Accounting is written for students in international Business Management study programs. It covers the widely applied syllabus of Cost Accounting and Management Accounting at universities on bachelor's and master's level. The book is based on more than 20 years academic teaching experience in Germany and at international universities in South Africa, Malaysia, China, the Netherlands, and South Korea. In this text book, the application of methods and instruments comes first. Management Accounting follows a case study based approach. All cases are taken from previous exam papers and explained in detail. The text book starts with a case study of a manufacturing company and compares Financial Accounting to Management Accounting. It covers two points of view: 1. a General Management view with aspects of business planning, cost volume profit analysis, degree of operating leverage, mergers and cross border acquisitions, and risk valuation; 2. a Cost Accounting view with Management Accounting systems, flexible budgeting, cost allocations, performance measurement and monitoring, reporting, calculation, manufacturing accounting, job order and process costing, activity based costing, and multi level contribution margin Accounting. On the UVK website, numerous exam tasks and complete solutions thereto are available in English.

Handbook of cost and management accounting Zahirul Hoque, 2010-05-28. This handbook is intended primarily for practitioners such as accountants, auditors, financial analysts, business managers, and chief executives. The primary focus of this book is on techniques and concepts of cost and management accounting for strategic business decisions. In order to survive in the changing business environment, organizations should rethink their strategic philosophy and the role of management accounting. Management accounting systems exist to help managers make economic decisions. In preparing and assessing their strategic plans, organizations need information on many areas of their business environment. Management accounting is also in a process of change. While some businesses continue to use conventional methods of costing, performance measurement, and cost analysis, increasing numbers are adopting activity based cost allocation system, strategic oriented investment decisions models, and multiple performance measures such as the Balanced Scorecard. This handbook focuses on both conventional and contemporary issues in cost and management accounting. It presents an intriguing combination of 20 chapters separated for presentation purpose into seven themes dealing respectively with organizational

planning and controls costing for business decisions pricing decisions capital budgeting decisions performance measurement and benchmarking contemporary management accounting tools and management accounting for the public sector All chapters in this handbook provide both retrospective and modern views and commentaries by knowledgeable scholars in the field who are able to offer unique insights on the changing role of cost and management accounting in today's businesses
