Father-Daughter Succession in Family Business Paul W.

Thurman, Robert S. Nason, 2016-04-22 To whom does a father retiring from his life as a successful entrepreneur pass control of the business he has built Once it would always have been his eldest son but increasingly women are becoming involved in family firms having risen to positions of influence and leadership Using revealing case studies from the daughters who succeeded their entrepreneur fathers in a wide variety of challenging situations cultures and continents Father Daughter Succession in Family Business discusses the changes which have led to daughters gaining influence in more and more family businesses It looks at the tensions this succession can produce between old notions of how men and women should behave and the new style of leadership that often comes about when a woman takes the helm This book will help consultants business educators and researchers as well as those who are themselves involved in significant family managed enterprises to better understand why it can no longer be assumed in any part of the World that the first born son will take over the reins of the family business

The Primacy of Financial Objectives Stefan Kemp, 2009 The pursuit of financial profit has always been and will continue to be the core concern for private sector organisations There has been an unquestioning acceptance that the maximisation of financial return is the primary driver for all private sector firms regardless of the nature of these firms This book challenges the simplicity of that assumption Using empirical research undertaken in a variety of private sector organisations in Germany this book demonstrates that there are differences which reflect the nature of the firm in question The research compares family and non family firms and finds significant variations in organisational objectives The priorities structure and financial drivers of family firms differ markedly from those of non family firms and unsurprisingly strongly reflect the family influence Yet the dominant paradigm in current management thinking is centred on public limited companies PLC managed by professionals and overseen by a Board of Directors representing the interests of a large number of shareholders Even here the evidence is that the achievement of maximum return on invested capital is not necessarily the first and only priority In western economies family firms have significant macroeconomic importance Taking a

differentiated view on private sector organisations matters to practitioners and politicians who must ensure their decisions are being made on the right premises Researchers may feel invited to interdisciplinary research initiatives that integrate findings from family business research and other academic fields
