Handbook of Management Accounting

Research Christopher S. Chapman, Anthony G. Hopwood, Michael D. Shields, 2011-09-14 Volume two of the Handbooks of Management Accounting Research consists of two groups of chapters. The first draw together research that has focussed on particular management accounting practices. The second synthesise contributions to the literature that have been focussed within particular organisational contexts. Volume two concludes with a review of research on how management accounting practice and research varies around the world. Special pricing available if purchased as a set with Volume 1. Documents the scholarly management accounting literature. Publishing both in print and online through Science Direct International in scope.

Principles of Cost Accounting Letricia Gayle Rayburn, 1993 A New Approach to Management Accounting History (RLE Accounting) H. Johnson, 2013-11-26 The articles and papers reprinted in this volume all written after 1970 represent a departure from the earlier conventional notion of accounting history research. They approach the study of management accounting history by regarding the accounting and business records of actual organizations as indispensable source materials for historical analysis. Analysis of these records has yielded a new conception of management accounting. These studies suggest that the forces contributing to management accounting's development are more numerous and complex than historians had realized. The case studies in the first part of the book trace the historical development of virtually all the internal accounting practices associated today with management accounting. Those in the second section consist of articles which interpret the case material.
