Management Of Visual Impairment In Childhood:

Management of Visual Impairment in Childhood Alistair Fielder,Anthony Best,Martin C. O. Bax,1993-11-18

Management of visual impairment in childhood requires input from such a wide range of medical and nonmedical disciplines that the delivery of coordinated and appropriate care presents serious problems This book is a practical guide to the day to day management of children with this difficult problem Written in accessible language with a minimum of jargon it is intended for both a medical and nonmedical audience pediatricians ophthalmologists optometrists educators and social workers The authors cover a wide range of topics including the epidemiology of childhood blindness prevention visual assessment in early life the ophthalmic and neurological causes of visual impairment the effects of impairment on development behavior and the family community and ophthalmic management management of the multiply impaired child access to the educational curriculum and the challenge of technology Visual Impairment in Children due to Damage to

the Brain Gordon Dutton,Martin Bax,2010-09-14 Clinics in Developmental Medicine No 186 The increased awareness of cerebral visual impairment in children combined with improved recognition of its wide ranging manifestations has led to its recognition as the most common cause of visual impairment in children in the developed world Yet the subject is in its infancy with very little published to date Information on this complex topic has been needed by all disciplines working with disabled children for many years This ambitious book links the work of authors from many of the major research teams in this field who have made significant contributions to the literature on the subject of cerebral visual impairment and provide a structured amalgam of the viewpoints of different specialists The book contains some very novel concepts which will be of great practical value to those who care for children with visual impairment due to brain injury Summaries of the more specialist chapters as well as clear diagrams and a glossary have been provided to increase the book s accessibility to a broader readership This is an exciting and important field to which this book makes a major contribution Children with

Visual Impairments Joao Roe,Alec Webster,2002-11-01 This book is aimed at the mainstream class teacher who has little or no experience of providing effective learning experiences for children with visual impairments It is designed both as an introductory guide to assessment and provision It also has a strong focus on social interactions since many teachers are confused as how to help children with visual impairments make friends The book sets out the basis for addressing the individual with a wide range of visual impairments Chapters cover the identification and assessment of aspects of vision visual impairment and individual needs practical advice on the development of concepts language and literacy and social skills the use of low vision aids appropriate decor and physical layouts lighting and IT educational policy and the Code of Practice Drawing on very recent research this book presents new insights into the needs of children with visual impairments as learners arguing that it is the quality of the child s social interactions which promotes play language and learning

Visual Impairment Heather Mason,Stephen McCall,Christine Arter,Mike McLinden,Juliet Stone,2013-05-24 First

published in 1998 This book embodies the positive philosophy that children with a visual impairment are entitled to access to the full national curriculum during their school years In the UK education placements for pupils and students with special needs range across a continuum from special schools and colleges with day or residential attendance to specialist units or individual integration into mainstream provision Placement results from inter disciplinary assessment and consultation and requires parental agreement Lack of sight and measurably impaired vision constitute special needs in educational terms The writers who have contributed to this major text are teachers and lecturers from both the specialist and mainstream areas of provision and have considerable first hand experience in teaching pupils and students with a visual impairment
