 Lewis, 2015-06-26 Graphic Design for Architects is a handbook of techniques explanations and examples of graphic design  
 most relevant to architects The book covers a variety of scales of graphic design everything from portfolio design and  
 competition boards to signage and building super graphics to address every phase of architectural production This book  
 combines and expands on information typically found in graphic design information design and architectural graphics books  
 As architectural communication increases to include more territory and components of a project it is important for designers  
 to be knowledgeable about the various ways in which to communicate visually For instance signage should be designed as  
 part of the process not something added at the end of a project and the portfolio is a manifestation of how the designer works  
 not just an application to sell a design sensibility In thinking about architecture as a systematic and visual project the graphic  
 design techniques outlined in this book will help architects process organize and structure their work through the lens of  
 visual communication Each chapter is titled and organized by common architectural modes of communication and production  
 The chapters speak to architects by directly addressing projects and topics relevant to their work while the information  
 inside each chapter presents graphic design methods to achieve the architects work In this way readers don t have to search  
 through graphic design books to figure out what s relevant to them this book provides a complete reference of graphic  
 techniques and methods most useful to architects in getting their work done      *The Cumulative Book Index* , 1995 A world
