## Abstract

**Purpose** – Sustainable management practices are crucial environmental initiatives implemented by manufacturing organisations to mitigate growing social and ecological problems and progress operational and economic successes. The theory of constraints highlights the essence of adopting sustainability practices, including green management, lean management, top management commitment and reverse logistics, to address production constraints and achieve manufacturing performance. However, more empirical evidence is required to determine whether sustainability practices affect manufacturing performance metrics in economies like Ghana. This research establishes whether adopting sustainable management practices impacts manufacturers' operational and sustainable performance.

**Design/methodology/approach** – This deductive research adopts an explanatory research design. Survey data was administered to 285 managers in 5,329 manufacturing businesses in Ghana. The data was processed and analysed with SmartPLS4.1 and structural equation modelling.

**Findings** – Green management and top management commitment positively predict the performance aspects of manufacturing organisations in Ghana. Also, reverse logistics and lean management practices improve firms' operational, social and environmental performance, except for economic performance. It is concluded that manufacturing businesses that embrace sustainable management practices can improve their performance.

**Research limitations/implications** – Although the study's objectives were primarily achieved, it was geographically restricted to Ghana, a developing country. Also, it was carried out within the boundaries of explanatory design and structural equation modelling.

**Practical implications** – It provides comprehensive information to assist owner-managers in prioritising heavy investments in appropriate sustainable management practices. It will also encourage them to develop a sustainability culture within their firms and supply chains to fast-track and sustain the adopted practices. These measures will enable manufacturing organisations to effectively handle growing sustainability problems to leverage their sustainable and operational performance.

**Knowledge Management in Developing Economies** Kate Hutchings, Kavoos Mohannak, 2007-01-01 This

important book brings together a set of original key contributions to knowledge management in developing economies. It encompasses a wide range of countries throughout Africa, Asia, the Middle East and Latin America as well as the transition economies of the former socialist countries in Eastern Europe. These carefully selected country case studies represent a broad range of issues in managing knowledge. They consider the way in which knowledge management processes and practices are influenced by local culture and institutions as well as by interaction with the broader international community. The need for an aggregated analytical approach in untangling the increasingly complex process through which knowledge processes are created, transferred and deployed is also highlighted. The book provides a strong nexus between theory and practice by offering solutions to problems such as minimising knowledge leakage, creating knowledge sharing cultures and promoting management learning. Presenting the latest research on intercultural knowledge management, this book will be warmly welcomed by researchers, students and lecturers with an interest in international management and knowledge management. Its strong focus on practitioner implications will provide international managers with invaluable suggestions on how to maximise knowledge sharing in international joint ventures and subsidiary operations.

**Managing Technologies and Automated Library Systems in Developing Countries: Open Source vs Commercial Options** Bernard

Dione, Réjean Savard, 2008-08-27 The theme of this meeting was the management of technologies in the context of developing countries and in the light of recent developments concerning especially open source software and applications. Speakers from various countries debated in English and in French over the importance of changing the rules concerning library management systems as well as related implications. Results show that open source software might be a solution although some conditions apply. *Résumé* Le thème de la gestion des systèmes automatisés de bibliothèques dans les pays en développement. Les conférenciers provenant de différents pays présentent en anglais et en français leurs différents points de vue et expériences sur cette question importante pour l'avenir de même que sur les implications qui y sont liées. Les résultats montrent que les logiciels code source ouverts peuvent être une solution mais certaines conditions

**Economic Development and Environmental Sustainability** Ramón López, Michael A. Toman, 2006-06-29 Economic growth as we know it today cannot persist indefinitely if it entails continuous degradation of natural resources and the environment. While in a few countries around the world it appears that environmental degradation has been the result of rapid economic growth, in the vast majority of the developing countries the environment has been equally spoiled despite slow or even negative economic growth. This book provides new insights on the common roots of economic stagnation, poverty and environmental degradation which unfortunately generally reside in misguided government policies and priorities. By doing this, the volume seeks to provide a broader policy option framework than those found in conventional policy analyses mainly dominated by the Washington Consensus. It shows that a major omission of the conventional view is that governments

tend to allocate government expenditures in a biased way favouring subsidies to the economic elites to the detriment of investments in public goods including human capital R D as well as the development of institutions environmental and otherwise which are vital for long run growth poverty reduction and environmental sustainability
