Phantom Architecture Philip Wilkinson, 2017-11-02 A skyscraper one mile high a dome covering most of downtown Manhattan a triumphal arch in the form of an elephant some of the most exciting buildings in the history of architecture are the ones that never got built These are the projects in which architects took materials to the limits explored challenging new ideas defied conventions and pointed the way towards the future Some of them are architectural masterpieces some simply delightful flights of fancy It was not usually poor design that stymied them politics inadequate funding or a client who chose a safe option rather than a daring vision were all things that could stop a project leaving the drawing board These unbuilt buildings include the grand projects that acted as architectural calling cards experimental designs that stretch technology visions for the future of the city and articles of architectural faith Structures like Buckminster Fuller's dome over New York or Frank Lloyd Wright's mile high tower can seem impossibly daring But they also point to buildings that came decades later to the Eden Project and the Shard Some of those unbuilt wonders are buildings of great beauty and individual form like Etienne Louis Boullée's enormous spherical monument to Isaac Newton some such as the city plans of Le Corbusier seem to want to teach us how to live some like El Lissitzky's horizontal skyscrapers and Gaudí's curvaceous New York hotel turn architectural convention upside down some such as Archigram's Walking City and Plug in City are bizarre and inspiring by turns All are captured in this magnificently illustrated book

The Architect ,1871 *American Architect* ,1907 **Women, Practice, Architecture** Naomi Stead,2016-01-08 The image of the architect is undeniably gendered While the male architect might be celebrated as the ideal man in Hollywood romantic comedies blessed with practicality and creativity in equal measure to impeccable taste and an enviable lifestyle the image of the woman architect is not so clear cut While women have been practicing and excelling in architecture for more than a hundred years their professional identity as constructed in the media is complex and sometimes contradictory This book explores the working lives and aspirations of women in architectural practice but more than this it explores how popular media newspapers magazines and websites serve to define and describe who a woman architect should be what she should look like and how she should behave Looking further into the way that professional characteristics are reinforced through awards like the Pritzker Prize the book demonstrates how idealised characteristics such as sensitivity and vision are seen to be neither entirely masculine nor feminine but instead a complex hybrid owing much to historic concepts of genius Drawing on history sociology media analysis and feminist theories of architectural practice the book will be of interest to all of those who seek to better understand the image and identity of the architect This book was published as a double special issue of Architectural Theory Review

Out of Architecture Jake Rudin,Erin Pellegrino,2022-11-10 Out of Architecture is both a call to reassess the architecture profession and its education and a toolkit for graduates and working architects to untangle their skills passions and value from traditional architectural practice and consider alternate pathways Written by design professionals and expert career consultants this book is informed by numerous client accounts as well as the authors own stories and routes out of architecture The initial chapters follow the narrative of a typical architecture training in the US highlighting the many highs and lows skills honed and ultimately the huge disconnect that can occur between architectural education and practice Subsequent chapters explore a disillusionment with the profession unhealthy work cultures mentorship working with lead architects toxic perfectionism and the notion of a calling Authors then present the hopeful accounts of many architects who escaped a profession known for its grueling working conditions to find fulfilling well paying creative jobs that better utilize the skills of architecture than the architectural profession itself Written in a unique combination of storytelling and analysis this patchwork of client and author stories makes for an immersive provocative and enjoyable read A wide range of architecture students graduates educators and professionals will recognize themselves within the pages of this book and find prompts to reassess their working practices teaching styles and the profession itself It will be of particular value to those students skeptical of joining the architecture workforce as well as those further along and considering a career change
