Management Of Technology In Health And Medical Care:

Healthcare Technology Management Systems Rossana Rivas, Luis Vilcahuamán, 2017-07-17 Healthcare Technology Management Systems provides a model for implementing an effective healthcare technology management HTM system in hospitals and healthcare provider settings as well as promoting a new analysis of hospital organization for decision making regarding technology. Despite healthcare complexity and challenges, current models of management and organization of technology in hospitals still have evolved over those established 40-50 years ago according to totally different circumstances and technologies available now. The current health context based on new technologies demands working with an updated model of management and organization which requires a re-engineering perspective to achieve appropriate levels of clinical effectiveness, efficiency, safety, and quality. Healthcare Technology Management Systems presents best practices for implementing procedures for effective technology management focused on human resources as well as aspects related to liability and the appropriate procedures for implementation. Presents a new model for hospital organization for Clinical Engineers and administrators to implement Healthcare Technology Management HTM. Understand how to implement Healthcare Technology Management HTM and Health Technology Assessment HTA within all types of organizations including Human Resource impact, Technology Policy and Regulations, Health Technology Planning HTP and Acquisition as well as Asset and Risk Management. Transfer of knowledge from applied research in CE, HTM, HTP and HTA from award-winning authors who are active in international health organizations such as the World Health Organization WHO, Pan American Health Organization PAHO, American College of Clinical Engineering ACCE and International Federation for Medical and Biological Engineering IFMBE.

Healthcare Technology Management - A Systematic Approach Francis Hegarty, John Amoo, Paul Blackett, Justin McCarthy, Richard Scott, 2017-01-06 Healthcare Technology Management A Systematic Approach offers a comprehensive description of a method for providing safe and cost-effective healthcare technology management HTM. The approach is directed to enhancing the value/benefit in relation to cost of the medical equipment/assets of healthcare organizations to best support patients, clinicians and other care providers as well as financial stakeholders. The authors propose a management model based on interlinked strategic and operational quality cycles which when fully realized delivers a comprehensive and transparent methodology for implementing a HTM programme throughout a healthcare organization. The approach proposes that HTM extends beyond managing the technology in isolation to include advancing patient care through supporting the application of the technology. The book shows how to cost-effectively manage medical equipment through its full life cycle from acquisition through operational use to disposal and to advance care adding value to the medical equipment/assets for the benefit of patients and stakeholders. This book will be of interest to practicing clinical engineers and to students and lecturers and includes self-directed learning questions and case studies. Clinicians, Chief Executive Officers, Directors of Finance and other hospital managers with responsibility for the governance of medical

equipment will also find this book of interest and value For more information about the book please visit the website

Advances in Informatics, Management and Technology in Healthcare J. Mantas, P. Gallos, E. Zoulias, 2022-08-05 Data science informatics and technology have inspired health professionals and informaticians to improve healthcare for the benefit of all patients and the field of biomedical and health informatics is one which has become increasingly important in recent years This volume presents the papers delivered

at ICIMTH 2022 the 20th International Conference on Informatics Management and Technology in Healthcare held in Athens Greece from 1-3 July 2022. The ICIMTH Conference is an annual scientific event attended by scientists from around the world working in the field of biomedical and health informatics. This year, thanks to the improvement in the situation as regards the COVID-19 pandemic and the consequent lifting of restrictions, the conference was once again a live event, but virtual sessions by means of teleconferencing were also enabled for those unable to travel due to local restrictions. The field of biomedical and health informatics was examined from a very broad perspective with participants presenting the research and application outcomes of informatics from cell to populations, including several technologies such as imaging sensors, biomedical equipment and management, and organizational aspects including legal and social issues. More than 230 submissions were received, with a total of 130 accepted as full papers and 19 as short communication and poster papers after review. As expected, a significant number of papers were related to the COVID-19 pandemic. Providing a state-of-the-art overview of biomedical and health informatics, the book will be of interest to all those working in the field of healthcare researchers and practitioners alike.

Technology, Health Care, and Management in the Hospital of the Future Eliezer Geisler, Koos Krabbandum, Roel Schuring, 2003-04-30. Concentrating on the hospital and its variants, a panel of eminent academics and practitioners explores the major transformations that technological innovations have brought to the worldwide delivery of health care. This book spans a diversity of countries and health care delivery systems but focuses primarily on the U.S., Europe, Japan, and Australia. Doctors and hospitals have long resisted joining the digital revolution, said The Wall Street Journal, June 10, 2002. Now they have no choice. Concentrating on the hospital and its variants, a panel of eminent academics and practitioners explores the major transformations that technological innovations have brought to the worldwide delivery of health care. This book spans a diversity of countries and health care delivery systems but focuses primarily on the U.S., Europe, Japan, and Australia. The book is divided into three parts: Creating Frameworks, which describes organizational changes in future health care delivery; Future Processes of Healthcare Delivery, which examines different processes of delivery such as strategic planning, palliative care, and the impact of research knowledge; Emerging Technologies, which addresses technology's potential impact on future care. The breadth of contributions and the variety of topics covered make this a truly useful review of the origins and current state of the delivery of health care and what we might reasonably expect in the future. Designed for professionals and academics in health care and health care technology management, the book will be equally important to people in related disciplines who are also affected in various ways by advances in the health care system worldwide.

Management of Medical Technology Eliezer Geisler, Ori Heller, 2012-12-06. This is the second book in the series of books that we edit on the Management of Medical Technology (MMT), published by Kluwer Academic Publishers. The first book, *Managing Technology in Health Care*, offered a broad brushed view of the topics involved in the new and exciting area of MMT that we have launched. A group of distinguished scholars contributed to the first book. While

working on the first book in the series and on a variety of articles in MMT we began to realize that there is an urgent need for a comprehensive and highly focused book which will introduce and define the area of MMT In addition we had just completed the two studies of MMT in American hospitals and had a magnificent database fully analyzed With three months left in the first author s sabbatical and thanks to the encouragement from our editor at Kluwer Gary Folven we took to the task of writing this book The merging in this book of the description of a new intellectual space and the write up of the results from our MMT studies have created a unique blend of very attractive reading material The reader will find this book to be a fascinating adventure into a newly created area of intellectual endeavor coupled with findings about how the health care delivery system manages technology Regardless of the reader s background this book will certainly be of interest as it links the medical and business frameworks *Library of Congress Subject Headings* Library of Congress,2010
