Library Bulletin Fitchburg Public Library,1896 **The Betrayal** Kim Christian Priemel,2016-09-08 At the end of World War II the Allies faced a threefold challenge how to punish perpetrators of appalling crimes for which the categories of genocide and crimes against humanity had to be coined how to explain that these had been committed by Germany of all nations and how to reform Germans The Allied answer to this conundrum was the application of historical reasoning to legal procedure In the thirteen Nuremberg trials held between 1945 and 1949 and in corresponding cases elsewhere a concerted effort was made to punish key perpetrators while at the same time providing a complex analysis of the Nazi state and German history Building on a long debate about Germany s divergence from a presumed Western path of development Allied prosecutors sketched a historical trajectory which had led Germany to betray the Western model Historical reasoning both accounted for the moral breakdown of a civilised nation and rendered plausible arguments that this had indeed been a collective failure rather than one of a small criminal clique The prosecutors therefore carefully laid out how institutions such as private enterprise academic science the military or bureaucracy which looked ostensibly similar to their opposite numbers in the Allied nations had been corrupted in Germany even before Hitler s rise to power While the argument depending on

individual protagonists subject matters and contexts met with uneven success in court it offered a final twist which was of obvious appeal in the Cold War to come if Germany had lost its way it could still be brought back into the Western fold The first comprehensive study of the Nuremberg trials The Betrayal thus also explores how history underpins transitional trials as we encounter them in today s courtrooms from Arusha to The Hague Hegel's Grand Synthesis Daniel

Berthold-Bond,1989-07-03 This book offers the first genuinely systematic treatment of Hegel s eschatology in the literature It is an investigation into Hegel s project to demonstrate the ultimate unity of thought and being consciousness and reality self and world The author traces the project through Hegel s epistemology metaphysics and philosophy of history The grand synthesis creates a basic tension an ambivalence that reaches its most acute formulation in Hegel s eschatological language of a final completion or fulfillment of history This conflicts with his dialectic and Heraclitian metaphysics of becoming

Berthold Bond concludes that a substantially new approach to Hegel s eschatology is needed **Water Politics** Farhana Sultana,Alex Loftus,2019-09-06 Scholarship on the right to water has proliferated in interesting and unexpected ways in recent years This book broadens existing discussions on the right to water in order to shed critical light on the pathways pitfalls prospects and constraints that exist in achieving global goals as well as advancing debates around water governance and water justice The book shows how both discourses and struggles around the right to water have opened new perspectives and possibilities in water governance fostering new collective and moral claims for water justice while effecting changes in laws and policies around the world In light of the 2010 UN ratification on the human right to water and sanitation shifts have taken place in policy legal frameworks local implementation as well as in national dialogues Chapters in the book illustrate the novel ways in which the right to water has been taken up in locations drawn globally highlighting the material politics that are enabled and negotiated through this framework in order to address ongoing water insecurities This book reflects the urgent need to take stock of debates in light of new concerns around post neoliberal political developments the challenges of the Anthropocene and climate change the transition from the Millennium Development Goals MDGs to the Sustainable Development Goals SDGs as well as the mobilizations around the right to water in the global North This book is essential reading for scholars and students of water governance environmental policy politics geography and law It will be of great interest to policymakers and practitioners working in water governance as well as the human right to water and sanitation The Bookseller ,1910
