## **Management Of Power:**

The Management of Power Paul G. Swingle, 2018-04-17 This volume first published in 1976 is addressed to the analysis of power and conflict in and of organizations The author's organizing concept is that one can understand and harness or alter the energy of organizations so that they may function more intelligently and humanely In focusing on the harnessing of organizational energy the author relates theory to practical day to day reality in organizations and provides an in depth analysis of the origins of conflict in organizations The focus is upon the collective of power and action and the volume offers pragmatic suggestions for enhancing managerial skills by bringing together theory and an appreciation of practical realities

Patterns of Management Power Russell McCalley, 2002-05-30 Management is helpless without the power to direct and control the pursuit of well defined corporate goals McCalley identifies six distinct patterns of power within organizations arguing that management can and must use all of them creatively and ethically for the organization's benefit Top down position power is familiar but not the only option McCalley identifies others along with their sources patterns of development and common use often abused in recognizable management situations Managers need to use their authority and power to drive the energy of dynamic organizations asserts McCalley but they must learn to do it without creating factionalism and conflict and without subjugating subordinates Surprising insights into the mystery of why otherwise competent managers often fail are mixed with practical wisdom for executives teachers and students who will one day assume positions of power Among the book's special characteristics is McCalley's comprehensive discussion of the impacts that every type of power authority influence and leadership can have what their basic sources are and how their structural and functional effects impact the ability to manage Power, 1929 **Industrial Management**, 1925 Power, Justice and Citizenship: The

Relationships of Power Darian McBain, 2019-01-04 This volume was first published by Inter Disciplinary Press in 2013 Who holds the power when considering environmental justice and global citizenship Citizenship is felt most strongly with those that we are closely connected with either by physicality or ideology In a world where connectivity is changing our perception of citizenship we consider who holds the power to bring about change This volume looks at the role played by various actors seeking or discouraging environmental justice We consider the role of actors ranging from individual citizens working at a grassroots level through to governments and the media We also look at the role that education has to play in environmental justice from the classrooms to policy directions at the United Nations Theories of environmental justice and citizenship are explored in conjunction with case studies to provide a thought provoking look at power relationships for environmental justice in the start of the 21st century **Recoding Power** Sidney A. Rothstein, 2022 Digital transformation increasingly drives economic growth in the rich capitalist democracies but orienting production around digital technologies is associated with rising inequality and spreading precarity In Recoding Power Rothstein outlines three tactics that workers can use to build power in the current episode of economic transition where they otherwise lack access to traditional power resources

like unions and institutions for social protection Drawing on four in depth case studies of workers responding to mass layoffs at tech firms in the United States and Germany Rothstein shows how workers can develop creative tactics to recode management s discursive techniques for control transforming them from obstacles into resources for collective action By centering workers lived experiences in the workplace Recoding Power develops an account of existing digital transformation illustrating how the path of capitalist development is shaped not by economic necessity but by political creativity
