Managing Disaster Risk In Emerging Economies:

Managing Disaster Risk in Emerging Economies Alcira Kreimer, Margaret Arnold, 2000-01-01 In 1999 natural catastrophes and man made disasters claimed more than 105 000 lives 95 percent of them in the developing world and caused economic losses of around US 100 billion In 1998 the twin disasters of the Yangtze and Hurrican Mitch accounted for two thirds of the US 65 billion loss The geographical areas affected may vary but one constant is that the per capita burden of catastrophic losses is dramatically higher in developing countries To respond to an increased demand to assist disaster rcovery programmes the World Bank set up the Disaster Management Facility in 1998 to help provide the Bank with a more rapid and strategic response to disaster emergencies The DMF focuses on risk identification risk reduction and risk sharing transfer the three major topics in this volume The DMF also promotes strategic alliances with key private government multilateral and nongovernmental organisations to ensure the inclusion of disaster risk reduction as a central value of development The most important of these partnerships is the ProVention Consortium launched in February 2000 based on the premise that we must all take responsibility for making the new millennium a safer one *Coping with Disaster Risk Management in Northeast Asia* Gregory Coutaz, 2018-10-31 This book analyzes the diversity of national disaster risk governance across Northeast Asia by comparing the national disaster management plans implemented by the governments of China Taiwan Japan and South Korea It also provides an overview of the financial protection measures employed by these jurisdictions to insure against losses

Managing Disaster Risks to Cultural Heritage Bijan Rouhani, Xavier Romão, 2023-11-15 Managing Disaster Risks to Cultural Heritage presents case studies from different regions in the world and establishes a framework for understanding identifying and analysing disaster risks to immovable cultural heritage Featuring contributions from academics and practitioners from around the globe the book presents a comprehensive view of the scholarship relating to cultural heritage disaster risk preparedness and post disaster recovery Particular attention is given to the complex and dynamic nature of disaster risks and how they evolve during different phases of a catastrophic event especially as hazards can create secondary effects that have greater impacts on cultural heritage infrastructure and economy Arguing that risk preparedness and mitigation have historically been secondary to reactive emergency and first aid response the book demonstrates that preparedness plans based on sound risk assessments can prevent hazards from becoming disasters Emphasising that the protection of cultural heritage through preparedness mitigation actions and risk adaptation measures especially for climate change can contribute to the resilience of societies the book highlights the vital role of communities in such activities Managing Disaster Risks to Cultural Heritage will be useful to students professionals and scholars studying and working with cultural heritage protection It will be of particular interest to those working in the fields of Cultural Heritage Archaeology Conservation and Preservation Sustainable Development and Disaster Studies

Disaster Management and Human Health Risk Kirsty Duncan, C. A. Brebbia, 2009 Today the world faces unparalleled threats from human made disasters that can be attributed to failure of industrial and energy installation as well as to terrorism Added to this is the unparalleled threat of emerging and re emerging diseases with scientists predicting events such as an influenza pandemic

Local Disaster Risk Management in a Changing Climate Hori Tsuneki, Rajib Shaw, 2014-09-18 Disasters cause economic as well as human losses and the magnitude of this is ever increasing This can largely be attributed to climate related disasters which intensify vulnerability in the poorest areas of the world In this book approaches to disaster risk management in developing countries are discussed with particular focus on Costa Rica

MEDICAL MANAGEMENT OF DISASTERS Fourth edition revised Work registered in the Catalog of National Library of United States. , Macroeconomic Risk Management Against Natural Disasters Stefan Hochrainer, 2007-12-14

Looking back in history we conceive the twentieth century as the century of wars. Most likely we will conceive the twenty-first century as the century of natural catastrophes. Wars can be avoided; unfortunately it did not happen often in history. In contrast, most natural disasters are outside human influence. However, the consequences of disasters can be alleviated by means of risk management. For an effective risk management, information is needed about i) the size of the risk measured by the frequency and intensity of the hazard and ii) the degree of vulnerability of the economy and society. Stefan Hochrainer's thesis deals with measuring and modeling of both. While the physical risk modeling is a well-developed area within statistical modeling, frequency analysis, point processes, extreme value theory, etc., estimating the economic consequences is a more challenging task. The author studies economic effects of catastrophes by statistical analysis of macroeconomic data. One interesting finding is that disasters can decrease the absolute level of economic performance such as the GDP while keeping growth levels nearly the same at least after some years as in the pre-disaster years. The boom of new products in the financial markets, especially of new derivative instruments, has led to new risk hedging instruments such as catastrophe bonds. CAT bonds transfer the risk to the market of investors.

Measuring Vulnerability to Natural Hazards Birkmann, 2007-01-01

Measuring Vulnerability to Natural Hazards presents a broad range of current approaches to measuring vulnerability. It provides a comprehensive overview of different concepts at the global, regional, national, and local levels and explores various schools of thought. More than 40 distinguished academics and practitioners analyse quantitative and qualitative approaches and examine their strengths and limitations. This book contains concrete experiences and examples from Africa, Asia, the Americas, and Europe to illustrate the theoretical analyses. The authors provide answers to some of the key questions on how to measure vulnerability and they draw attention to issues with insufficient coverage such as the environmental and institutional dimensions of vulnerability and methods to combine different methodologies. This book is a unique compilation of state-of-the-art vulnerability assessment and is essential reading for academics, students, policy makers, practitioners, and anybody else interested in understanding the fundamentals of measuring vulnerability. It is a critical review that provides important conclusions which can serve as an orientation for future research towards more disaster-resilient communities.

Managing the Risks of Extreme Events and Disasters to Advance Climate Change Adaptation Intergovernmental Panel on Climate Change, 2012-05-28

Extreme weather and climate events interacting with exposed and vulnerable human and natural systems can lead to disasters. This Special Report explores the social as well as physical dimensions of weather and climate-related disasters, considering opportunities for managing risks at local to international scales. SREX was approved and accepted by the Intergovernmental Panel on Climate Change (IPCC) on 18 November 2011 in Kampala, Uganda.

Building safer cities Alcira Kreimer, Margaret Arnold, Anne Carlin, 2003

Long-Term Governance for Social-Ecological Change Bernd Siebenhüner, Marlen Arnold, Klaus Eisenack, Klaus H. Jacob, 2013-08-21

The book discusses how to tackle long-term social and ecological problems by using different environmental governance approaches to creating sustainable development. It explores

opportunities and requirements for the governance of long term problems and examines how to achieve a lasting transformation When investments are made to mitigate climate change or preserve biodiversity future generations can reap benefits from the efforts of the present generation However long term social ecological change towards sustainable development is disrupted by the fact that the costs and benefits of action are seen by different generations With a global focus that includes case studies from Europe Asia Africa and North America this book attempts to address the difficulty of developing and implementing effective long term governance solutions The authors examine what distinguishes long term problems from other policy problems what governance responses are available and used and how different governance mechanisms namely economic incentives participation as well as knowledge and learning help to address them Combining the perspectives on the different governance approaches and featuring cases studies on national regional and global issues Long Term Governance for Social Ecological Change will be of interest to policy makers students and scholars of global environmental governance development sustainability politics economics law and sociology
