Man Made Disaster 1st Edition:

Foundations of Safety Science Sidney Dekker, 2019-04-09 How are today's hearts and minds programs linked to a late 19th century definition of human factors as people's moral and mental deficits What do Heinrich's unsafe acts from the 1930s have in common with the Swiss cheese model of the early 1990s Why was the reinvention of human factors in the 1940s such an important event in the development of safety thinking What makes many of our current systems so complex and impervious to Tayloristic safety interventions **Foundations of Safety Science** covers the origins of major schools of safety thinking and traces the heritage and interlinkages of the ideas that make up safety science today **Features** Offers a comprehensive overview of the theoretical foundations of safety science Provides balanced treatment of approaches since the early 20th century showing interlinkages and cross connections Includes an overview and key points at the beginning of each chapter and study questions at the end to support teaching use Uses an accessible style using technical language where necessary Concentrates on the philosophical and historical traditions and assumptions that underlie all safety approaches

The End of Heaven Sidney Dekker, 2017-09-19 In this unique book Sidney Dekker tackles a largely unexplored dilemma Our scientific age has equipped us ever better to explain why things go wrong But this increasing sophistication actually makes it harder to explain why we suffer Accidents and disasters have become technical problems without inherent purpose When told of a disaster we easily feel lost in the steely emptiness of technical languages of engineering or medicine Or in our drive to pinpoint the source of suffering we succumb to the hunt for a scapegoat possibly inflicting even greater suffering on others around us How can we satisfactorily deal with suffering when the disaster that caused it is no more than the dispassionate sum of utterly mundane imperfect human decisions and technical failures Broad in its historical sweep and ambition **The End of Heaven** is also Dekker's most personal book to date

Safety Differently Sidney Dekker, 2014-06-23 The second edition of a bestseller **Safety Differently** Human Factors for a New Era is a complete update of **Ten Questions About Human Error A New View of Human Factors and System Safety** Today the unrelenting pace of technology change and growth of complexity calls for a different kind of safety thinking Automation and new technologies have resu
