Managerial Economics St Gd S G:

Business Strategy in a Semiglobal Economy Panos Mourdoukoutas, 2015-03-26 This groundbreaking text provides both theory and strategy for operating in a semiglobal economy in which international businesses must compete in highly globalized and highly localized markets at the same time Unlike the traditional transnational and matrix corporate models a semiglobal corporation organizes its operations according to the global local content of its value propositions rather than according to geographical regions products or contribution to the parent company s performance As an example of a semiglobal corporation the Honda Motor Company has a global vision when it comes to highly global bundles like car engines and a local vision when it comes to highly localized car financing and servicing Designed as a supplementary text for courses in international business development economics marketing and strategic planning Business Strategy in a Semiglobal Economy raises important challenges to the conventional models of business organization and the competitive strategies that proceed from them

The Politics of the Commercial Determinants of Health Eduardo Gomez, Angela Carriedo, 2024-12-31 Understanding the international and domestic politics of the commercial determinants of health is a new area of scholarly inquiry Perhaps more than ever the political science policy and public health community needs to better understand the complex political contexts shaping the rise and policy influence of the commercial industry ranging from tobacco to alcohol agribusiness and food products Initial efforts to address the commercial sector s political and policy involvement emerged with the corporate political activity literature which mainly focused on the tobacco industry s efforts to shape noncommunicable disease NCD policy Over the years public health practitioners nutrition and social scientists have built upon this existing literature to expand beyond the tobacco industry looking for example at food and nutrition and alcohol policy in several upper and lower middle income countries With the arrival of several innovative NCD policies throughout the world such as soda taxes and food warning labels coupled with increased international attention through multilateral agencies like the World Health Organization we have now reached a critical juncture in scholarly interest and attention to this topic

Industrial Clusters in International Value Chains Joanna

Bohatkiewicz-Czaicka, Marta Gancarczyk, 2024-07-10 Clusters are considered crucial nodes in the ongoing transformation of international value chains IVCs Due to technological advancements and external shocks such as pandemic and political conflicts value chains VCs have been spatially and functionally shortening and clusters are well suited to address the

resulting demand for more diversified and higher value adding activities in geographical proximity such as European economic area. However, clusters differ in their positions and capability to advance in IVCs which induces the research problem of the conditions for cluster upgrading. CU This monograph aims to develop a theoretical framework for regional CU and empirically verify this framework based on ICT clusters in Europe. It advances the theory of upgrading by linking the VC governance and capability approaches broadening the empirical evidence on the conditions of CU and providing policy recommendations. The unique value of the findings from research and practice results in the identification of the determinants for CU and conceptualizes them into new theoretical constructs of the sufficient Framework Conditions and the necessary and sufficient Public Private Knowledge Governance. Our empirical basis is European clusters in ICT an industry being one of the Key Enabling Technologies KETs for innovation and VC transformation. CSR, Governance and Value David Crowther, Shahla Seifi, 2024-08-10. This book presents the changing face of social responsibility showing how it has grown to encompass governance becoming a vital part of various aspects of human endeavor. From businesses to politics to justice systems Corporate Social Responsibility CSR has expanded its reach touching every sphere of human activity. What is particularly interesting is how governance failures have highlighted its importance in addressing the economic and social challenges that many organizations face today. This shift has led to a reevaluation of the traditional triple bottom line approach with governance and supplier behavior emerging as critical components of CSR. Stakeholders especially consumers are now actively monitoring companies influencing their decisions and ultimately impacting their bottom line. The book critically examines these transformations in business behavior through the lenses of governance and CSR questioning the need for redefining key concepts in the field. Authored by scholars from diverse global backgrounds it blends theoretical insights with practical considerations offering a comprehensive exploration of the evolving landscape. Drawing from the tradition of the Social Responsibility Research Network known for its inclusive approach and emphasis on interdisciplinary research the book presents varied perspectives and solutions derived from shared best practices. Based on contributions from the Network's recent conference this book showcases both the unity and diversity of ideas within the field. By examining both theory and practice it aims to deepen our understanding of these evolving trends and their implications for defining key concepts in social responsibility and governance.

FDI, MSMEs, Digitalization, and Green Industrialization Nagesh Kumar, Satyaki Roy, 2025-03-02. This book presents fresh research on how Foreign Direct Investments FDI Micro Small and Medium Enterprises MSMEs patterns of clustering digitalization and innovation policies interact and influence India's industrialisation and its greening or sustainability. As India seeks to accelerate its process of industrialization especially

focusing on the manufacturing sector different interactions between agents of industrialization need to be understood better through evidence based research The volume through its 17 original contributions focuses on three broad interrelated themes FDI export performance innovation and environmental sustainability growth competitiveness and spatial distribution of MSMEs concerning access to finance digitalisation and sustainability and green technology circular economy and challenges towards clean transition and green industrialization Research presented in this book does not see industrialization as an isolated process from globalization and appreciates the need to act upon specific impacts of foreign trade and investments With a focused and futuristic approach towards industrialisation in India it provides rigorous evidence based treatment of complex interactions using secondary and primary sources of data deploying appropriate analytical techniques In light of empirical findings each chapter comes up with policy lessons for industrial strategy Shedding new light and evidence this book makes an important contribution by helping to generate a better understanding of the process of green industrialization and how it can be fostered to create inclusive and sustainable prosperity It will be an invaluable resource for policymakers analysts researchers and students of industrial and environmental economics
