical practitioners development experts and sociologists among many others Explores the emerging socio environmental problems that we face in the next century as well as the shifting and expanding theoretical tools available for tackling these problems Covers regions of North America in greater detail but also provides a comprehensive picture that approaches as effectively as possible a cohesive global vision Key Themes Agriculture Animals Biology and Chemistry Climate Conservation and Ecology Countries Geography History Movements and Regulations Organizations People Politics Pollution Society Packed with essential and up to date information on the state of the global socio environment the Encyclopedia of Environment and Society is a time capsule of its historic moment and a record of where we stand at the start of the 21st century making it a must have resource for any library These inspiring volumes provide an opportunity for more new ways of thinking behaving and living in a more than human world

particular class Here five broader classes have been identified viz soils with climatic problems soils with physical problems soils with chemical problems soils with biological problems and soils with problems due to anthropogenic reasons Note Taylor and Francis does not sell or distribute the print editions of this title in India Pakistan Nepal Bhutan Bangladesh and Sri Lanka Field guide to monitor irrigation water quality in Lebanon Bashour, I., Pek, E., Simongini, C., Salman, M., 2022-03-25 Water resources are under tremendous pressure due to growing demand climate change and anthropogenic pollution in Lebanon Rapidly declining water quality is a key indicator of the water resource degradation that characterizes now both the freshwater and marine environment across the country The project Improved Water Resources Monitoring System Integrated Water Resources Management at regional level in Lebanon funded by the Swiss Government is designed to establish a comprehensive water monitoring system in the North of Lebanon with the overall objective to strengthen the capacity of Lebanon s water institutions and improving their performance at regional level thereby helping them address the sector challenges for sustainable use of water resources The term comprehensive monitoring system refers to the integrated information generation capturing quantity quality and demand of agricultural water as well as the climate parameters The project outcome is a timely contribution to the water sector development in Lebanon which is now encountering a period of unprecedented difficulties aggravated by the economic crisis *Restoration and Development of the Degraded Loess Plateau, China* Atsushi Tsunekawa, Guobin Liu, Norikazu Yamanaka, Sheng Du, 2013-08-23 This book presents state of the art scientific evidence and technological innovations to restore lands on the Loess Plateau of China known worldwide for its serious land degradation and desertification problems Supported by a rapidly developing Chinese economy and the dissemination of effective technology the Grain for Green Project and Western Development Action launched by the Chinese government have resulted in successful ecological restoration and protection over the past 30 years These programs have contributed not only to conservation of soil and water but also to economic development At the same time however these developmental interventions have brought new challenges that have not yet been fully addressed The book describes 1 case studies of success and failure in practice including rare success stories of combating desertification 2 technical issues such as erosion control and breeding of stress tolerant plant species and socioeconomic measures taken by the Chinese government and lending policies with support from the World Bank and 3 comprehensive measures against desertification such as water and wind erosion salinization and deforestation This volume is recommended for researchers and students above the undergraduate level in diverse fields including soil science rural engineering social technology and civil engineering biology ecology climatology physical and human geography and developmental economics among others It also serves as a valuable resource for engineers government officials and NPOs and NGOs involved in afforestation ecological restoration combating desertification disaster prevention and sustainable rural development
