Management Styles And Corporation:

Greening the Corporation Peter Thayer Robbins, 2010-09-23 Corporate responses to environmental challenges are often held directly or indirectly responsible for significant worldwide environmental destruction. Corporations are beginning to respond to environmental and social concerns and are taking these into account. This process, known as the greening of the corporation, is fraught with contradictions since the foremost aim of corporations is to earn profits. Robbins analyses the approaches of four major international companies: ARCO Chemical, Ben & Jerry's, Shell, and The Body Shop. [Handbook of Research on Managerial Thinking in Global Business Economics](#) Dinçer, Hasan, Yüksel, Serhat, 2018-12-07 In a highly competitive global market, companies need to equip themselves with best practices and strategies to survive. Strategic management, innovative managerial thinking, and a clear decision-making process must be utilized to boost company performance and ultimately drive the company's success. *The Handbook of Research on Managerial Thinking in Global Business Economics* identifies the importance of strategic decision-making in competitive environments and analyzes the impacts of managerial thinking on global financial economics. The content within this publication examines globalization, consumer behavior, and risk management. It is designed for researchers, academicians, policymakers, government officials, and managers and covers topics centered on innovation and development within organizations.

Politics and Power in the Multinational Corporation

Christoph Dörrenbächer, Mike Geppert, 2011-04-14 This book was first published in 2011. The current financial and economic crisis has negatively underlined the vital role of multinational companies (MNCs) in our daily lives. The breakdown and crisis of flagship MNCs such as Enron, WorldCom, Lehman Brothers, Toyota, and General Motors does not merely reveal the problems of corporate malfeasance and market dysfunction. It also raises important questions both for the public and the academic community about the use and misuse of power by MNCs in the wider society, as well as the exercise of power by key actors within internationally operating firms. This book examines how issues of power and politics affect MNCs at three different levels: the macro level, the meso level, and the micro level. This wide-ranging analysis shows not only that power matters but also how and why it matters, pointing to the political interactions of key power holders and actors within the MNC, both managers and employees.
