Rao Tummala, 1976 **Handbook of Marketing Decision Models** Berend Wierenga, 2008-09-11 Marketing models is a core component of the marketing discipline. The recent developments in marketing models have been incredibly fast with information technology e.g. the Internet, online marketing, e-commerce and customer relationship management (CRM) creating radical changes in the way companies interact with their customers. This has created completely new breeds of marketing models but major progress has also taken place in existing types of marketing models. The HANDBOOK OF MARKETING DECISION MODELS presents the state of the art in marketing decision models dealing with new modeling areas such as customer relationship management, customer value and online marketing but also describes recent developments in other areas. In the category of marketing mix models, the latest models for advertising, sales, promotions, sales management and competition are dealt with. New developments are presented in consumer decision models, models for return on marketing, marketing management support systems and in special techniques such as time series and neural nets. Not only are the most recent models discussed but the book also pays attention to the implementation of marketing models in companies and to applications in specific industries. **Multiple Criteria Decision Analysis** Salvatore Greco, Matthias Ehrgott, José Rui Figueira, 2016-02-18 In two volumes this new edition presents the state of the art in Multiple Criteria Decision Analysis (MCDA). Reflecting the explosive growth in the field seen during the last several years, the editors not only present surveys of the foundations of MCDA but look as well at many new areas and new applications. Individual chapter authors are among the most prestigious names in MCDA research and combined their chapters bring the field completely up to date. Part I of the book considers the history and current state of MCDA with surveys that cover the early history of MCDA and an overview that discusses the pre-theoretical assumptions of MCDA. Part II then presents the foundations of MCDA with individual chapters that provide a very exhaustive review of preference modeling along with a chapter devoted to the axiomatic basis of the different models that multiple criteria preferences. Part III looks at outranking methods with three chapters that consider the ELECTRE methods, PROMETHEE methods and a look at the rich literature of other outranking methods. Part IV on Multiattribute Utility and Value Theories (MAUT) presents chapters on the fundamentals of this approach, the very well known UTA methods, the Analytic Hierarchy Process (AHP) and its more recent extension, the Analytic Network Process (ANP) as well as a chapter on MACBETH (Measuring Attractiveness by a Categorical Based Evaluation Technique). Part V looks at Non-Classical MCDA Approaches with chapters on risk and uncertainty in MCDA, the decision rule approach to MCDA, the fuzzy integral approach, the verbal decision methods and a tentative assessment of the role of fuzzy sets in decision analysis. Part VI on Multiobjective Optimization contains chapters on recent developments of vector and set optimization, the state of the art in continuous multiobjective programming, multiobjective combinatorial optimization, fuzzy multicriteria optimization, a review of the field of goal

programming interactive methods for solving multiobjective optimization problems and relationships between MCDA and evolutionary multiobjective optimization EMO Part VII on Applications selects some of the most significant areas including contributions of MCDA in finance energy planning problems telecommunication network planning and design sustainable development and portfolio analysis Finally Part VIII on MCDM software presents well known MCDA software packages
