Gass, 1986 **Mathematical Models for Decision Support** Harvey J. Greenberg, Gautam Mitra, Freerk A. Lootsma, Marcel J. Rijckaert, Hans J. Zimmermann, 2012-12-06 It is quite an onerous task to edit the proceedings of a two week long institute with learned contributors from many parts of the

world All the same the editorial team has found the process of refereeing and reviewing the contributions worthwhile and completing the volume has proven to be a satisfying task In setting up the institute we had considered models and methods taken from a number of different disciplines As a result the whole institute preparing for it attending it and editing the proceedings proved to be an intense learning experience for us Here I speak on behalf of the committee and the editorial team By the time the institute took place the papers were delivered and the delegates exchanged their views the structure of the topics covered and their relative positioning appeared in a different light In editing the volume I felt compelled to introduce a new structure in grouping the papers The contents of this volume are organised in eight main sections set out below

- 1 Abstracts
- 2 Review Paper
- 3 Models with Multiple Criteria and Single or Multiple Decision Makers
- 4 Use of Optimisation Models as Decision Support Tools
