Infection Prevention and Control Paul Elliott, Julie Storr, Annette Jeanes, 2017-12-04 This book presents a variety of perceptions of and perspectives on infection prevention and control In doing this the chapters will reflect upon challenging and controversial new ways of looking at infection prevention and control aimed at generating both discussion and debate as well as practical solutions With this in mind the book will aim not only to challenge the existing status quo but also push the frontiers of knowledge thinking and practice where infection prevention and control is concerned This is vital when considered in the light of cross infection rates the number of healthcare providers who are being identified by the Care Quality Commission as falling below acceptable standards of infection prevention and control and the almost compulsive

persistent non adherent behaviours of those involved in the provision of medicine health social care and other disciplines related to caring with regards to the undertaking of safe and appropriate standards of infection prevention and control There is no doubt that this book will be challenging with regards to the readers perceptions and perspectives of infection prevention and control Where this topic is concerned however such a challenging approach is vital if the health safety and well being of individuals is to be positively promoted among all those involved in the health and wellbeing of others
