TAPSOFT '91 - Volume 2 Samson Abramsky,Thomas S. E. Maibaum,1991 TAPSOFT 91 is the Fourth International Joint Conference on Theory and Practice of Software Development It was held in Brighton April 8 12 1991 and was organized by the Department of Computing Imperial College London The proceedings of TAPSOFT 91 are organized into three parts Advances in Distributed Computing ADC Colloquium on Trees in Algebra and Programming CAAP Colloquium on Combining Paradigms for Software Development CCPSD The proceedings are published in two volumes The first volume LNCS Vol 493 contains the papers from CAAP The second volume LNCS Vol 494 contains the papers from the ADC and CCPSD The ADC talks by distinguished invited speakers surveys current developments in distributed computing including the integration of different paradigms for concurrency algebraic logical and operational foundations and applications to software engineering and formal methods The CCPSD papers address aspects of the trend in software enginering towards unification and synthesis combining theory and practice and merging hitherto diverse approaches PUBLISHER S WEBSITE **Essays on the Visualisation of Legal Informatics** Vytautas Cyras,Friedrich Lachmayer,2023-05-18 Both legal scholars and computer scientists will be curious to know how the gap between law and computing can be bridged The law and also jurisprudence is based on language and is mainly textual Every syntactic system has its semantic range and so does language which in law achieves a high degree of professional precision The use of visualisations is a syntactic supplement and opens up a new understanding of legal forms This understanding was reinforced by the paradigm shift from textual law to legal informatics in which visual formal notations are decisive The authors have been dealing with visualisation approaches for a long time and summarise them here for discussion In this book a multiphase transformation from the legal domain to computer code is explored The authors consider law enforcement by computer The target view is that legal machines are legal actors that are capable of triggering institutional facts In the visualisation of statutory law an approach called Structural Legal Visualisation is presented Specifically the visualisation of legal meaning is linked with tertium comparationis the third part of the comparison In a legal documentation system representing one legal source with multiple documents is viewed as a granularity problem The authors propose to supplement legislative documents ex ante with explicit logic oriented information in the form of a mini thesaurus In contrast to so called strong relations such as synonymy antonymy and hypernymy hyponymy one should consider weak relations 1 dialectical relations a term of dialectical antithesis 2 context relations and 3 metaphorical relations which means the use of metaphors for terms The chapters trace topics such as the distinction between knowledge visualisation and knowledge representation the visualisation of Hans Kelsen s Pure Theory of Law the separation of law and legal science legal subsumption legal relations legal machines encapsulation compliance transparency standard cases and hard cases *Algebraic Specification Techniques and Tools for Software Development* Ingo Classen,Hartmut Ehrig,Dietmar Wolz,1993 The intention of this book is to show how algebraic specification methods can be used for software

development to support reliability modifiability and reusability These methods are introduced by parameterized and module specifications through practical examples and case studies using algebraic specification languages and tools developed at TU Berlin   **Graph Transformation** Andrea Corradini,Hartmut Ehrig,Hans-Jörg Kreowski,Grzegorz Rozenberg,2003-06-30 ICGT 2002 was the rst International Conference on Graph Transformation following a series of six international workshops on graph grammars with plications in computer science held in Bad Honnef 1978 Osnabruc k 1982 Warrenton 1986 Bremen 1990 Williamsburg 1994 and Paderborn 1998 ICGT 2002 was held in Barcelona Spain October 7 12 2002 under the a pices of the European Association of Theoretical Computer Science EATCS the European Association of Software Science and Technology EASST and the IFIP Working Group 1 3 Foundations of Systems Speci cation The scope of the conference concerned graphical structures of various kinds like graphs diagrams visual sentences and others that are useful to describe complex structures and systems in a direct and intuitive way These structures are often augmented by formalisms which add to the static description a further dimension allowing for the modeling of the evolution of systems via all kinds of transformations of such graphical structures The eld of Graph Transformation is concerned with the theory applications and implementation issues of such formalisms The theory is strongly related to areas such as graph theory and graph gorithms formal language and parsing theory the theory of concurrent and distributed systems formal speci cation and veri cation logic and semantics   Proceedings of the Eighth International Software Process Workshop Wilhelm Schäfer,1993

   Managing Complexity and Creating Innovation through Design Satu Miettinen,Melanie Sarantou,2019-04-18 Coping with complexities is an everyday reality for private public and third sectors that face intricate overlapping obscuring and ever changing challenges Developments in technology and systems of value creation are driving a new need to understand facilitate and manage complexity The book proposes design and design research as a solution to respond to the complexities associated with the intensifying and rapid changes in societies technological fields and environments A four step design process for managing complexities is introduced in the four parts of this book spanning from design research in the field to practice based contexts This publication collates high level research and the latest scholarship on this topic while many of the case studies described herein draw on rich experiences and applications in practice The ways designers work to overcome complexities through design and the methods and frameworks presented in the chapters provide critical insights and form an important scholarly contribution in this subject area   **Managing Information and Communications in a Changing Global Environment** Information Resources Management Association. International Conference,1995-01-01 Advances of information and communications technologies have created new forces in managing organizations These forces are leading modern organizations to reassess their current structures to become more effective in the growing global economy This Proceedings is aimed at the challenges involved in effective utilization and management of technologies in contemporary organizations   **Information and Software Technologies** Giedre Dregvaite,Robertas

Damasevicius,2016-09-29 This book constitutes the refereed proceedings of the 22nd International Conference on Information and Software Technologies ICIST 2016 held in Druskininkai Lithuania in October 2016 The 61 papers presented were carefully reviewed and selected from 158 submissions The papers are organized in topical sections on information systems business intelligence for information and software systems software engineering information technology applications

Method Integration Klaus Kronlöf,1993 Using a systematic approach it describes the concept of method integration Presents a detailed investigation of several major techniques including Information Modeling Structured Analysis and VHDL stressing their integration Also describes company specific or research methods that provide distinctive and theoretically advanced features such as HIT and COLD Contains case studies on Siemens Daimler Benz and Philips which illustrate the ideas introduced *Exploring an Unknown Graph by a Team of Robots Using Serendipity Rendezvous Algorithms* Hamido Hourani,2013-10-30 Dependence on a team of robots to carry out the exploration missions has many benefits such as speeding up the missions provided that the coordination among robots is maintained Many circumstances limit the communication which is crucial for the coordination among robots e g impenetrable barriers high temperature etc A periodic rendezvous strategy is considered in this dissertation a work around in order to overlap communication ranges of the robots Attending these periodic rendezvous sessions requires that the robots interrupt their current exploration progress periodically and traverse back to the rendezvous points i e Interruptibility During their trips to these points they do not gain new knowledge since they cross already explored parts of the area Therefore using rendezvous strategies improves the team behaviour but has a negative impact on the time efficiency Serendipity Rendezvous the contribution of this dissertation invests the dedicated time of Interruptibility trip in the inter coordination among the robots by finding a serendipity path This path is where the robot which runs Serendipity Rendezvous meets its colleagues accidentally on its way to the rendezvous point The evaluation results show that Serendipity Rendezvous is able to mitigate the negative impact of Interruptibility while maintaining its positive impacts Moreover it provides a balance utilization of robots for the exploration activities These results are achieved without affecting the already scheduled rendezvous Hence Serendipity Rendezvous optimizes periodic rendezvous sessions as long as the margin of the gaining knowledge by meeting other robots on the serendipity path is considered rewarded for the robots which run Serendipity Rendezvous Handbook Of Software Engineering And Knowledge Engineering, Vol 1: Fundamentals Shi-kuo Chang,2001-12-27 This is the first handbook to cover comprehensively both software engineering and knowledge engineering two important fields that have become interwoven in recent years Over 60 international experts have contributed to the book Each chapter has been written in such a way that a practitioner of software engineering and knowledge engineering can easily understand and obtain useful information Each chapter covers one topic and can be read independently of other chapters providing both a general survey of the topic and an in depth exposition of the state of the art Practitioners will find this handbook useful when looking for solutions to practical problems
