Inocencio,2005 This study examines ways to increase food security reduce poverty and achieve economic growth in sub Saharan Africa with water through increased participation of the private sector and publicprivatepartnerships

This report is a summary of the findings from a review of the literature and critical analysis thereof. The private sector includes all farmers, farm households and agriculture-based micro, small and medium enterprises (MSMEs). That is, all entities involved in crop, livestock and fish production and marketing in post-harvest activities and food processing and in supply chains for the goods, services and information used in the process. The study examines different types of agricultural water development and management. These include smallholder subsistence farming, cultivation of profit-oriented high-value crops and peri-urban agriculture as well as successful examples of private sector involvement in various functions or processes including planning, design, construction, operations and maintenance. The spotlight on water does not imply that other factors such as off-farm employment, market development and education are unimportant.

Burkina Faso Pierre Englebert,2018-02-19 Poor even by the standards of West Africa and landlocked at the edge of the Sahel Burkina Faso the Land of Men of Dignity has been plagued by political instability since independence from France in 1960 The country has suffered five military coups the last of which cost the life of the outspoken and charismatic leader Thomas Sankara who had waged war on poverty corruption and illiteracy Yet Burkina's growth was surprisingly strong during the 1980s as it made the best of its meager assets in cotton gold and livestock The country is also fortunate in its relative lack of ethnic conflict and the several religions practiced Islam Christianity and animism peacefully coexist Burkina has earned mixed reviews on the international stage however fighting

two wars with Mali and supporting Taylor's rebels in the Liberian civil war In this textured introduction to Burkina Faso Pierre Englebert highlights the historical and contemporary factors that account for the country's instability considers the ethnic religious and social contours of the Burkinab polity examines in depth the country's economic policies and prospects and analyzes Burkina's external relations Looking toward the next millennium he concludes by assessing the chances of the apparent recent drive toward a more democratic system *Contending Issues in African Development* Obioma M.

Iheduru, 2001-02-28 Taking a forward looking approach this book critically examines the issues and dynamics central to Africa's problematic development and situates these issues within the continent's unique cultural political economic and social milieu Moving away from a simple litany of problems bedeviling Africa's economy the book is the culmination of several scholars' efforts to identify specific causative factors Each chapter delineates a specific issue demonstrates the role it plays in overall development and speculates on probable ways to meet the challenges it poses The major conceptual and epistemological constructs considered include the tamed African State social capacity management of change reconceptualized gender roles and economic integration Although the contributors' various approaches diverge and disagree the epistemological variations contribute cumulatively to an understanding of the issues at the root of Africa's slow pace of development While traversing the spectrum of issues that affect development the book uniquely points out that the management of change is pivotal to fostering development The authors' efforts provide a useful base for future research and help to chart a course of action leading to success in the 21st century *Area Studies at the Crossroads* Katja

Mielke, Anna-Katharina Hornidge, 2017-02-28 In this pioneering volume leading scholars from a diversity of backgrounds in the humanities social sciences and different area studies argue for a more differentiated and self-reflected role of area-based science in global knowledge production Considering that the mobility of people goods and ideas make the world more complex and geographically fixed categories increasingly obsolete the authors call for a reflection of this new dynamism in research teaching and theorizing The book thus moves beyond the constructed divide between area studies and systematic disciplines and instead proposes methodological and conceptual ways for encouraging the integration of marginalized and often overseen epistemologies Essays on the ontological theoretical and pedagogical dimension of area studies highlight how people's everyday practices of mobility challenge scholars students and practitioners of inter and transdisciplinary area studies to transcend the cognitive boundaries that scholarly minds currently operate in
