Effect of being a 'token' on women managers Fabienne Ballerlaud, 1999-04-01 Inhaltsangabe Abstract Women are still strongly underrepresented in upper middle and senior management positions although they are now obtaining the necessary education and credentials in preparation for managerial careers and have good chances to enter the lower management ranks This underrepresentation is emphasised in heavy industry But what are the reasons There are numerous But one in particular caught our attention the concept of tokenism What exactly lies behind this notion of token women Is it simply a fashionable trend or a reality which may be apprehended within the organisation With this European Project we want to see if there was a reason which could explain why even with career development programmes for women managers which embrace moreover the creation of an equal opportunity corporate culture equal opportunities in recruitment training and promotion The problem concerning the few women managers in the industry wasn't resolved Zusammenfassung Frauen sind noch immer in Führungspositionen stark unterrepräsentiert obwohl sie die nötige Ausbildung und Vorbereitung dafür erhalten

Cochrane, Serge M. Garcia, 2009-07-15 Co-published with the Food and Agriculture Organization of the United Nations Fisheries management is the process that has evolved to try to ensure that fisheries operate in a manner that provides the immediate benefits in a sustainable manner The widely accepted goal is that the full range of benefits should not only be available for this generation but for generations to come Fisheries management has been successful in some cases but there have also been many many cases of failure This volume is intended to contribute to improving this unsatisfactory state by addressing the widespread need for information and guidance on the broad and often complex task of fisheries management It is an updated and expanded edition of the first version of A fishery manager's guidebook which was published as a FAO Fisheries Technical Paper in 2002 The major part of this new edition is divided into five parts intended to cover the range of concerns tools and techniques essential to the modern fisheries manager whether that manager is an individual or a formal or informal group Following the Introduction Part I examines the primary dimensions of fisheries biological ecological social and economic Part II looks at the legal and institutional characteristics of fisheries Part III explores the tools that fishery managers have to achieve the objectives expected from a fishery Part IV discusses the role of scientific information of indicators and reference points Part V moves into implementation of fisheries management and includes a chapter on special considerations in small scale fisheries This landmark publication is aimed at fishery managers and scientists All libraries in research establishments and universities where fisheries and aquatic sciences are studied and taught will need copies of this important volume Fisheries around the world make essential contributions to human well-being including the provision of basic food supplies employment recreational opportunities foreign currency

and others providing benefits to hundreds of millions of people. Despite these benefits, our record of managing fisheries so that the benefits can be sustained has been poor at best, and most fisheries around the world are experiencing serious ecological, social, or economic problems, and usually all three. Today there is global concern about the state of fishery resources and aquatic ecosystems, their resilience to future stresses such as climate change, and their ability to continue to provide benefits.

Encyclopedia of French Film Directors Philippe Rège, 2009-12-11 Cinema has been long associated with France dating back to 1895 when Louis and Auguste Lumière screened their works, the first public viewing of films anywhere. Early silent pioneers Georges Méliès, Alice Guy Blaché, and others followed in the footsteps of the Lumière brothers, and the tradition of important filmmaking continued throughout the 20th century and beyond. In *Encyclopedia of French Film Directors*, Philippe Rège identifies every French director who has made at least one feature film since 1895. From undisputed masters to obscure ones, nearly 3,000 directors are cited here, including at least 200 filmmakers not mentioned in similar books published in France. Each director's entry contains a brief biographical summary, including dates and places of birth and death, information on the individual's education and professional training, and other pertinent details, such as real names when the filmmaker uses a pseudonym. The entries also provide complete filmographies, including credits for feature films, shorts, documentaries, and television work. Some of the most important names in the history of film can be found in this encyclopedia, from masters of the Golden Age, Jean Renoir and René Clair, to French New Wave artists such as François Truffaut and Jean-Luc Godard.

Management des organisations Don Hellriegel, John W. Slocum, 2006-09-21 Le manuel de Don Hellriegel et de John Slocum paraît dans une dixième édition américaine entièrement refondue et actualisée. Si son succès ne se dément pas, comme le démontre cette nouvelle parution, cela est surtout dû au fait qu'ayant pour objectif de former les responsables d'entreprise et les étudiants aux aspects humains du management, il propose un cadre solide de connaissances et une approche pragmatique sur le sujet. Mettant l'accent sur le facteur humain dans la gestion des organisations et étudiant son influence sur la prise de décision des managers, les auteurs abordent des questions comme l'interprétation des comportements individuels et la motivation sur le lieu de travail, la gestion des ressources humaines dans un contexte multiculturel, la conduite d'équipes, le règlement des conflits et les négociations ou le pilotage du changement dans une organisation. Dans cette nouvelle édition, Don Hellriegel et John Slocum illustrent leurs développements sur les concepts du management par l'emploi de nombreux exemples tirés de la vie des affaires, par la présentation d'études de cas approfondies et par l'exploitation des recherches les plus récentes dans ce domaine. Placé au fil des chapitres devant des problèmes de gestion, le lecteur responsable actuel ou futur d'une organisation est donc amené à analyser le comportement qu'il adopterait face des difficultés semblables et réfléchir aux solutions qu'il pourrait privilégier.
