Competitiveness Bruce Kogut,1993-08-05 With the expansion of global competition through international trade agreements and heightened rivalry between firms in the domestic market it is easy to understand why a firm would seek to compete by lowering the wages paid to labor Yet this strategy is troubled not only by the efforts of other firms pursuing cheaper labor costs but also by the failure to adopt better ways of organizing work New products are copied within a short time after introduction What is difficult to imitate is the organizing of work as applied to the factory floor to the corporation and to relations among firms and other institutions This book explores detailed case studies of individual firms country comparisons and historical patterns of diffusion The authors emphasize that the speed by which a firm adopts and integrates new technologies and ways of organizing must be understood in the context of the strength of the regional and national network of firms and institutions The chapters in the book are written by world renowned scholars including Giovanni Dosi Horst Kern Michael Schumann and Eleanor D Westner and represent major schools of thought from Germany France the U S Japan and the United Kingdom The studies are international in nature and include in depth analyses of software systems automobile manufacturing e g the Toyota Production System and the machine tool industry *The Continuous Wave* Hugh G.J.

Aitken,2014-07-14 Hugh Aitken describes a critical period in the history of radio when continuous wave technology first made reliable long distance wireless communication possible and opened up opportunities for broadcasting voice and music Originally published in 1985 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 *Business Groups in the West* Asli M. Colpan,Takashi Hikino,2018-02-15 This volume aims to explore the long term evolution of different varieties of large enterprises in today s developed economies It focuses on the economic institution of business groups and attempts to comprehend the factors behind their rise growth struggle and resilience their behavioral and organizational characteristics and their roles in national

economic development The volume seeks to enhance the scholarly and policy oriented understanding of business groups in developed economies by bringing together state of the art research on the characteristics and contributions of large enterprises in an evolutionary perspective While business groups are a dominant and critical organization model in contemporary emerging economies and have lately attracted much attention in academic circles and business presses their counterparts in developed economies have not been systematically examined This book aims to fill this gap in the literature and is the first scholarly attempt to explore the evolutionary paths and contemporary roles of business groups in developed economies from an internationally comparative perspective In doing so it argues that business groups actually rose to function as a critical factor of industrial dynamics in the context of Second Industrial Revolution in the late nineteenth century They have adapted their characteristic roles and transformed to fit to the changing market and institutional settings As they flexibly co evolve with the environment the volume shows that business groups can remain as a viable organization model in the world s most advanced economies today

Inside Chinese Organizations Kai-Alexander Schlevogt, 2000-02 An empirical study was undertaken a to examine the characteristics influencing factors and effectiveness of a distinctive Chinese management model adopted by the newly founded private enterprises in mainland China as well as b to test the fit notion in contingency theory The study was based on a random sample of 124 standardized personal interviews with CEOs of Chinese industrial and service companies in Beijing and Shanghai The standardized questionnaire mainly contained the Aston structure scales Pugh and Hickson 1976 and Khandwalla s 1977 management schedules Besides three case examples were studied including one state owned bank and two private enterprises Using AMOS structural equation modeling size mass technology and uncertainty as well as CEO

need for achievement environmental constraints and selected Chinese characteristics were specified as influencing factors of bureaucracy and managerial practices which included strategic orientation leadership style decision making communication and subcontracting Another model analyzed the influence of various key success factors on organizational effectiveness The findings provided support for the re adoption of a distinctive Chinese management model in private companies characterized by autocratic leadership low formalization Chinese entrepreneurship and network based webs Private enterprises also tended to readopt and emphasize traditional Chinese family related values The distinctiveness of this model was ceteris paribus due to this emphasis on familism which had a direct impact on organizational design and an indirect influence through its negative association with company size which in turn significantly covaried with organizational design This family based ownership model was positively associated with organizational effectiveness As regards contingency theory the traditional fit hypotheses could not be rejected In addition less effective companies were not necessarily in misfit Appropriate structure together with an optimizing planning style and firm age were positively associated with performance Managerial recommendations were codified in a CHINA c strategy framework for high effectiveness

The Oxford Handbook of Business History Geoffrey Jones, Jonathan Zeitlin, 2008-01-24 Introduction Approaches and debates Forms of business organization Functions of enterprise Enterprise and society

Entrepreneurship and the Market Process David A Harper, 2002-01-08 Entrepreneurship is central to the market process and yet most theories of it fail to tackle the problem of how economic agents learn from their experience This book redresses this by systematically applying the ideas of Karl Popper It treats the entrepreneur as a theorist who develops conjectures which are then tested by exposure to the market in an effort to eliminate errors This is a critical aspect of the development of new ventures as most entrepreneurial ideas turn out to be mistakes at least in their original form

Enterprising Migrants in Berlin Baris Ülker, 2016-01-15 How has ethnic entrepreneurship emerged and developed since the late eighties in Berlin In his study Baris lker answers this question by relying on the experiences of immigrants from Turkey Most academic studies on ethnic entrepreneurship have focused either on the most unitary structure available in the natural flow of history or on the pre given cultural characteristics of immigrants This book instead sets historical ruptures conditions of possibility and individual practices in context It analyzes how human beings have been turned into ethnic entrepreneurs and explains the ways of governing the self and others in the neoliberal urban context
