Managing Development Understanding Inter Organizational Relationships:

Managing Development Dorcas Robinson, Tom Hewitt, John Harriss, 1999-12-06 Managing Development is an authoritative text for all courses in development management and provides insights into the partnership approach to development. It demonstrates how changing institutional imperatives, terminology and political agendas have resulted in new types of relationships emerging between groups and organizations in the development process. The book examines these opportunities both by analysing the underlying concepts and agendas and by thinking explicitly about what these mean for management practice. The contributors suggest ways in which inter organizational relationships can be worked out in practice and provide examples and case studies which explore ways of managing real life complexities in development management.

Relationships for Aid Rosalind Eyben, 2012-04-27 International aid is about much more than money

The UN Millennium Development Goals and major events like Live 8 have focused the world spotlight on issues of poverty relief and aid like never before but have not concentrated on the quality of relationships that can make aid succeed or fail This book authored by an internationally renowned group of aid practitioners reveals the contradictions and challenges involved in forging these relationships International development organizations combine the unbridled play of power and arrogant amnesia with serious and innovative efforts to create a more democratic world to support transformative learning and to strengthen accountability The book explores recent attempts from within aid agencies to go against the current flow of top down results based management by learning how to build lasting partnerships that transfer power to those at the receiving end of aid More than just a critique the authors offer a practical framework for understanding relationships in the international aid system and look at the relevance of organizational learning theory which is widely used in business

At Risk Piers Blaikie, Terry Cannon, Ian Davis, Ben Wisner, 2014-01-21 The term natural disaster is often used to refer to natural events such as earthquakes hurricanes or floods However the phrase natural disaster suggests an uncritical acceptance of a deeply engrained ideological and cultural myth At Risk questions this myth and argues that extreme natural events are not disasters until a vulnerable group of people is exposed The updated new edition confronts a further ten years of ever more expensive

and deadly disasters and discusses disaster not as an aberration but as a signal failure of mainstream development Two analytical models are provided as tools for understanding vulnerability One links remote and distant root causes to unsafe conditions in a progression of vulnerability The other uses the concepts of access and livelihood to understand why some households are more vulnerable than others Examining key natural events and incorporating strategies to create a safer world this revised edition is an important resource for those involved in the fields of environment and development studies

Can NGOs Make a Difference? Anthony J. Bebbington, Samuel Hickey, Diana C. Mitlin, 2013-04-04 Can non governmental organisations contribute to more socially just alternative forms of development Or are they destined

to work at the margins of dominant development models determined by others Addressing this question this book brings together leading international voices from academia NGOs and the social movements It provides a comprehensive update to the NGO literature and a range of critical new directions to thinking and acting around the challenge of development alternatives The book s originality comes from the wide range of new case study material it presents the conceptual approaches it offers for thinking about development alternatives and the practical suggestions for NGOs At the heart of this book is the argument that NGOs can and must re engage with the project of seeking alternative development futures for the world s poorest and more marginal This will require clearer analysis of the contemporary problems of uneven development and a clear understanding of the types of alliances NGOs need to construct with other actors in civil society if they are to mount a credible challenge to disempowering processes of economic social and political development Social Enterprise Marthe Nyssens,2007-01-24 In one of its previous books the EMES European Research Network traced the most significant developments in social entrepreneurship emerging inside the third sector in Europe Building upon that seminal work this volume presents the results of an extensive research project carried out over a four year period of a comparative analysis of 160 social enterprises across eleven EU countries It breaks new ground in both its articulation of multidisciplinary theoretical frameworks and its rigorous analysis of empirical evidence based on a homogenized data collection methodology Looking at work intergration it is structured around a number of key themes multiple goals and multiple stakeholders multiple resources trajectories of workers public policies developed through a transversal European analysis and is illustrated with short country experiences that reflect the diversity of welfare models across Europe With contributions from an impressive list of academics all members of the EMES European Research Network this rich follow up volume to The Emergence of Social Enterprise is essential reading for academics researchers and students in the fields of the third sector and social policies **Managing Competences** Benoit Grasser,Sabrina Loufrani-Fedida,Ewan Oiry,2021-04-21 Managing Competences Research Practice and Contemporary Issues draws together theoretical and practical research in competence management It provides a wealth of knowledge concerning emerging and contemporary issues such as the multilevel approach to competence the development of collective competence the strategies of competence management and the tools for managing competences as well as the organizational dynamics of competences Moreover the book provides a critical approach to research and practitioners continued engagement in competence management research and practice Research in competence management has more recently entered an era more open to doubt and questioning Is there a solid theoretical foundation that supports the concept of competence What is the contribution of research on employees competences to human resources management in particular and more generally to management Is there not a risk of diluting the concept of competence by considering it at the individual collective organizational and strategic levels Today is it still possible to manage competences in a world where the boundaries of the organizations are more and more porous These questions and

many others probably explain why a field that seemed well identified and well structured yesterday has given way today to new highly diverse analyses of competences by researchers and practitioners This contributed volume seeks to answer these pressing issues and is a collective means for responding to them The book brings together multiple streams of research in the field about emerging and contemporary issues including multidimensional HRM systems the rise of forms of collaborative management the intensification of the use of digital and robotic technologies the rise of the regime of remote and networked operations the increasing heterogeneity of the status of workers and changes in regulations concerning work and its recognition

Decentralised Governance in Tribal India M. Aruna Kumar, 2010-03-08 The potential of civil society in interfacing with the government for ensuring good governance has gained currency in academic and policy debates in the recent times This becomes particularly relevant in an old democracy like India where the State has not been able to meet the need for basic things However the State provides space and freedom for people to engage in collective action to critically evaluate the State's policies and demand a revision in policy for effective implementation of the laws that are elaborately codified in the Constitution and also to improve the functioning of its institutions This book studies the level of participation of tribal communities in the new Panchayat Raj dispensation introduced in Andhra Pradesh since the PESA Act It specifically analyses how much the community has achieved or benefited after the introduction of Panchayat Raj The objective is to determine how the power structures of tribal communities have been influenced by the socio political changes and institutional innovations like the extension of representative democracy at the grassroots level what kind of changes have taken place in the study area with the institutionalization of Panchayats and the politicization of the tribal people by the different parties This book also throws light on the role of civil society actors in influencing governance positively as well as the limitations that have inhibited the impact of their influence The empirical research highlights that the institution of Gram Sabha has been instrumental in bringing transparency and accountability in the working of local bodies The author has rightly emphasized the need for an attitudinal change both in the political and administrative machinery at State district and village level The inter relationship of the three Ds i e Democracy Decentralisation and Development has been brought out beautifully with the support of field study While the 73rd amendment and PESA Act of the Constitution has mandated the democratization of local self governments the process of decentralisation is yet to take concrete shape through real devolution from Lok Sabha to Gram Sabha

International Politics of HIV/AIDS Hakan Seckinelgin, 2007-08-07 This book examines the global governance of the HIV AIDS epidemic interrogating the role of this international system and global discourse on HIV AIDS interventions The geographical focus is Sub Saharan Africa since the region has been at the forefront of these interventions There is a need to understand the relationship between the international political environment and the impact of resulting policies on HIV AIDS in the context of people's lives Hakan Seckinelgin points out a certain disjuncture between this governance structures and the way people experience the disease in their everyday lives Although the structure

allows people to emerge as policy relevant target groups and beneficiaries the articulation of needs and design of policy interventions tends to reflect international priorities rather than people's thinking on the problem In other words he argues that while the international interventions highlight the importance attributed to the HIV AIDS problem the nature of the system does not allow interventions to be far reaching and sustainable Offering a critical contribution to the understanding of the problems in HIV AIDS in Sub Saharan Africa International Politics of HIV AIDS will be invaluable to students and researchers of health international politics and development Building Sustainable Peace Tom Keating, W. Andy Knight, 2012-07-02 As the world turns its attention to the reconstruction of Afghanistan and Iraq following recent conflicts in these countries the issue of post conflict peacebuilding takes centre stage This collection presents a timely and original overview of the field of peace studies and offers fresh analytical tools which promote a critical reconceptualization of peace and conflict while also making specific reference to peacebuilding strategies employed in recent international conflicts
