Mind Readers:

The Mind Readers Lori Brighton, 2013-09-11 Cameron Winters is a freak. Fortunately, no one but her family knows the truth that Cameron can read minds. For years, Cameron has hidden behind a facade of normalcy, warned that there are those who would do her harm. When gorgeous and mysterious Lewis Douglas arrives, he destroys everything Cameron has ever believed and tempts her with possibilities of freedom. Determined to embrace her hidden talents, Cameron heads to a secret haven with Lewis, a place where she meets others like her, the Mind Readers. But as Cameron soon finds out, some things are too good to be true. When the Mind Readers realize the extent of Cameron's abilities, they want to use her powers for their own needs. Cameron suddenly finds herself involved in a war in which her idea of what is right and wrong is greatly tested. In the end, she'll be forced to make a choice that will not only threaten her relationship with Lewis but her very life. This young adult book is best for ages 14 and over. Analogical Reader Peter Dixon, Marisa Bortolussi, 2023-11-23 Uses the concept of analogy to analyze how perspective-taking functions in real life and in narrative. Reading for Learning Maria Nikolajeva, 2014-06-15 How does reading fiction affect young people? How can they transfer fictional experience into real life? Why do they care about fictional characters? How does fiction enhance young people's sense of selfhood? Supported by cognitive psychology and brain research, this groundbreaking book is the first study of young readers' cognitive and emotional engagement with fiction. It explores how fiction stimulates perception, attention, imagination, and other cognitive activity and opens radically new ways of thinking about literature for young readers. Examining a wide range of texts for a young audience, from picturebooks to young adult novels, the combination of cognitive criticism and children's literature theory also offers significant insights for literary studies beyond the scope of children's fiction. An important milestone in cognitive criticism, the book provides convincing evidence that reading fiction is indispensable for young people's intellectual, emotional, and social maturation. Richard P. Feynman,2009-04-29 Many appreciate Richard P Feynman s contributions to twentieth century physics but few realize how engaged he was with the world around him how deeply and thoughtfully he considered the religious political and social issues of his day Now a wonderful book based on a previously unpublished three part public lecture he gave at the University of Washington in 1963 shows us this other side of Feynman as he expounds on the inherent conflict between science and religion people s distrust of politicians and our universal fascination with flying saucers faith healing and mental telepathy Here we see Feynman in top form nearly bursting into a Navajo war chant then pressing for an overhaul of the English language if you want to know why Johnny can t read just look at the spelling of friend and finally ruminating on the death of his first wife from tuberculosis This is quintessential Feynman reflective amusing and ever enlightening **My**

Wiley,2012-10-10 Beginning in 1870 the hunger for scientific discovery in Great Britain drove prominent scientists philosophers and others to promote the legitimacy of telepathy At the same time mind reading as a form of entertainment gained increasing popularity as persuasive performers like John Randall Brown W I Bishop and Stuart C Cumberland convinced reporters that they truly could read the thoughts of others The widely publicized sometimes bizarre interactions between scientists and these charlatans ushered in the Thought Reader Craze a period that lasted through about 1910 and saw entertainers make and lose fortunes and scientists make and lose reputations This volume explores this unusual cultural phenomenon showing how it was aided through the years by public scientific pronouncements astonishing performances by the thought readers and the rapidly changing industrial society **The Permeable Self** Barbara Newman,2021-09-17 How Barbara Newman asks did the myth of the separable heart take such a firm hold in the Middle Ages from lovers exchanging hearts with one another to mystics exchanging hearts with Jesus What special traits gave both saints and demoniacs their ability to read minds Why were mothers who died in childbirth buried in unconsecrated ground Each of these phenomena as diverse as they are offers evidence for a distinctive medieval idea of the person in sharp contrast to that of the modern subject of individual Starting from the premise that the medieval self was more permeable than its modern counterpart Newman explores the ways in which the self s porous boundaries admitted openness to penetration by divine and demonic spirits and even by other human beings She takes up the idea of coinherence a state familiarly expressed in the amorous and devotional formula I in you and you in me to consider the theory and practice of exchanging the self with others in five relational contexts of increasing intimacy Moving from the outside in her chapters deal with charismatic teachers and their students mind reading saints and their penitents lovers trading hearts pregnant mothers who metaphorically and literally carry their children within and women and men in the throes of demonic obsession In a provocative conclusion she sketches some of the far reaching consequences of this type of personhood by drawing on comparative work in cultural history literary criticism anthropology psychology and ethics The Permeable Self offers medievalists new insight into the appeal and dangers of the erotics of pedagogy the remarkable influence of courtly romance conventions on hagiography and mysticism and the unexpected ways that pregnancy often devalued in mothers could be positively ascribed to men virgins and God The half forgotten but vital idea of coinherence is of relevance far beyond medieval studies however as Newman shows how it

reverberates in such puzzling phenomena as telepathy the experience of heart transplant recipients who develop relationships with their deceased donors the phenomenon of psychoanalytic transference even the continuities between ideas of demonic possession and contemporary understandings of obsessive compulsive disorder In *The Permeable Self* Barbara Newman once again confirms her status as one of our most brilliant and thought provoking interpreters of the Middle Ages

Holistic Bioethics Jude Thaddaeus Buyondo, 2024-10-31 In pursuing a holistic bioethics while dialoguing with different sciences appreciation of moral affinities between human and nonhuman entities Dr Buyondo argues for a minimum moral status for nonhuman entities The minimum normative basics of approaches to biomedical ethics are at the very least not distinctive to either human animals or nonhuman animals only The investigation builds further on the African understanding of life where no creation is lifeless In establishing a more inclusive functional bioethics the African approach goes further than biocentrism ecocentrism and holism to ground an inclusive African holistic moral egalitarianism suggesting that all forces and all created things have life We are not emphasizing how every system and creature command equal respect rather everything has life commands respect and moral concern as a minimum imperative within a Black African holistic approach to bioethics However holistic bioethics can neither be Western nor an African invention that people of other cultures only admire from a distance Moreover holistic bioethics doesn't offer the last word on the ethics of nonhuman animals holistic anamnetic solidarity the relational Other and intercultural theological bioethics

Mysterious Minds Elise Nykänen, 2017-11-22 This study examines the narrative tools techniques and structures that Marja Liisa Vartio a classic of

Finnish post war modernism used in presenting fictional minds in her narrative prose The study contributes to the academic discussion on formal and thematic conventions of modernism by addressing the ways in which fictional minds work in interaction and in relation to the enfolding fictional world The epistemic problem of how accurately the world the self and the other can be known is approached by analyzing two co operating ways of portraying fictional minds both from external and internal perspectives The external perspective relies on detachment and emotional restraint dominating in Vartio s early novels *Se on sitten kev t* and *Mies kuin mies tytt kuin tytt* The internal perspective pertains to the mental processes of self reflection speculation and excessive imagining that gain more importance in her later novels *Kaikki naiset n kev t unia* *Tunteet* and *H nen olivat linnut* In the theoretical chapter of this study fictional minds are discussed in the context of the acclaimed inward turn of modernist fiction by suggesting alternative methods for reading modernist minds as embodied emotional and social entities In respect to fictional minds interaction this study elaborates on the ideas of mind reading intersubjectivity and the social mind established within post classical cognitive narratology Furthermore it employs possible world poetics when addressing the complexity incompleteness and inaccessibility of Vartio s epistemic worlds including the characters private worlds of knowledge beliefs emotions hallucinations and dreams In regards to the emotional emplotment of fictional worlds this study also benefits from affective narratology as well as the plot theory being influenced by possible world semantics narrative dynamics and cognitive narratology As the five analysis chapters of this study show fictional minds in Vartio s fiction are not only introspective solipsist and streaming but also embodied and social entities In the readings of the primary texts the concept of embodiedness is used to examine the situated presence of an experiencing mind within the time and space of the storyworld Fictional minds inter actions are also demonstrated as evolving from local experientiality to long term calculations that turn emotional incidents into episodes and episodes into stories In Vartio s novels the emotional story structure of certain conventional story patterns such as the narratives of female development and the romance plot the sentimental novel and epistolary fiction are modified and causally altered in the portrayal of the embodied interactions between the self the other and the world The trajectories of female self discovery in Vartio s novels are analyzed through the emotional responses of characters their experiences of randomness their ways of counterfactualizing their traumatic past their procrastinatory or akratic reactions or indecisiveness The gradual move away from the percepts of the external world to the excessive imaginings and mis readings of other minds triggered by the interaction of worlds and minds challenges the contemporary and more recent accounts of modernism both in Finnish and international contexts

Minds and Gods Todd Tremblin, 2006-03-02 Around the world and throughout history in cultures as diverse as ancient Mesopotamia and modern America human beings have been compelled by belief in gods and developed complex religions around them But why What makes belief in supernatural beings so widespread And why are the gods of so many different people so similar in nature This provocative book explains the origins and persistence of religious ideas by looking through the lens of science at the common

structures and functions of human thought The first general introduction to the cognitive science of religion Minds and Gods presents the major themes theories and thinkers involved in this revolutionary new approach to human religiosity Arguing that we cannot understand what we think until we first understand how we think the book sets out to study the evolutionary forces that modeled the modern human mind and continue to shape our ideas and actions today Todd Tremlin details many of the adapted features of the brain illustrating their operation with examples of everyday human behavior and shows how mental endowments inherited from our ancestral past lead many people to naturally entertain religious ideas In short belief in gods and the social formation of religion have their genesis in biology in powerful cognitive processes that all humans share In the course of illuminating the nature of religion this book also sheds light on human nature why we think we do the things we do and how the reasons for these things are so often hidden from view This discussion ranges broadly across recent scientific findings in areas such as paleoanthropology primate studies evolutionary psychology early brain development and cultural transmission While these subjects are complex the story is told here in a conversational style that is engaging jargon free and accessible to all readers With Minds and Gods Tremlin offers a roadmap to a fascinating and growing field of study one that is sure to generate interest and debate and provide readers with a better understanding of themselves and their beliefs
