Control Techniques for Carbon Monoxide, Nitrogen Oxide, and Hydrocarbon Emissions from Mobile Sources

United States. National Air Pollution Control Administration,1970 **Controlling Automobile Air Pollution** Virginia McConnell,2018-12-20 This volume includes many of the most influential and interesting academic articles related to the economics of mobile source pollution control The papers included explore why vehicles and vehicle markets are unique provide estimates of the type and magnitude of the social costs of driving and examine estimation methods and estimates of the various elasticities of vehicle demand Analysis of the social costs and policies to reduce both traditional air pollutants and greenhouse gas emissions are included Selected articles review the range of evaluation of both regulatory and market based approaches to controlling emissions The complexity of the effects of different policies are emphasized and the unintended consequences of regulation are explored in the context of vehicle emissions reduction policies *Chemistry, Emission Control, Radioactive Pollution and Indoor Air Quality* Nicolas Mazzeo,2011-07-27 The atmosphere may be our most precious resource Accordingly the balance between its use and protection is a high priority for our civilization While many of us would consider air pollution to be an issue that the modern world has resolved to a greater extent it still appears to have considerable influence on the global environment In many countries with ambitious economic growth targets the acceptable levels of air pollution have been transgressed Serious respiratory disease related problems have been identified with both indoor and outdoor pollution throughout the world The 25 chapters of this book deal with several air pollution issues grouped into the following sections a air pollution chemistry b air pollutant emission control c radioactive pollution and d indoor air quality **Exposure Science in the 21st Century** National Research Council,Division on Earth and Life Studies,Board on Environmental Studies and Toxicology,Committee on Human and Environmental Exposure Science in the 21st Century,2012-10-28 From the use of personal products to our consumption of food water and air people are exposed to a wide array of agents each day many with the potential to affect health Exposure Science in the 21st Century A Vision and A Strategy investigates the contact of humans or other organisms with those agents that is chemical physical and biologic stressors and their fate in living systems The concept of exposure science has been instrumental in helping us understand how stressors affect human and ecosystem health and in efforts to prevent or reduce contact with harmful stressors In this way exposure science has played an integral role in many areas of environmental health and can help meet growing needs in environmental regulation urban and ecosystem planning and disaster management Exposure Science in the 21st Century A Vision and A Strategy explains that there are increasing demands for exposure science information for example to meet needs for data on the thousands of chemicals introduced into the market each year and to better understand the health effects of prolonged low level exposure to stressors Recent advances in tools and technologies including sensor systems analytic methods molecular technologies computational tools and bioinformatics have provided the potential for more

accurate and comprehensive exposure science data than ever before This report also provides a roadmap to take advantage of the technologic innovations and strategic collaborations to move exposure science into the future *Managing Carbon Monoxide Pollution in Meteorological and Topographical Problem Areas* National Research Council,Transportation Research Board,Division on Earth and Life Studies,Board on Atmospheric Sciences and Climate,Board on Environmental Studies and Toxicology,Committee on Carbon Monoxide Episodes in Meteorological and Topographical Problem Areas,2003-08-01 The regulation of carbon monoxide has been one of the great success stories in air pollution control While more than 90 percent of the locations with carbon monoxide monitors were in violation in 1971 today the number of monitors showing violations has fallen to only a few on a small number of days and mainly in areas with unique meteorological and topographical conditions **Federal Installations, Facilities, and Equipment Pollution Control Act** United States.
