## **Managerial State Power Politics And Ideology In The Remaking Of Social Welfare:**

**The Managerial State** John Clarke, Janet Newman, 1997-03-24 This original analysis of the creation of new state forms critically examines the political forces that enabled more and better management to be presented as a solution to the problems of the welfare state in Britain Examining the micro politics within public service the authors draw links between politics policies and organizational power to present an incisive and dynamic account of the restructuring of social welfare Clarke and Newman expose the tensions and contradictions in the managerial state and trace the emergence of new dilemmas in the provision of public services They show that these problems are connected to the recurring difficulties in defining the public that receives these services In particular they question whether the reinvention of the public as either a nation of consumers or a nation of communities can effectively address the implications of social diversity

**Health and Exclusion** David Banks, Michael Purdy, 2005-08-08 Health and Exclusion is a pioneering examination of those policies and practices of exclusion currently experienced by health customers in the UK Chapters document examples of exclusion in a number of controversial areas including the impact of poverty on the health of children exclusion in maternity care exclusion of those with mental health problems exclusion of the elderly in health care the silenced voice of the patient barriers to recruitment and advancement within the health professions The authors challenge whether New Labour policies sufficiently address the inequalities in health experienced by some sectors of society Moreover they suggest that health professionals at times actively contribute to exclusion and suggest strategies and practices to combat marginalisation and resist exclusion

*Modernity and the Pandemic* Sean Creaven, 2023-12-01 Modernity and the Pandemic Decivilization Imperialism and COVID 19 applies the tools of critical social theory to make sense of the COVID 19 crisis and presents a critical sociological analysis of aspects of the political and community response to the pandemic The book focuses on key themes integral to a sociology of pandemics in the global age Firstly Creaven argues that cultures of individualism and consumerism and of pervasive and deeply entrenched social inequalities that is decivilization significantly weaken the cause of public health by weakening the compliance of people with state mandated non pharmaceutical interventions including and especially physical distancing rules and encouraging vaccine hesitancy Secondly Creaven examines how interstate competition and imperial politics have undermined an effective global policy response to the COVID 19 pandemic Policy failure with regard to the management of the pandemic is interpreted as being rooted in the dominance of neoliberal ideology and governance in the politics of international relations particularly in the politics of the leading state actors by protecting corporate interests at the expense of public health and in the constraints imposed on state actors by the competitive dynamic of multinational capitalism in the global age Modernity and the Pandemic will appeal to scholars in the

including the consumers and producers of management ideas and new media as well as traditional players in the management ideas field such as consultancies and business schools The third section focuses on specific features or dynamics of the management ideas system such as their adoption evolution institutionalisation and resurgence while in the final section critical and new perspectives on management ideas are examined highlighting specific socio political contexts and the possibility of alternative ideas and forms of critique With a broad range of perspectives represented this Handbook provides a comprehensive authoritative and enduring resource for those studying management innovation and organizational change as well as for those working in the management ideas industry      **Security after Christendom** John

Heathershaw,2024-02-13 We live in the wealthiest and most heavily defended world in history so why do we feel so insecure In a secular world what does Christian theology have to say about this problem Security after Christendom combines practical examples social scientific research and an ecumenical approach to political theology to answer these questions It argues that Christendom was a plural phenomenon of imagined security communities of East and West whose unravelling continues to have implications for global politics today as dramatically illustrated by Russia s war in Ukraine While notions of a new Christendom are idolatrous and delusional secular imaginaries of national security or the liberal international order are both destructive and unstable True security radical inclusion nonviolent protection and abundant provision is an eschatological phenomenon inaugurated by Christ Security after Christendom is neither found in faithful government nor an exclusive church as polis approach but in relations of tension where the fallen powers are continuously confronted by prophetic practices A post Christendom community expresses its love for the world by seeking its security providentially limiting the disorders of the secular age and offering glimmers of a new earth      *Health Care Systems in Europe under Austerity* E.
