Managing Consultants Consultancy As The Management Of Impressions

Managing Consultants Consultancy As The Management Of Impressions:

Managing Consultants Clark, Timothy, 1995-11-01 Managers are increasingly being convinced from all sides that traditional structures systems and cultures are no longer appropriate to today's competitive conditions and that organizations must change fundamentally. It is in the context of these pressures that managers feel it increasingly necessary to seek external support by turning to those who offer some solution to these dilemmas: the management consultants. This book argues that the initial selection of a management consultancy and the subsequent evaluation of the quality of service they deliver are inherently problematic. Two root causes are identified: the structure and dynamics of the management consultancy industry and the characteristics of the management consultancy service. Timothy Clark examines how these problems are overcome by revealing the foundations of a successful and long-term client consultant relationship. In a departure from previous analyses of management consultancy, he argues that the key to understanding consultancy and its success is to appreciate that successful consultancy in its methods at least emphasizes the active management of the client consultant relationship. At the core of successful consultancy is the art of impression management. A consultant seeks to create a reality which persuades the client that they have purchased a high quality service. The work of consultants is analysed and understood in terms of the theatrical analogy or dramaturgical metaphor. A consultancy intervention is therefore conceived of as a dramatic event. This is illustrated with reference to two types of consultancy work: executive search (i.e. headhunting) and the work of management gurus.

Management Consultancy Insights and Real Consultancy Projects Graham Manville, Olga Matthias, Julian Campbell, 2017-10-05 The field of management consultancy research has grown rapidly in recent years. Fuelled by the drivers of complexity and uncertainty, a growing number of organizations, both profit and third sector alike, are looking at management consultancy to assist in their aims for development and change. Consultants have become a common feature in organizational change initiatives, involved in both providing advice and in implementing ideas and solutions. However, despite this growing recognition and influence, management consultancy is still often misunderstood or criticized for its lack of theoretical underpinning. The book seeks to address these issues by offering applied theoretical insights from academics that both teach and practice management consultancy. Written by recognized experts in their field, the contributors combine original insights with authoritative analysis. Uniquely, this book identifies emerging themes with critical discourse and provides rich empirical case study evidence to show the reader how management consultancy projects are implemented. Real-world international consultancy projects are featured as written-up cases, featuring organizations from multi-national corporations to the public sector. Written for graduate-level managers or those who have practical leadership experience, this book will enable readers to apply management consultancy models beyond a classroom context.

Best Practice Kimberly Chong, 2018-10-18 In *Best Practice*, Kimberly Chong provides an ethnography of a global management consultancy that has been hired by Chinese

companies including Chinese state owned enterprises She shows how consulting emerges as a crucial site for considering how corporate organization employee performance business ethics and labor have been transformed under financialization To date financialization has been examined using top down approaches that portray the rise of finance as a new logic of economic accumulation Best Practice by contrast focuses on the everyday practices and narratives through which companies become financialized Effective management consultants Chong finds incorporate local workplace norms and assert their expertise in the particular terms of China s national project of modernization while at the same time framing their work in terms of global best practices Providing insight into how global management consultancies refashion Chinese state owned enterprises in preparation for stock market flotation Chong demonstrates both the dynamic fragmented character of financialization and the ways in which Chinese state capitalism enables this process

Economic Advice and Rhetoric Onno

Bouwmeester,2010-01-01 This book compares the approaches of consultants and academic advisers and provides an in depth analysis of their advice argumentation Both compete on the market for economic advice with consultants enjoying a larger market share and usually obtaining higher fees However academics criticize them for overcharging shallowness and quick and dirty methods So are consultants clients misled or even cheated Not necessarily The book reveals that academics have drawbacks as well their arguments are less balanced than those of consultants and their estimates contradict each other more Economic Advice and Rhetoric argues that clients should be cautious challenging academics to reconsider their understanding of consulting practices Onno Bouwmeester illustrates that the instrumental concept of academic advice as assumed by mainstream economists and policy scientists does not guide the practice of academic advisers and thus creates wrong expectations He deconstructs the current understanding of academic advice and counters the view held by critical academics that consultants rhetoric is misleading by comparing it to the rhetoric of academics This rhetorical analysis will be informative to academics and advisors with an interest in the subject of consulting Students aiming to become consultants as well as consultants who want to learn more about academic advisers as their competitors will also find this book an invaluable resource

Matt Statler Kathleen M Sutcliffe Michal Tamuz Teri Jane Ursacki Bryant Ilan Vertinsky Benedicte Vidaillet Jane Webster Karl E Weick Benjamin Wellstein George Wright Kuo Frank Yu and David Zweig **Society and HRM in China** Malcolm Warner, 2013-09-13 This volume looks at the relationship between society and human resource management HRM in China In doing so it asks how representative the latter is of the former The contributors argue that there needs to be a minimum degree of consonance between these two variables if HRM is to be sufficiently underpinned by social reality It is only in a wider framework that people management in general and in China in particular can be fully understood whether through theory or through practice Society and HRM in China explores the changes in Chinese society over the last century and then goes on to analyse how these changes have shaped China's HRM Arguably HRM did not emerge from the void it was shaped by the societal culture from which it sprung and the economic forces influencing its institutions and organizations However there is very little academic literature about the relationship between contemporary Chinese society and its HRM which isn't extremely specific As such much of the research in this collection is not only relatively representative but also highly cross sectional The contributions are all drawn from experts in the field across the disciplines hailing from a diverse range of national origins and educational institutions They cover a wide range of topics approaches and emphases This book was originally published as a special issue of The International Journal of Human Resource Management *Research Methods in Management* Geoff Lancaster, 2007-06-01 Written specifically for the Research Methods aspect of an MBA course Research Methods in Management is the ideal companion for those needing guidance on carrying out a research project The author offers a succinct guide to the topic which provides MBA and Business Students with the necessary grounding in the area of research without going into too much depth The text is therefore written with modular courses in mind so that students gain an overall perspective of the important areas that need consideration and can ascertain the key points they need to be aware of when carrying out research Dissertations and projects form an integral part of many MBA and degree courses and therefore guides such as this are becoming invaluable when tackling this area for the first time Research Methods in Management approaches the research task in a step by step manner covering areas such as data collection observational methods and data analysis Guidance is provided on the best way to approach aspects of the research process and to ensure all aspects are adequately covered As this is an area where many students feel they do not have any experience a text such as this provides the necessary support in approaching this area of the course **Policy Actors** Stephen Ball, 2019-06-20 Policy analysis has always attended to the role of elite actors but much less often has the policy activity of street level actors been attended to The implementation paradigm has tended to caricature the level of practice in terms of resistors or policy failure and ignored the demanding creative and complex processes of enacting policy The move from policy texts to policy in action involves sophisticated processes of interpretation and translation as well as at times opposition subversion and strategic compliance The chapters in this book in different ways seek to get inside the policy process to understand what policy actors

really do how they manage impossible and multiple policy expectations how they attempt to do policy with limited resources in conditions often unimagined by those who write policy and how they translate abstract policy formulations into things that are doable immediate and relevant The collection re writes the policy process and offers new ways of researching policy and policy outcomes This book was originally published as a special issue of the Journal of Education Policy
