United States Civil Service Commission, 1964 *Evolutionary Algorithms in Management Applications* Jörg Biethahn, Volker Nissen, 2012-12-06 Evolutionary Algorithms EA are powerful search and optimisation techniques inspired by the mechanisms of natural evolution They imitate on an abstract level biological principles such as a population based approach the inheritance of information the variation of information via crossover mutation and the selection of individuals based on fitness The most well known class of EA are Genetic Algorithms GA which have received much attention not only in the scientific community lately Other variants of EA in particular Genetic Programming Evolution Strategies and Evolutionary Programming are less popular though very powerful too Traditionally most practical applications of EA have appeared in the

technical sector Management problems for a long time have been a rather neglected field of EA research This is surprising since the great potential of evolutionary approaches for the business and economics domain was recognised in pioneering publications quite a while ago John Holland for instance in his seminal book *Adaptation in Natural and Artificial Systems* The University of Michigan Press 1975 identified economics as one of the prime targets for a theory of adaptation as formalised in his reproductive plans later called Genetic Algorithms **Defense Management Journal** ,1980 *Operations*
