Management Studies In An Academic Context:

Management Studies in an Academic Context Lars Engwall, Elving Gunnarsson, 1994 **Critical management studies in the South African context** Geoff A. Goldman, C.W. Callaghan, Gregory John Lee, Nthabiseng V. Moraka, Hester Nienaber, Shaun Ruggunan, Whitey (Tjaart Nicholaas) van der Linde, 2016-12-31 The purpose of this book is to establish the first formalised scholarly work on critical management studies CMS in the South African context The book is a collection of seven chapters six of which employ a conceptual methodology and one of which follows an interpretive paradigm employing qualitative methods of inquiry CMS is a relatively young school of thought arising in the early 1990s and still very much a peripheral movement within the academic discipline of management South Africa has very little scholarship on CMS as precious few scholars work in this space Furthermore publication opportunities are virtually non-existent as CMS is virtually unknown in the South African community of management scholars Thus this book represents the first academic work on CMS published in South Africa written and reviewed by scholars who are familiar with the field The primary target readership would be management academics but it could also be a useful reference for postgraduate students in management

Business Knowledge Jose Luis Alvarez, 2016-07-27 In the context of a united Europe the influence of business knowledge has become increasingly relevant as managers employees and organisations have to learn new practices and techniques in response to new knowledge and institutions This book addresses the way in which administrative knowledge is produced diffused and consumed in Europe by academics management gurus publishing houses consultants and practitioners It also looks at its impact on European business systems and management practices *Inside the "Knowledge Factory"* Heinke Röbbken, 2013-06-29 Higher education institutions have proven to be one of the most enduring organizations of the last

centuries In recent decades however significant changes in their institutional environment have forced universities to rethink their strategies This is particularly true for management higher education institutions How do universities and specifically business schools deal with these various expectations Are there different organizational responses in the American German or Swedish higher education systems These and other important questions of higher education management research are examined in this doctoral thesis Taking neo institutionalism theory as its basis the thesis is convincing both conceptually as well as empirically through its multiple case study design The insights gained are most interesting They reveal how a form of organizational schizophrenia can help institutions comply with external demands without compromising the pursuit of academic reputation which is essential for the inner stability of higher education institutions and their continued existence This book is relevant both for students and researchers in higher education management as well as management practitioners and administrators I can say this with conviction as Heinke Robken s doctoral thesis was one of the last that I supervised as a teacher before changing to the president s office of the University of Oldenburg As such I read it both from a theoretical viewpoint as well as that of a practitioner

Critical Management Studies Christopher Grey,Isabelle Huault,Véronique Perret,Laurent Taskin,2016-02-22 Critical Management Studies CMS is often dated from the publication of an edited volume bearing that name Alvesson and Willmott 1992 In the two decades that have followed CMS has been remarkably successful in establishing itself not just as a term but as a recognizable tradition or approach The emerging status of CMS as an overall

approach has been both encouraged and marked by a growing range of handbooks readers and textbooks Yet the literature is dominated by writings from the UK and Scandinavia in particular and the tendency is to treat this literature as constituting CMS However the meaning practice constraints and context of CMS vary considerably between different countries cultures and language communities This volume surveys fourteen various countries and regions where CMS has acquired some following and seeks to explore the different ways in which CMS is understood and the different contexts within which it operates as well as its possible future development
