Environmental Change 7 Preface The ECOMAC project This document is the final report on the project Eco management accounting as a tool of environmental management ECOMAC This research project was conducted under the Environment and Climate Programme Human Dimension of Environmental Change of the European Commission DG XII The ECOMAC project investigated how companies are using or intend to use environmental costs and benefits figures in support of their decisions and what they have been doing to remedy the limitations of conventional management accounting in this area The research was largely explorative in nature but the project also produced a structured overview of the subject and made suggestions and recommendations as to how companies could improve their own environmental accounting

*Implementing Environmental Management Accounting: Status and Challenges* Pall M. Rikhardsson, Martin Bennett, Jan Jaap Bouma, Stefan Schaltegger, 2005-07-28 This book brings together examples of leading thinking and international practice in the rapidly developing area of environmental management accounting EMA The authors include academics and practitioners from industry and the subjects covered range from individual company experiences with implementing EMA to national experiences regarding the adoption and diffusion of EMA practices Contemporary Management Accounting Practices in UK Manufacturing David Dugdale, 2005-11-15 This report investigates the presentation and analysis of financial information in 41 UK Manufacturing companies Traditional and contemporary accounting techniques are exemplified in the case studies With old and new techniques explored the research shows that there is little that is new in management accounting theory and practice The study concludes that there is not one set of practices which all should follow Cima research report reveals methods currently used for reporting financial information in UK manufacturing companies Based on 41 companies it shows a rich diversity of reporting practices that are constrained neither by the financial accounting requirements of SSAP9 nor by any sense of general management accounting trends Financial Directors choose from a toolkit of traditional and contemporary practices in constructing reporting systems appropriate to their varied commercial needs but with a strong leaning towards contribution margin approaches Cost Accounting in Government Zachary Mohr, 2017-04-21 Managerial cost accounting is the financial and managerial tool that is used to estimate the organizational cost of products and services in business and government In recent decades cost accounting in the United States and other advanced industrial countries has been dominated by discussions of Activity Based Costing or ABC While ABC can be shown to produce a more accurate estimate of cost than older and more basic types of cost accounting ABC is not used extensively in many governments We argue that this recent focus on ABC has stifled examination and discussion of how government cost accounting is being used and how it could be used in practice The study of cost accounting practice reveals an important and underexplored area of financial management in government Given the scandals that cost accounting estimates can create and that different types of cost accounting can create different estimates of cost it may be reasonable to ask whether the cost accounting exercise is worth it Cost Accounting in Government Theory and Applications addresses these unusual and

unusually important topics through a series of studies of different government cost accounting practices The first section of the book presents two chapters on the history and basic elements of cost accounting The second section of the book provides further discussion and case studies of actual cost accounting practices in the main areas that cost accounting has been used in government benchmarking the performance of government services rate setting grant overhead cost recovery and cost management The last two chapters discuss cost accounting practices in Europe and the future of cost accounting These cases span local and federal governments and provide a much needed context to the study of cost accounting in government Aimed at academics researchers and policy makers in the fields of Accounting Public Administration and Government Studies Cost Accounting in Government Theory and Applications seeks to address the practical and theoretical gap in government cost accounting research with case studies of different public agencies that are using cost accounting for different purposes The case studies illustrate that different purposes for cost accounting create unique and interesting cost accounting practices The case studies provide useful examples of actual cost accounting systems that can inform both research and instruction
