The Management of Corporate Capital: a Review Article John Fred Weston,1961 *The Management of Corporate Capital. Edited by E. Solomon. (Second printing.)*. Ezra Solomon,1961 **The Management of Corporate Capital** Ezra Solomon (Ed),1964 *The Management of Corporate Capital Structure* Gerald T. Garvey,1997 Corporate managers exercise discretion over financial as well as investment policies We present a model in which a manager controls the firm s dynamic capital structure in her own interest increasing leverage to fend off takeovers and decreasing leverage to avoid financial distress An increase in the cost of mounting a hostile takeover is shown to induce a substitution of equity for debt finance firms which are protected from takeover are less more likely to increase decrease their leverage and will tend to issue equity rather than debt We test these implications by examining actual financial policies before and after second generation state antitakeover laws became effective As predicted by the model coverage by antitakeover laws sharply reduces the use of debt finance Firms which are not covered by antitakeover laws exhibit no such policy shift

Creditor Treatment in Corporate Insolvency Law Kayode Akintola,2020-11-27 The significant role of credit in obtaining corporate capital means that credit and the treatment of creditors interests raises distinctive issues in the event of company insolvency In this book Kayode Akintola addresses these issues providing an exceptional in depth analysis of the principles policy and practice of creditor treatment in corporate insolvency law

Long-term Financing and the Management of Corporate Capital Structure Clive Brown,1979 *Essential Writings of Thorstein Veblen* Charles Camic,Geoffrey M Hodgson,2010-12-14 This focuses on Veblen s writings up to 1914 in which he crafts his core concepts develops his theoretical position both constructively and critically and applies analysis topics including the evolution of human institutions and the economic dynamics of modern society

Selected Works of Merton H. Miller: A Celebration of Markets: Volume 2 Merton H. Miller,2002-06-02 Widely regarded as one of the founders of modern corporate finance Merton H Miller was awarded a Nobel Prize in 1990 for his work in the theory of finance and financial economics Selected Works of Merton H Miller gathers together in two volumes a selection of Miller s most influential contributions over more than fifty years of

active research A common theme running throughout both volumes is Miller's conviction about the utility of market based approaches to topics as diverse as dividend policy bank regulation the structure of securities markets and competition between research universities and teaching colleges Miller was perhaps best known for a series of highly influential papers he cowrote in the 1950s and 1960s with fellow Nobel laureate Franco Modigliani that advanced a set of capital structure theorems later dubbed the M and M propositions In brief the M and M propositions state that the actions of investors firms and capital markets will cause the market value of a firm to be independent of its capital structure In other words a corporation's value depends on its investments in people ideas and physical capital goods and not on the mix of bonds stocks and other securities used to finance the investments Four of these papers are reprinted here together with important later work by Miller in macroeconomics corporate capital structure management science asset pricing and the economic and regulatory problems of the financial services industry Diverse and innovative the papers in *Selected Works of Merton H Miller* will interest students and practitioners of economics finance and business as well as policymakers responsible for market regulation
