Management of Independent Learning Systems Peter (Lecturer Knight,Jo (University of Lancaster) Tait,2013-01-11 This work focuses on the competences associated with self motivated life long learners who are accustomed to working with autonomy and provides models for exploring ways to develop competences in a changing world *Fostering Independent Learning* Virginia Smith Harvey,Louise A. Chickie-Wolfe,2007-03-02 Accessible practical and empowering this book gives school professionals the tools to put students in charge of their own learning Going beyond traditional study skills guides that focus on the mechanics of homework completion and test taking the authors address the underlying psychological factors that influence academic success and lifelong learning They provide step by step guidance and data based interventions for helping each student develop a repertoire of problem solving strategies in the areas of motivation emotional responses to learning behavior time management organization memory reading writing math and more In a large size format with lay flat binding to facilitate photocopying the volume includes dozens of reproducible handouts and forms This book is in The Guilford Practical Intervention in the Schools Series **A Handbook of Classroom Management for Independent Learning** Philip Waterhouse,1979 **A Handbook of Classroom Management for Independent Learning** P. Waterhouse,Resources for Learning Development Unit,1977 *Independent Learning Pocketbook* Peter Anstee,2015-09-16 The mind is not a vessel to be filled but a fire to be kindled Plutarch The trouble is that as much as we believe those words we re sometimes under such pressure to deliver that we re tricked into the spoon feeding shortcut We then become trapped with our pupils in an unhealthy cycle where we do more and more of the work and they rely on us more and more heavily The Independent Learning Pocketbook is about breaking that cycle and creating ambitious learners who are self regulated self motivated resourceful and resilient learners with clear goals and direction and who use their initiative to achieve success Peter Anstee draws on a variety of research as well as first hand classroom experience and observation in this clear sighted look at how to inspire and nurture the people you teach to become lifelong learners *EBOOK: Promoting Independent Learning in the Primary Classroom* Jill Williams,2003-02-16 From birth human beings are striving to make sense of the world They learn through interaction modelling first hand experience and independent action Most children arrive at school with the notion that being independent and having the desire to take responsibility has been seen in their homes as a good thing However what often happens is that responsibility may be denied them in school and further bids for independence are viewed as negative behaviour This book argues that independence in the classroom should be seen as beneficial for learners and also for teachers Jill Williams makes a compelling case for a climate in which decision making is valued where children are enabled to solve problems and where children and adults respect each others point of view arguing that this will be a climate in which independence flourishes In turn the benefits in terms of teaching and learning will be apparent for both the children and the teachers The notion of independence in the classroom is explored through vivid cameos showing positive

relationships between teachers and learners inspirational classroom organization and management and examples of children taking their learning forward in an environment where they have choices The careful monitoring assessment and discussion of teaching and learning which is presented highlights the benefits for both learners and teachers when there is a focus on independence
