Radical Regenerative Gardening and Farming Frank Holzman, 2018-01-02 Radical Regenerative Gardening and Farming informs and inspires gardeners and farmers who wish to bring quality and integrity into their work with the land. It is about developing close relationships with land that produces our food. This book combines over 40 years of Frank Holzman's experience in farming, gardening, education, research, and development to provide techniques and concepts for sustainable land use. Radical Regenerative Gardening and Farming is a more spiritual and thoughtful approach to land stewardship geared toward aspiring gardeners with a desire for a deeper connection with the earth. It is as much about why as it is about how to develop land. Rather than traditional tractor farming, this book provides a better understanding of horticulture, dealing with the biological interactions between soils and plants, and providing a good understanding of living systems. Holzman examines healthy perspectives of how to approach a piece of land as a living organism and transform it into a balanced ecosystem. Frank Holzman provides lots of information and insight for backyard gardeners and professional farmers alike. Truly a great resource for transforming the garden as well as the gardener. *The Arboricultural Journal*, 1994

Beyond Certification Scott Poynton, 2017-09-08 This book is free to download in PDF and EPub formats. Is certification the solution? Can it deliver urgently needed improvements to complex problems like deforestation and the exploitation of people? In this controversial new book, Scott Poynton, founder of The Forest Trust, makes a compelling case for a new approach to social and environmental problems that goes beyond certification. Certification emerged from the 1992 Rio Earth Summit amidst great hope. Since then, despite a proliferation of certification schemes in twenty-five industry sectors, the destructive and irresponsible exploitation of natural and human resources has grown still worse. Beyond Certification reviews the positive aspects of certification, of which there are many, but argues that we can no longer afford to gloss over its failures. The book offers an alternative model, VT TV, based on Values, Transparency, Transformation, and Verification, which the author has been exploring and implementing with over 70 companies and industries around the world. These companies are transforming the story of the raw materials they use: wood, palm oil, pulp, and paper, stone, charcoal, soy, beef, sugar, dairy, rubber, coffee, cocoa, and coconut. Mining companies are also exploring this approach, making decisions aligned with fundamental values and what they know to be right. The results? Trust is emerging as former combatants awake to the importance of working together. Guns have been removed from forests, land set aside for protection, worker rights and conditions improved, and long-standing conflicts have been resolved as people confront their legacies. Beyond Certification does not claim that this VT TV model is the only solution. Rather, it shows how new and seemingly radical thinking can catalyze positive change. Included: the limits of roundtable certification, illustrated with real practical examples; the intricacies of the change process; how companies move from destructive to more responsible practices; how to implement more holistic, economically effective, durable systems to

better protect people and the environment **New Mexico Magazine** ,1988 *Peacebuilding for Adolescents* Linda Rennie Forcey,Ian M. Harris,1999 Relying largely on the work of peace and conflict resolution scholars from many disciplines *Peacebuilding for Adolescents* presents proactive strategies for educators and community leaders In order to deter adolescent violence educators have been responding to increasing levels of school violence by severely punishing aggressive children and politicians have been clamoring for tougher criminal justice measures to deter youth from crime The authors in this book argue instead for a more humane response by teaching young people to value peace to learn to manage their own conflicts and to live more peacefully They take a broad view that ranges over three strategic levels of analysis personal school and community They argue for the promotion of a culture of nonviolence in the schools to help create what Dr Martin Luther King Jr called the beloved community **Bibliography of Agriculture** ,1959 **Directory of Interpretive Curricula in the United States and Canada** ,1983
