Management Information System Kenneth C. Laudon, Jane P. Laudon, Sahil Raj, Management Information Systems 16e is a book that delves into how business firms across the globe use information technologies and systems to accomplish business objectives In a world where a continuous stream of information technology innovations are transforming the

traditional business world information systems are serving as a tool for business managers to achieve corporate advantage. Regardless of whether the students are in the field of accounting, finance, management, operations, management, or marketing, the information provided in this book will be valuable throughout their respective careers. *Modern Organizations in Virtual Communities* Kisielnicki, Jerzy, 2001-07-01. With such easy access to the Internet and the opportunity for organizations to reach other organizations and individuals around the world faster and more efficiently, modern organizations are rapidly becoming a part of the virtual community. This book presents a comprehensive collection of research works that describe such organizations, the policies and practices that they have implemented, and challenges that they have faced throughout their adaptation to the virtual world. Technology in Knowledge Management Eric Tsui, 2005. **Managing Information Quality** Martin J. Eppler, 2003. What makes information useful? This seemingly simple and yet intriguing and complicated question is discussed in this book. It examines ways in which the quality of information, i.e., its fitness for use, can be improved in knowledge-intensive processes such as on-line communication, strategy, product development, or consulting. Based on existing information quality literature, the book proposes a conceptual framework to manage information quality for knowledge-based content. It presents four proven principles to apply the framework to a variety of information products. Five in-depth company case studies show how information quality can be managed systematically in order to increase the satisfaction of knowledge workers and information consumers. The book uses frequent diagrams and tables as well as diagnostic questions and summary boxes to make its content actionable. **Managing Internet and Intranet Technologies in Organizations: Challenges and Opportunities** Dasgupta, Subhasish, 2000-07-01. This book provides a comprehensive treatment of Internet and intranet technologies, electronic commerce, and the management of these technologies within organizations. It looks at both technical and organizational issues related to management of Internet and intranet technologies. Technical issues covered in the book include intranet, Internet infrastructure, data warehousing, and Web security and reliability. Organizational topics include Internet and intranets for ERP and E-business, education and learning using Web technologies, and approaches to virtual shopping. Provided by publisher. Information Technology Evaluation Methods and Management Wim Van Grembergen, 2001-01-01. The evaluation of IT and its business value are the subject of many academic and business discussions. Investments in IT are growing extensively, and business managers worry about the fact that the benefits might not be as high as expected. This phenomenon is often called the IT investment paradox or the IT Black Hole: large sums are invested in IT that seem to be swallowed by a large black hole without rendering many returns. How to measure the benefits of IT is the concern of this book, titled *Information Technology Evaluation Methods and Management*. The different IT evaluation approaches and methods are discussed and illustrated with cases: traditional financial evaluations such as the return on investment, information economics, and the recently introduced IT Balanced Scorecard. The latter approach is proposed as an ideal mechanism to support the IT business alignment process and its

related IT governance process Among some of the topics included in this book are software measurement ERP project evaluation strategic electronic commerce evaluation
